## Family Of Johnson Gives Memorial For Son Killed In Auto

Was With Two Cleveland County Friends, Medical Building At Wake Forest.

The following news item will be of especial interest here due to the fact that the late Dr. Wm. A. Johnson was well known by many Wake Forest men in this section, and at the time of the accident in which he was killed was accompanied by two local friends, Dr. D. F. Moore, of Shelby and Dr. Dwight Bridges, of Lattimore.

Wake Forest, Nov. 7.—A new \$60,000 medical building has been donated Wake Forest college by the family of the late Dr. William Amos Johnson, according to announcement by trustees of the Johnson Memorial Trust fund who are Dr. J. Clyde Turner, of Greensboro; J. H. Johnson, of Raleigh, and President Thurman D. Kitchin, of Wake Forest.

The structure will be named the William Amos Johnson Medical Building as a memorial to the brilliant and beloved young professor of anatomy here in 1926-27 who was killed in an automobile accident on Thanksgiving day of 1927 when he was returning from Asheville where he had attended the Wake Forest football team in their contest with Presbyterian college. Dr. Johnson himself in his student days was one of the original Demon Deacons.

Construction of the new building will begin next week, and it will be ready for occupancy in the spring, William H. Dietrick, Raleigh architect, stated. Dietrick was in college here with Dr. Johnson. Contract was awarded to Geo. W. Kane, of Durham.

Rounding out the horse-shoe of buildings, this structure will be located on the north side of the campus with one face toward Faculty avenue and the other toward the church. It will be 60 feet by 170 feet, two and one-half stories high, modern in every detail, and made of fireproof materials.

The present medical building will be used to relieve the congestion in the academic school.

Will Seek Probe Of Coercion Of Voters  
Chicago.—Congressman A. J. Sabbath, Democrat of Illinois, said in a statement he would seek at the next congress an investigation "to find out the identity of those behind the attempted coercion of the American working man" to vote the Republican ticket.

"The Republican national committee is defiantly disobeying the federal election laws by engaging in this last minute propaganda," the statement said.  
"The laws are aimed to protect the workers against just this kind of thing that the Republican committee is doing. I will ask for an investigation and insist upon the prosecution of employers who are parties to this scheme as well as of the members of the Republican national committee responsible for it."

## Reynolds Heard By 3 Thousand At Forest City

Ashevillite Man Given Great Ovation By Voters Of Rutherford County.

Forest City, Nov. 7.—His remarks frequently interrupted by the applause of between 3,000 and 5,000 people, Robert R. (Bob) Reynolds, of Asheville, Democratic nominee to the United States Senate closed the Democratic campaign in Rutherford county Friday night with a blanket condemnation of Republican policies, practices and promises.

Mr. Reynolds spoke at Cool Springs high school. One of the largest crowds ever to attend a rally in this county attended and gave him a wild ovation as he entered the school house before he began his address.

Mr. Reynolds urged all voters "who want honesty, justice and a square deal, to vote for Governor Franklin D. Roosevelt for president of these United States."

"Republican misrule by Hoover and others of their leaders is responsible for this depression," he declared. He condemned tax refunds and rebates by the present administration.

## Weighed In The Balance of Deflation, The HOME Has Proved To Be The MOST STABLE Value In The World

TODAY, as never before, people are realizing that the best security on earth is the earth itself—that the dollar invested in one's own home is the safest and most valuable dollar in the world.

All investments have been deflated in value during the last three years—real estate included. But do you know that the deflation in the value of real estate is less than one-third that of average stocks and 30 per cent less than the deflation of average bonds?

And this includes all real estate. The deflation in the value of homes is far less than that of real estate in general. And that deflation is strictly temporary. Just as soon as people get their jobs back—and they are beginning to do so right now—the vacant houses you hear so much about will be occupied again. When that happens, the price of homes will rise, and we shall again know beyond all possible doubt that the safest and most valuable dollar we ever spent was the dollar we invested in that little spot of earth called "Home."
