SNAKE SWALLOWED

GLASS NEST EGGS

A number of years ago, back when glass nest eggs were quite a novelty. V. C. Eaker, uncle of M. A. Fortenberry, moved to California. He saw some of the glass eggs and sent back to his sister, Mrs. Fortenberry. She placed them in hen-nests about the barnyard and forgot them. Several months later two or three of the glass eggs were missing. Mrs. Fortenberry figured that some of the children had taken them out to play with and lost them. Six months after they disappeared, Cullen Fortenberry, then about 15, saw a hole in a tree and dug into it hoping to pull out a 'possum. Instead he drew out a snake Mrs. Hambright Sick. Basketball about six feet long. The snake was emaciated and looked as if it had been through the throes of galloping "TB". When killed it was found that the snake had swallowed a couple of the glass nest-eggs and had not been able to digest them.
