"Be It Ever So Humble There's No Place Like Home"

A FEW DEFINITIONS OF HOME

HOME—a world of strife shut out; a world of love shut in.
 HOME—the place where the great are small and the small are great.
 HOME—the father's kingdom, the child's paradise and the mother's world.
 HOME—the place where we grumble most and are treated best.
 HOME—the center of affection, around which our heart's best wishes twine.
 HOME—a place where our stomachs get three square meals daily, and our hearts a thousand.
 HOME—the only place on earth where the faults and failings of humanity are hidden under the sweet mantle of love.

— OWN YOUR OWN HOME —

If you're living in a tent, Build a home.	If you're weary of a flat, Build a home.
If you're sick of paying rent, Build a home.	One that isn't yours, at that, Build a home.
You can pay and pay and pay To the landlord till you're gray; He can kick you out next day— Build a home!	If you're tired of coming through For what won't belong to you, There is just one thing to do— Build a home.

A RENTED HOUSE CAN NEVER BE A REAL HOME

If you are living in a rented house you are paying for a home whether you own it or not. As a renter you pay every dollar of the cost of building and maintaining the dwelling you live in, and many service charges and profits to others, besides. You are paying for all the advantages and satisfaction of the permanent, established home and the completely successful life, whether you get them or not. Why not have them?

Start to plan, begin to dream, Build a home.	If you want to walk erect Build a home.
Start to save, begin to scheme, Build a home.	Want your family's respect, Build a home.
Lay a little money by Daily, weekly, monthly—why	If you want the kids to grow Healthy, hearty, happy, so
It is easy if you try— Build a home!	What a home is they will know— Build a home!

The Cleveland Building and Loan Association will help you to buy or build a home. We cordially invite you to call at our Office and let us explain to you the plan.

Pooling Of Cotton Is Urged This Year

Co-op Head Points Out Reasons For Cooperative Selling Office In Shelby.

Raleigh, Sept. 28.—Prices below the cost of production, high quality of the present crop, and prospects for acreage reduction next year were pointed out yesterday by U. Benton Blalock, general manager of the North Carolina Cotton Growers Cooperative association, as "good reasons why cotton should be pooled this year."

"Cotton, in the first place," he said, "is selling far below the cost of production, and we all know that acreage will be heavily reduced next year. And then to sell it outright now would be sacrificing a crop that is showing up to be of the highest quality we have produced in several years."

Don't Give Away Your Cotton Pointing out that representatives of the largest cotton shipping firms are very active in an effort to get control of as much of North Carolina's good cotton as possible, Mr. Blalock declared that "to sell at present prices the better staples we are now growing is simply giving away real money to somebody."

As indication that growers should get a very good premium on inch or better cotton he cited the heavy tariff on Egyptian and other foreign-grown long staple cotton and a statement, recently issued by the Mississippi Staple Growers association, that, regardless of the large production this year, there is not going to be an over-production of the better staples.

A Million Bale Record. The general manager of the state cooperative, which has handled more than a million bales for North Carolina growers during its nine years existence, added that the association is now mailing out additional premium checks to members whose cotton is above middling 7-8.

"In some instances," he said, members are drawing as much as \$6.20 per bale premium, and our average premiums so far on cotton above middling 7-8 are \$2.30 per bale. This does not represent the full value of the premiums however, but only the amount we are allowed to advance under our arrangement with the Federal Farm board."

Dog Show Attracts Interest For Fair

NEW TIRE SAFETY FOR THOUSANDS OF EXTRA MILES

CAR OWNERS are constantly expressing surprise at the amount of tread left on India Tires after many thousands of miles.

This is no accident—no unusual occurrence with India Tires. It is the way they are made.

India tread rubber starts with the best "crude" that can be had. It is processed to give the utmost in wear.

This long-lasting traction is one of India's most important contributions to making present driving practice SAFE.

Come in and see why the extra processes used in making India Tires mean extra mileage—with safety.

*For instance—21 miles "testing" average in place of the 10 miles given most "road rubber" tires. A smooth, velvet, long wearing texture and better tread. True to give thousands of extra miles of extra traction.
