## Investigate Before You Invest

HERE is a good thing to bear in mind: When an investment proposition offers big returns with very little chance of loss, it is not necessary to send salesmen around the country letting the public in.

The next time a stranger comes to you with a "sure shot" business opportunity, ask yourself if he isn't going to a good deal of trouble in order to let you make some money. Ask yourself why he didn't let a few big financiers handle it. If a thing is safe for you, it would have been safe for them.

Before you invest, investigate! The FIRST NATIONAL BANK will be glad to obtain reliable information for you without charge.
