# Consider Smith. McAdoo Out Of List For 1932

Both Names Heard But Democrats Not Likely To Nominate Either Extreme.

(Special to The Star.)

Washington, Oct. 26,- There is no more bizarre development in recent political news than the effort those doughty heroes of Madison Square Garden in 1924, Alfred E. Smith and William G. McAdoo.

For many months prominent dry leaders have been asserting either privately or publicly, that a plot was afoot to nominate Smith again next year and that in all likelihood he would be the candidate. They have not actually predicted the nomination of McAdoo-perhaps because you can't well predict the nomination of two presidential can didates by the same conventionbut several of them have been raising the old hero's name again and repeatedly assuring the country that none but McAdoo could win the presidency for the Demo-

Both Are Out, It's hard to fathom all that, because-in my humble opinion, at least-if there is anything more certain than that Smith will not be renominated by the Democrats it is that McAdoo is politically as dead as a door-nail. Smith is by no means politically dead, but the Democrats are getting set to nominate someone else.

Roosevelt Ahead. It may be that the drys have lost their poltical wisdom, but, as one recalls their record, that very hard to believe.

Perhaps wishes begat those thoughts because the drys are sure they could defeat Smith easier than any other wet Democrat. Or possibly they feel that if they can keep talking about Smith it will help his chances of nomination.

But what seems more likely is that Smith is being raised as a bogey in the effort to organize the dry strength for a 1932 fight against the inevitable wet Democratic candidate. And that, to a lesser extent McAdoo's name is being used so that the old-time drys will not accept the inevitable wet candidate with equanimity.

The drys have already begun their 1932 campaign. They find that most of the dry politicians of the south and west are "sold" on Governor Roosevelt of New York, who is not too wet for them and who happens to be a protestant. drys also find that 1932 is likely to be a Democratic year, not because the country has turned wet apparently isn't emough strength in the Democratic party to present a strong dry candidate for that this is a bad year to raise a big campaign chest.

No Worry Here. So any fear that can be thrown by the spectre of Smith or any hope that might possibly be stimulated by mention of McAdoo would be all to the good in so far as the drys are concerned. They admit privately that what worries them most of all is the problem of getting the real dry strength organized and ready to lick such a candidate as Roosevelt.

Smith is not nearly as big a worthe minds of southern Demnced he would
