Amount Of Loans Reach \$102,506

Cherryville Production Credit Association Makes This Amount In Three Counties.

COLUMBIA, June 18.—Farmers of Lincoln, Gaston and Cleveland counties borrowed a total of \$102,506 from Jan. 1 to June 1 through the Cherryville Production Credit Association, according to figures released by the Farm Credit Administration of Columbia. The loans were made to a total of 490 farmers, the average loan being \$209.20.

In the four states served by the Farm Credit Administration of Columbia, North Carolina, South Carolina, Georgia and Florida, over \$7,000,000 was borrowed by 28,120 farmers. An additional \$450,000 is being advanced to farmers who are obtaining their loans in a series of installments during the season.

The spring seasonal demand for crop production loans has now passed its peak and a larger proportion of the farmers borrowing from the associations are obtaining loans for general agricultural purposes, such as for purchasing work-stock, equipment and machinery, and for financing repairs and improvements. This trend towards general purpose loans is reflected in the gradual increase in the size of the average loan.

Farmers borrowing from these newly organized, short-loan credit institutions partially owned and operated by the borrowers, are effecting a considerable saving on interest charges, which are now at the rate of 5 per cent a year, charged maturity of the loan. Thus, a farmer borrowing \$500 for a year would pay \$25 interest on a loan for 12 months, while a farmer borrowing the same amount for six months would pay only \$12.50 interest, or if the loan was for three months, \$6.25.

RALEIGH, June 16.—Mrs. Franklin D. Roosevelt, wife of the social minded President of the United States, is disturbed and distressed that the teachers of North Carolina are paid such low salaries and fully expressed her feelings in that respect on the occasion of her recent visit to Raleigh.

"We should see what the government does with the money we pay in taxes" We should see that this money is spent as we want it spent. Much of our difficulties come from not being interested in how the tax money is spent.

"If we watch these expenditures, she said, 'we will pay better salaries to our teachers, and we should pay them better. I do not understand why we pay such meagre salaries to those we entrust with the responsibility of teaching our children. Many people don't seem to know that the most important thing in the school is the teacher.' Mrs. Roosevelt said that she had witnessed young teachers, just out of school themselves, without prop-
