VOL. 2 MAY, 8, 1931 NO. 21

We will have an exhibition of all Model A and Model AA Ford Commercial Types at our Garage Monday, May 11, from 10 o'clock Monday morning until noon.

This display of Commercial Types will be very complete and will be well worth your time to call around and look them over.

"How is it he never takes you to the theater any more?"
"Well, one evening it rained and we sat in the parlor."

A very important feature of the New Model A Ford Car is the use of RUSTLESS STEEL in all exposed metal parts, such as the radiator shell, hub caps, headlights, etc. Rustless steel is made by combining steel and pure chromium.

The rustless steel used in the Model A Ford is 18% pure chromium or nearly 1-5. This is very important as it will not tarnish, peel or crack off. Rustless steel means the same thing as Sterling silver. Chromium plated means the same as plated silverware.

Auto Tourist: "I clearly had the right-of-way when this man ran into me, and yet you say I am to blame."
Local Officer: "You certainly

were."
Autoist: "Why?"
Local Officer: "Because his father is Mayor, his brother is Chief of Police, and I go with his sister."

The exhibition of Ford Commercial Types to be held next Monday will include New Police Patrol, New Ambulance and Funeral Coach, Garbage and Dump Bodies, Coal Bodies Panel and DeLuxe Deliveries all Mounted on the Model A Car and the Model AA Truck Chassis.

We will be glad to have you call at our garage between 10 o'clock Monday morning and Noon and look over the different Commercial Types.

"All that I am I owe to my mother."
"Why don't you send her thirty cents and square the account?"

Teacher: "Johnny, if your father could save a dollar a week for 4 weeks, what would he have?"
Modern Child (promptly): "A radio, electric refrigerator, a new suit, and a lot more furniture."

Be sure and come around and look over the Ford Commercial Caravan. We will be glad to have you.
