**Economy Urge For Counties**

State Can Show Big Saving If Counties and Cities Follow Economy Plan.

Raleigh.—"If the cities and counties of North Carolina will show the same degree of economy that the state government is using, a total of \$10,000,000 can be saved to the taxpayers of the state during the next fiscal year," declared Governor O. Max Gardner in a talk to newspaper men.

"I hope that citizens, civic clubs and organizations will get behind the governing bodies of the cities and counties and see that economy is brought about. Now is the time to do it, for now is the time that budgets are being prepared."

"The state is saving over \$2,000,000 out of appropriations of less than \$20,000,000 and I think \$10,000,000 is a reasonable amount to be saved out of the total tax bill of \$100,000,000."

"I do not mean by that that the money has heretofore been wasted. I am sure there has been none wasted in the state government and I think the same thing is true on the whole of the cities and towns. But these are times when we have to do without things which ordinarily seem to be necessities. Nearly all the individuals in the state are doing it, the state itself is doing it and cities and counties can do it. I realize that a great deal of the expenditure is for debt service, which cannot be reduced, but the state is having that same problem and we are cutting over appropriations by 20 per cent."

Governor Gardner held a conference with President J. L. Foust and the full-board of trustees of the North Carolina College for Women and a budget was worked out providing for operation next year of \$400,000 instead of the \$500,000 provided in the budget.

Like other institutions, the college last year operated on about 90

per cent of its operation, so that the actual reduction for next year will be only \$50,000.

**ABILITY TO CARRY ONE'S LIQUOR IS MERE MATTER OF EXTRACTING GLANDS**

New York.—The theory that only gentlemen can carry their liquor well was disputed by Dr. Ludwig Puusepp, noted European neuro-pathologist, who said the matter simmered down to the size of the thyroid gland.

His education is based on experiments performed on rabbits. One animal was fed thyroid glands, another was allowed to remain normal and a third had its thyroid removed. Alcohol was injected into all of them. The rabbit that had been eating thyroid glands died, the normal animal became intoxicated and the rabbit that lost its gland was unaffected.

**Appeal For City Taxes**

To the Taxpayers of Shelby:

Unless you have already paid your city taxes, you are urgently requested to do so at once. Our bills have to be met. The School Board is in especial need of the funds due them. Unless the taxes are paid in, the necessary funds will have to be borrowed.

The interest paid on borrowed money does not benefit the community. On the other hand, it deprives the community of that much service or adds that much to the tax burden. One way to keep taxes low is to pay the levy on time.

Your taxes will have to be paid sometime. Why not pay them now—save the interest and enable the town and school to meet their obligations?

Yours sincerely,  
**S. A. McMURRY, Mayor.**

**"I No Longer Have To Take Laxatives"**

THOS. C. MATTHEWS, 31

"For more than ten years I suffered from constipation and an inactive, torpid liver. I would have severe bilious attacks and constipation forced me to take some sort of laxative or cathartic almost daily.

"It has been thirty days now since I completed the Sargon treatment, and I no longer find it necessary to take pills or laxatives of any kind.

"My advice to anyone needing a strength-building medicine or something to straighten out an inactive liver and relieve constipation is to by all means begin taking Sargon and Sargon Pills."

**Recreation**

A radio is a fine thing after a hard day's work and we think everybody ought to have a set in their home, however, when you are tired and blue or just plain tired, relaxation of the mind will go a great way to relieve the physical strain.

To play and exercise brings pleasure to everyone and why not try a little Golf on the side?

The Miniature Golf Course in the city is about the only community play ground which we have (where old and young can play) and more and more are availing themselves of the healthful relaxation which it affords. Go and play and see what your score will be.

**"UNLAX"**

Have you been to the Shelby Miniature Golf Course? Why don't you go up and play a round? It's the best place imaginable to "unlax" after an all day grind and you will find Mr. Betterly, the manager of the course, just the finest sort of a fellow.

The game—Oh! It goes like this—Only one club is used, a putter, this of course is used to hit the small golf ball. The idea is to see how few a number of strokes you can sink the ball in a hole. There are eighteen holes and eighteen good strokes should put the ball in each hole but that is almost impossible because of the traps, barriers, and hazards one encounters. It is interesting to note that 50 strokes is par on the course and only a few have made less. The majority of the players have a score in the sixties. How many did it take you?

Come and try a round and see what your score will be?
