## Home Demonstration Club Notes

Edited by Frances McGregor,  
County Home Demonstration  
Agent.

### Agent Visits Hollis.

It was my pleasure to be asked to judge at the Hollis Community Fair. The products were of very good quality and the exhibitors had put forth every effort to show that the community is striving to bring products to a good standard.

The children's exhibits were very interesting. Home made toys, posters, pottery, wood-carving and hand craft shows that their school is a child-centered one.

Mr. Price had on display some of his beautiful flowers. Again he only contributed to the display asking for no premiums. You remember those baskets of flowers he brought to our county fair, which added beauty and quality to the display. His flowers attracted much attention, and in many of the observer's eyes, who didn't understand that Mr. Price was not entering his flowers for premiums, the judges were thought to be inefficient. We want to express our appreciation to Mr. Price for his interest in our fair. He deserves a blue ribbon.

### Rug Making.

For a good many years now the trend in attractive home furnishing has been simplicity itself, regardless of the size of the pocketbook.

Probably one of the most outstanding examples of this "beauty of simplicity" is modern floor covering. With the popularity of beautiful floors, quite naturally comes the desire to allow these floors to be seen to their best advantage.

Hand-made rugs, which formerly were found only in the bathroom and bedroom, now invade the living room, dining-room, in fact every room in the house. And in each instance hand-made rugs have an individuality too, which sets them quite apart from machine-made rugs.

The cost of hand labor naturally makes rugs of this type expensive to buy, but when made at home the work becomes fascinating and easily within reach of every one. Best of all everybody can make them.

You can get something for nothing! Dump out your scrap bag and start making a braided rug. Braided rugs used to be seen in grandmother's kitchens and on back porches. Now they have earned their place in the sun and rightly so. If carefully sewed, they always lie flat, wear endlessly, wash easily and can be made at practically no cost. You can make them in colors to match rooms, but the ideal braided rug comes out of the scrap bag. Practically hit or miss materials, but with colors carefully chosen.

Beautiful hooked rugs are easy and economical to make. Here is an opportunity of expressing one's personality in her work.

The first requisite in making hooked rugs is a frame. This frame can be easily constructed by anyone. Nail together four light strips of wood and buy a box of thumb tacks to hold material in place. Ready made frames may be purchased from Sears and Roebuck or any mail order house.

The foundation or base of hooked rugs is burlap—just any ordinary burlap sack may be used. Place a stenciled, drawn or sketched, design on this burlap having the burlap several inches wider than the design. Burlap with a pattern already printed in colors may be used.

The hooked rug needle may be secured from mail order houses, or from local stores. The Art Shoppe has a very successful needle. The needles are of four different types: the old fashioned hook, the needle for short length thread and two designs for longer length thread.

Materials suitable for making these rugs varies in price from expensive wool yarns to the waste from hosiery mills—"called" noddles." The latter when dyed in attractive shades makes rugs that are beautiful and very economical. Some of your local mills manufacture a tuft yarn that is very attractive for rug making.

The crocheted rugs are also very attractive and can be used to beautify your homes. Select a color scheme. Use a wooden crochet needle. Form a loop and crochet around the loop forming a circle in single chochet. Using this base crochet continuously around the circle in single chochet, widening as necessary to keep rug flat.

To make an oval rug start with a chain of from 8-20 stitches and crochet back one side and then on the other, continuing around and widening as necessary.

## Masonic Degree Team To Work Wednesday

The Union Masonic degree team will meet with the Camp Call lodge on Wednesday night, Oct. 10th when the Master's degree will be conferred. Members of all Masonic lodges in the county are invited to attend.

## Shoffner Urges Farmers To Sow Wheat For Home

County Agent Gives Some Hints  
About Seed, Fertilizer, And  
Planting Time.

By R. W. SHOFFNER  
County Farm Agent

The time is drawing near when we will be considering planting wheat and other small grain. There are a few suggestions that I would like to make in regard to sowing of small grain.

First, everyone who has the ground and can sow wheat this fall—and other small grain if needed—should sow enough for home use.

Second, before sowing wheat, prepare the soil thoroughly and be ready to sow the wheat. Before the seed are sown, the soil should be thoroughly pulverized. If the soil can be put in shape without breaking with a turning plow, it will be much better to do so rather than turn land deep and sow wheat immediately. A disk harrow is fine to put land in shape for wheat.

Third, this seed is very important. I would recommend the securing enough of good wheat seed planted at a place where you can get seed for future year's planting. All wheat seed should be treated before sowing. Copper Carbonate dust is the most effective and most practical to use on wheat. You should use two ounces per bushel.

Fourth, wheat should have some fertilizer to give it a start in the fall. 200 pounds of 18 percent acid phosphate and 25 pounds of murate of potash per acre make a good mixture for fall sowing; and in the spring, use about 75 pounds per acre of quick-acting nitrate.

Fifth, seed should be sown before so late in the fall. The best time for sowing in this county on the average is from the 15th of October to the last of October; and early sown oats have always proven to be the best.

## Money Circulation Increases Rapidly

WASHINGTON, Oct. 9.—An increase of \$134,000,000 in money in circulation was revealed by treasury and federal reserve figures for the two months since the administration announced its new silver policy.

The figure attracted interest because of a continuing argument over the amount of inflation involved in the administration's nationalization and purchases of silver.

Included in the total—a net figure representing money actually in the pockets of the public or the vaults of commercial banks—was a jump of \$77,351,000 in outstanding federal reserve notes and federal reserve bank notes.

## No Trace Found Of Iredell Thugs

STATESVILLE, Oct. 9.—Authorities today had found no trace of yeggmen who entered the Fraley Brothers grocery here Saturday night and robbed the safe of \$100 in cash.

The yeggmen drove three holes into the three-ton safe, broke the combination lock and rifled the safe of all cash. A number of checks were not bothered.

## Davis Will Get A Preliminary Hearing Oct. 22

STATESVILLE, Oct. 9.—Ralph Davis, Davidson county outlaw, now confined in the state prison in Raleigh, will be given a preliminary hearing in Statesville, Monday, October 22, on a charge of murder and other violations of the law in Iredell county, according to a statement by Solicitor Zeb Vance Long at Statesville.

Mr. Long states that he is preparing warrants charging Ralph Davis with first degree murder in connection with the fatal shooting of Sheriff G. C. Kimball, of Iredell county on the 17th day of August, 1934; also charging Davis for holding up and robbing Mayor E. R. Rankin, of Statesville, of his automobile on the night of August 10, 1934, and other crimes.

## Managed Currency Not A New Thing

So Says Dr. E. Bernstein, Of State  
College In Recent  
Lecture.

CHAPEL HILL, Oct. 9.—"Economists and business men who oppose a managed currency and advocate reliance on an automatic gold standard in the interest of historical continuity have misread monetary history," according to Dr. E. Bernstein, of State College who spoke at the first of a series of weekly economic seminars at the University of North Carolina.

"Managed money antedates the gold standard," he said. "Moreover, the gold standard as it has been employed in the past by leading European nations and the United States has not been purely automatic. The use of bank credit and government currency along with metallic money has introduced an element of management substantial in degree and reasonably successful in execution," he continued.

## Catawba Teachers Get High Ranking

HICKORY, Oct. 9.—Scholarship standards of white teachers in Catawba county are higher than for any of the surrounding counties, according to figures made public by the state department of public instruction at Raleigh.

Catawba county teachers at work last year had spent an average of 3.61 years in college before they began to teach. It was shown, while figures for the adjoining counties on the same basis were as follows: Alexander 3.10 years; Burke 3.42; Caldwell, 3.30; Cleveland, 3.14; Iredell, 3.17; and Lincoln, 3.20.

## Motorcycling Dog Is Mother Of Five

BOILING SPRINGS, Oct. 9.—Tom Paxton, owner of the motorcycling dog Sadie, will now have to get a trailer for his Harley-Davidson—or that is, if he takes the family along for Sadie celebrated the blessed-happening Sunday. There were five of the new arrivals, but one went over the way, leaving four and Sadie to ride on the roaring and careening bike.

## State Highway Commission Is Speeding Survey

Locating Engineer Looks Over  
Blowing Rock Section Of  
Scenic Road.

BLOWING ROCK, Oct. 8.—R. Getty Browning, locating engineer for the North Carolina state highway commission, was here Saturday in the interest of speeding up the preliminary survey on the national parkway from the Virginia state line to Blowing Rock in order that work may begin as soon as possible. He reported that his men at work between Low Gap and Sparta are progressing rapidly with preliminary location of the scenic highway.

Mr. Browning met other members of his department here, and they will be engaged for several days in walking over the ground between here and Sparta to obtain data preceding the survey.

When asked whether or not he thought the highway would pass through the town of Blowing Rock or be located to the north, passing around the north side of Flat Top Knob, Mr. Browning said that he could not say until the preliminary survey is complete. He did say however, that regardless of whether or not the parkway passes within the city limits of Blowing Rock, it will be the greatest asset this resort has ever had. He believes that tourists traveling the parkway will desire to see all points of interest, although some of them may be located some distance off the main route.

## Would Eliminate System Of Profit

LEXINGTON, Oct. 9.—The North Carolina Unemployed League, of which W. E. Pressgood, of High Point is president, has incorporated in its program a statement which has forwarded to the state and local emergency relief authorities of North Carolina. Frank Killian, of South Lexington, is vice chairman of the local chapter, with T. L. Johnson, Thomason Street, secretary, and Julius Shoemaker, 245 West Fifth street, member of the state executive committee. Several meetings of the Unemployed League have been held in the courthouse here.

The League has for its fundamental purpose the abolition of the profit system.

## Mrs. Henry Thomas Was Buried Monday

Gaffney Ledger.  
Mrs. Jeanett Thomas, 31, wife of Henry F. Thomas, died Saturday at a hospital in Columbia after an illness of about five months.

Funeral services were conducted at 2 o'clock yesterday afternoon at noon at the home of Mrs. A. P. Thomas on Birch street. The Rev. C. A. Kirby, pastor of the Cherokee Avenue Baptist church, officiated. Interment followed in Oakland cemetery.

How far back in antiquity medicine men began using a mortar and pestle to pound pill ingredients is not known.
