

Beaver Dam School Closes This Week

Farmers Are Busy Planting. Personal of People Visiting. About.
(Special to The Star)
April 23.—The farmers are very busy these lovely spring days tilling the soil and making preparation for the planting. Some cotton and corn have been planted.
Beaver Dam school closes a very successful year this week. A very interesting program is being prepared and will be given Monday night, April 28. The public is cordially invited.

Several people from here attended class day exercises at Lattimore Tuesday night.
Rev. and Mrs. D. P. Putnam of Shelby were visitors in the community Tuesday afternoon visiting those who are sick and others.
Mrs. J. L. McCurry has been sick for more than a week but is improving some now.
Mr. and Mrs. Fletcher McMurry were Sunday guests of Mr. and Mrs. Clyde McSwain and children.
Mr. and Mrs. Otis Morgan and children spent Sunday with their parents. Mr. and Mrs. J. H. Morgan.
Mr. and Mrs. Lee McDaniel and children from Kings Mountain visited Mr. and Mrs. R. W. McCurry and family Sunday.
Miss Nora Walker was the spend-the-day guest of Mr. and Mrs. W. F. McGinnis Wednesday night.
Prof. F. Y. Blanton of Carthage spent the week-end with his parents, Mr and Mrs. J. L. Blanton.
Mr. and Mrs. S. A. Jarrett, Mesdames Martha Jarrett, Zeb Blanton and baby visited the beautiful flower gardens of Mr. Gideon Price at Lattimore Sunday afternoon, and also visited Mr. and Mrs. M. E. Throat.
Miss Sara Wilkins and Mr. Hoyt Faggett were Easter guests of Mr. and Mrs. W. F. McGinnis.
Mr. and Mrs. James Jenkins and daughter Miss Lera were dinner guests of Mr. and Mrs. Bob Humphries and family.
Miss Gwendolyn Doggett spent the Easter holidays at home. She has returned to B. S. J. C. to resume her school work.
Misses Gwendolyn and Frances Doggett had as their attractive week end guest their cousin, Miss Margaret Lane Green of Charlotte.
Messrs Eullus Brooks and Gilbert McGinnis accompanied Mr. and Mrs. Bryan McGinnis to their home in Charlotte Sunday evening.
Miss Caddie Bailey of Lexington visited in the home of her kinspeople, Mr. and Mrs. T. P. Hamrick Easter day.

Modern Musketeer of Kansas University

Nevada Tahlem, of Altamont, Kansas, a member of the University of Kansas girls' rifle team, has amassed the fine average of 98.2 for the eighteen matches in which she competed last year. She competed in six matches from the sitting or kneeling position, which are usually reserved for men.

a few friends with a party Saturday night. An enjoyable evening was spent.

Mr. and Mrs. S. A. Jarrett, Mesdames Martha Jarrett, Zeb Blanton and baby visited the beautiful flower gardens of Mr. Gideon Price at Lattimore Sunday afternoon, and also visited Mr. and Mrs. M. E. Throat.

Miss Sara Wilkins and Mr. Hoyt Faggett were Easter guests of Mr. and Mrs. W. F. McGinnis.

State's Prison Is A Firetrap

Raleigh.—If fire should break out in the Central prison here, virtually the same thing would happen as in the Ohio prison fire Monday, since the North Carolina central prison here is a veritable fire trap, according to Superintendent, Geo. Ross Pou, who agrees with Governor O. Max Gardner that the present prison plant is a potential death trap because of the fire hazard.

The present North Carolina prison was built in 1899 and though the walls are of brick, all of the floors, doorways, stairways and most of the interior are of hard, rich pine that would burn like turpentine if a fire should get started, Superintendent Pou says. This condition has been called to the attention of the legislature in the past, but nothing has ever been done largely due to the insistence from uninformed sources that the North Carolina prison department operates on its own resources and earnings alone. Mr. Pou also points out that the warden of the Ohio prison had repeatedly pointed out conditions there and asked for a new prison but that no attention was paid to his requests.

Every possible precaution against fire and preparation for fighting it has been made at the Central prison here, Superintendent Pou points out, including chemical fire extinguishers, individual hose and reel equipment and within the last month, this fire fighting equipment has been materially increased. A few years ago a water line from the city water supply was run around the prison with hydrants for hose connection.

But this is not adequate fire protection, for fire protection costs money, according to Mr. Pou. Several years ago an estimate was obtained on how much it would cost to fireproof the Central prison buildings. The estimated cost was in excess of \$100,000. The plan was abandoned in the belief that it would be better to apply this amount in the construction of an entirely new prison plant of fireproof construction and with many other features that are much needed but now contained in the present prison plant. Governor Gardner and the majority of the members of the prison board agree with Supt. Pou in this.

"The fire hazard is by no means the only objection to the present plant," said Supt. Pou. "There should be means of segregating the confirmed criminal from the first offender from the day of their confinement. There should be facilities for the segregation of the older prisoners from the young boys from the very beginning. There should be means of segregating these groups into smaller groups according to their mentality and to provide absolute isolation of prisoners suffering from communicable diseases. But such a prison plant cannot be erected without the necessary money."

Veteran Ready to Force Loyalty to Empire

Major-General K. Isacke, brigade commander of the Queen's Own Royal West Kent Regiment in the Delhi independent area of India. His troops, for the most part veteran campaigners, are ready to stop any threatening uprising in their area. Rioting and bloodshed have already occurred in Calcutta and its environs.

Colored Methodist Church.

John A. Hunter, pastor, Sunday April 27, 1930.

Sunday school 10 a. m. Ellison Cromer, Supt.

Preaching 11:15. Theme: Some Appointments Christ Makes With Men.

Three p. m. The pastor, choir and congregation will worship at the Presbyterian church. R. M. Foster, pastor.

Six p. m. Epworth league, Ida McKenzie, president

Eight p. m. Theme: The Origin of the Negro Melody. Several of my white friends have requested the night theme and provision will be made for them.

Spring Colds—Guard Against Them, Warns Dr. Copeland

This Season of Year, When Resistance is Low, Colds Are Apt to Extend to the Bronchial Tubes—Watch Weather Changes!

By ROYAL S. COPELAND, M. D. United States Senator from New York. Former Commissioner of Health, New York City.

IN the Spring of the year colds are more common perhaps than at other times. This is because the resistance is lowered to such an extent that the watchful germs, all the time present, more easily gain a lodging place in the nose or throat. Very soon inflammation of the delicate mucous membrane follows.
So long as the cold can be confined to the nose it is troublesome and annoying, but not serious. But very often it does not stop there. The cold may extend to the bronchial tubes, to the eyes and ears.
With young children, the most common acute disease, next to indigestion and diarrhea, is cold in the chest, or bronchitis. It may be mild, with little or no fever. In a severe case the fever may go as high as 102 degrees F.
The cough may be loose, or dry and most annoying. It may be so bad that it is almost like whooping cough. Care must be taken that it does not develop into broncho-pneumonia.
A child may have diseased tonsils or adenoids and this disability may be the cause of lowered resistance to disease. These things should be corrected and not allowed to go on until serious sickness results.

Adults who ride in public buses and street cars, those who are exposed to cold, or suffer from constipation and indigestion, are most susceptible to bronchitis. Over-tiredness and damp feet are common factors in bringing on this condition.

After middle life everyone should take increasing care of the health. Many persons stay too much in doors, keep late hours, live in rooms of uneven temperatures. They are easily chilled.

The attacks of bronchitis may recur annually at about the same time of the year. There is excessive coughing and raising of mucus and the breathing is difficult. In aged persons great care must be taken that the condition does not develop into pneumonia. The patient should be kept warm until the doctor takes charge.

Constipation usually accompanies such a condition. This should be overcome. The general health must be built up. Simple but nourishing food should be taken. Regularity in eating is of the greatest importance. Keep an even and warm temperature in the house. Avoid getting the slightest chill. It is important to have good ventilation, but in a way to avoid cold.

When the patient is able to do so, he should get out in the fresh air and sunshine. There is nothing more essential than having the direct rays of the sun. Much is being said about the ultraviolet ray therapy for treatment in colds, bronchitis and pneumonia. Many doctors are using sun-ray lamps in these cases and seem to have good results. It is to be hoped

that for the long winter months, when sunshine is at a premium, there will be found in the future some practical means of treating patients who need building up of this sort. The time is perhaps not far off when light can be used in a way to build up health, just as sunshine does.

Answers to Health Queries

N. P. Q.—My eyes are enlarged, due to goitre. Had goitre removed but my eyes are still enlarged, will they ever be normal?
A.—Yes, but will take some time.

Mrs. W. F. Q.—What should a woman 23 years old, 5 ft. 5 inches tall weigh?
A.—138 pounds.

3.—Yes.

R. C. Q.—Will quinine medication cure malaria?

A.—In most cases. See your doctor.

V. H. Q.—How can I cure indigestion?

A.—Eat simple food and avoid constipation.

Q. N. Q.—What causes eczema?

A.—Faulty diet.

E. H. M. Q.—What causes a baby to have sties?

A.—Sties may be due to some intestinal trouble. See your doctor.

E. M. Q.—What would you advise for a nervous breakdown?

A.—You require a thorough physical examination including the teeth, tonsils and urine. The salivary glands must be made to function. Change of scene and exercises are essential. Sleep, rest, fresh air, gentle exercise, with good sense and proper care you will feel yourself again.

Negro Lynched In S. C. By Mob

Sheriff Is Overpowered And Beaten Negro Bound And Riddled With Shots.

Walhalla, S. C., April 24.—Sheriff John Thomas, overpowered and beaten when an Oconee county masked mob of 200 took Allen Green, 50-year-old negro, from the county jail early today and lynched him, has "no better" than a fifty-fifty chance for life," his physician said today.

Sheriff Thomas, his skull fractured, his head cut and his shoulders bruised, is in an Anderson county hospital.

Considering the gravity of his injuries, the officer is resting "fairly comfortably," his physician said. An operation was performed this morning to relieve pressure on the brain caused by a fracture of the left temple, just above the ear.

The body of the negro was cut down from a tree early today and taken to Seneca by an undertaker to be prepared for burial. He had been charged with an attempted criminal assault on an 18-year-old white married woman.

Coroner J. R. Pea, of this county, announced that an immediate investigation would be made. State detectives, notified last night by telephone of the lynching were on their way here today.

MILLION PLANE OWNERS IN NEXT 15 YEARS SEEN

Philadelphia.—An estimate that the United States will have 250,000 privately owned airplanes in five years and 1,000,000 in fifteen years, was made by the Division of commercial research of the Curtis Publishing company. It has made a six months survey of the aviation industry in which 20,387 miles were flown and thirty-five states visited. Charles Coclidge Parlin headed the survey and interviewed most of the leaders of the industry.
