Noted Crooner Says He Will Study Law

Boston, July 28—Rudy Vallee is preparing for the time when his crooning days are ended—he's enrolled as a student at the Suffolk law school.

He is a sort of "out-patient" who does most of his work by himself, stopping in at lectures when stage and radio engagements permit.

Rudy says he's really serious about this business of learning the law, which is what he wants most to engage in when his crooning days end.

MELLOWED 80 MILLION YEARS

While brutes were hatched from eggs in OKLAHOMA

THEY were born, they lived and they died—these strange brutes. And yet the span of time from the first to the last of them covers only a small part of the history of the Cambro-Ordovician oil pool in Oklahoma—a history which includes millions of years of mellowing and filtering.

Sinclair). To eliminate non-lubricating petroleum jelly, Sinclair chills the oil down to as low as 60° F. below zero. At this low point the petroleum jelly congeals and is removed by separating machinery.

Cambro-Ordovician crude, piped from the oil fields to the great Sinclair refineries, and carefully blended after the refining process, becomes the Sinclair Opaline Motor Oil of today—a product averaging 80 million years of filtering and mellowing. An important part of this refining process includes de-waxing (carried on by most refiners) and removing the petroleum jelly (carried on by few except

Have the nearest Sinclair dealer change your oil to Sinclair Opaline according to the Sinclair Law of Lubrication Index. Notice how quietly your engine runs. Then, at the next draining period examine the used Opaline. Observe how it still holds its rich lubricating body—how little oil has been used up!

REMEMBER: Sinclair offers you your choice—Sinclair Opaline, made from the oldest Mid-continent crudes, or Sinclair Pennsylvania, made from the crudest Pennsylvania grade crude.
