**STEADY WORK. GOOD PAY** Reliable man wanted to call on farmers in Cleveland. Write today. McNess Co., Dept. F. Freeport, Illinois. 1-18p

**HIGH CLASS MONUMENTAL** Marble and granite. Cleveland Marble and Granite Works, West Warren St. tf 30c

## Sanitation Then And Now Compared

In The Olden Days People Used Whiskey To Prevent Diseases. At Old Cleveland.

(By James C. Elliott.)

The Jews emphasized the importance of cleanliness. No unclean person was allowed to enter their sacred congregations, and a priest or preacher must be sound or whole. Any physical impairment disqualified him. Wash and be clean was a commandment. Only civilized people with good clothes can keep clean. Savages clad in garments of skins have a poor chance for cleanliness. When their camps became unsanitary, they moved to new locations. That precaution is necessary in modern army camps.

Towns and cities can keep sanitary conditions good by co-operation, but the isolated countryman has much to contend with in stables, hog-pens, chicken roosts and bad draining system. So we can note the clean appearance of urban homes. Time was, when buzzards and flies were natural scavengers to consume surplus filth.

Then small towns had a vacant lot nearby where dead animals and filth were deposited. Then typhoid and typhus fevers, cholera and smallpox were common scourges of mankind. And whiskey was the most dependable remedy and prevention against sickness. In 1880 I was running a little country store and sold chickens and eggs at Cleveland Springs—a great health resort. In the summer for the richer people. And I noted sanitary conditions there. The large dining room was on the ground floor with one long table with all the food on the table. Dishes screened against flies, had not been thought of. A rope was stretched lengthwise of the table to which was attached long strips of paper. A negro boy had hold of one end of the rope, jerking it to scare away the flies while the crowded guests on both sides of the table ate their sumptuous dinner with flies swarming like bees. Before going to dinner, the guests took a drink of whiskey in their rooms to preserve health.

All contagious and infectious diseases come from filth. Flies and mosquitoes are bred in filth and carry many disease germs. The way to combat them is to destroy their breeding places. I heard a man say 20 years ago that the city of Paris was kept so clean that it had no flies, other vermin to carry diseases. So do rats, cats and dogs carry diseases. The dog is a scavenger, running at large, carrying all kinds of disease germs. The chief source of sickness

comes from filth, bad habits and intemperance. Health comes by temperance alone. Drugs cure nothing. They are only a substitute for temperance. The microscope opens the door for scientific research. Since we know more of the causes of disease, we can better avoid and combat them. That enables our generation to live longer and be happier. Science has superceded superstition in the laws of life. We know more now than all of the generations gone before.

## Questions and Answers

(Our readers can get an answer to The Cleveland Star, Washington Bureau, 1322 New York avenue, N. W., Washington, D. C. Write your name and address on one side of the paper, state your question clearly and enclose 2 cents in stamps for reply postage. Do not write legal medical or religious questions.)

Following Directions.

"No use," growled Mr. Smith to his wife from the bathroom. "I can't do it."

"What is it dear?" asked his wife in alarm.

"Why, the doctor told me this morning to drink hot water an hour before dinner for my indigestion. Here I have got a quart down, am nearly bursting, and I haven't been drinking for fifteen minutes yet."

New At It.

A blithe young lady walked into a bank the other day and addressed the paying-teller. "I want to have this check cashed."

"Yes, madam," replied the teller. "Please endorse it."

"Why, my husband sent it to me. He is away on business."

"Yes, madam, but just endorse it. Sign it on the back, please and your husband will know we paid it to you."

She went to the desk and in a few minutes returned to the window with the check endorsed: "Your loving wife, Mildred."

Nothing goes together more than big talk and alibis.

Q. Does a body weigh more after death than before?  
A. No.

Q. Why does cream rise to the top of a bottle of milk?  
A. Because it is lighter than milk.

Q. Has the "Iron Horse" ever been produced in sou. pictures?  
A. It has been produced only in silent pictures.

Q. What is maraschino?  
A. It is another name for pyrites, a bronze yellow, brittle, iron bisulphid.

Q. How large a navy has Germany?  
A. Six battleships in commission and two in reserve, six cruisers in commission and two in reserve, 28 destroyers and torpedo boats, and miscellaneous ships, such as school ships, mine layers and tenders.

Q. What is the average weight and height of 14-year old boys?  
A. Weight, 94.9 pounds and height 59.3 inches.

Q. How many aircraft carriers are in the United States navy? Are the planes carried on deck and how many are there?  
A. The carriers are Lexington and Saratoga each carrying 70 planes, and the Langley having 30 planes. The planes are brought from below to the flying deck by elevators.

Q. What is the standard rifle of the United States army?  
A. The U. S. Rifle, caliber .30 (1903). It holds five cartridges.

Q. When was the U. S. S. Arizona launched?  
A. It was launched June 19, 1915, and put into commission October 17, 1916.

Q. What does "toujours" mean?  
A. It is French for always.

Q. Can an Allen who has never taken out his first naturalization papers join the United States army?  
A. No.

Q. What is the plural of fish?  
A. Either fish or fishes.

Q. What is Eddie Cantor's real name?  
A. Izzy Isakovitch.

Q. Was the motion picture "Street Scene," taken from a book?  
A. It was adapted from Elmer Rice's play of the same name, that won the Pulitzer prize.

Q. Name the 21 members of the Pan-American Union?  
A. United States of America; Mexico; Argentina; Brazil; Chile; Peru; Bolivia; Ecuador; Colombia; Venezuela; Paraguay; Uruguay; Nicaragua; Costa Rica; Guatemala; Honduras; El Salvador; Panama; Cuba; Haiti; and Dominican Republic.

Recognition in this field affords access to the extensive lineage files of the National Clearing House for Genealogical information, as well as professional contact with genealogists in 1,331 countries throughout the United States and in 16 foreign countries, which will enable her to extend the scope of her work very materially.

Convictions are merely opinions tempered by the heat of conflict. Americanism: Encouraging violation of laws that don't please you, winning for somebody to stop this awful lawlessness.

Q. How many distilleries were there in the United States at the close of 1918, and how many gallons of spirits did these produce?  
A. There were 238 distilleries, with an annual production of 178,833,799 gallons of distilled spirits.
