Motorcycle Races To Be Held Here

Open competitive motorcycle races are on the program of the 15 events to be presented by B. Ward Beam's International Congress of Daredevils at the Cleveland County Fair, Shelby, Thursday afternoon only, October 2.

There will be four races staged by Mr. Beam, in which the world's crack riders have already filed entry blanks, among them being Charles Cobb, Leon Skinner, Ray Jones, Fred Provinand Jack Mulvihill. Many others have signified their intention to compete. The competition will be open to all motors up to 74 cubic inches displacement.

In an interview yesterday, Mr. Beam said: "When we tell you more people will attend motorcycle races in the United States in the year of 1935 than those attending auto races during the same period, you might think we are stretching the statement considerably, but, nevertheless, it is a fact that motorcycle racing in the past few years has taken this country by storm. Dozens of new dirt tracks are being built throughout the country; one syndicate after another is fighting for franchises in the large cities, and most every day sees the opening of another new track in some part of the country."

Plan AAA Hearing In Memphis, Tenn.

WASHINGTON, Sept. 30.—The AAA has announced a hearing for Memphis, Tenn., on October 11 on the need for continuance of an adjustment program for cotton similar to the public hearing on a cotton-high program which concluded here today, with farmers praising the operations of the AAA to date and insisting upon a continuance of the program, and meat packers vigorously opposing it. At the same time AAA officials said that a continuance of the flue-cured tobacco program had already passed beyond the hearing stage before the passage of the new act requiring such hearings.

A referendum was conducted in June which resulted in an almost unanimous vote for continuance of the program and four-year contracts beginning in 1936 have already been offered growers. Information available here is to the effect that the sign-up of growers will be well over 90 per cent throughout the belt.

Gray Will Direct Permanent Work Among Forests

RALEIGH, Sept. 30.—Forestry project development aims chiefly to demonstrate to private land owners in North Carolina the value of the farm forest as a permanent development, it is stated by James M. Gray, regional director of the Resettlement Administration's Land Utilization Division. Definite announcements on plans for forestry projects in the state will be made soon and it is hoped that private land owners will watch closely their development and be able to develop their own lands along similar lines, Mr. Gray said. The Resettlement Administration will carry out the projects in close cooperation with forestry divisions and departments of colleges.

Land classed as unsuitable for agricultural purposes will be used in the forestry projects, which will be scattered over the state so as to be available to farmers with wooded areas throughout the state. Areas not used completely will be used for recreational, grazing and wild life sanctuary purposes, Mr. Gray said. When the approximate locations have been decided upon, land owners within the project area will be notified of the possibility of selling their lands to the government, based on an expert appraisal of each tract. Some necessary assistance will be given families seeking satisfactory homes elsewhere, after they have sold their holdings to the government, said Mr. Gray.

Indicative of the renewed interest in hog raising by North Carolina farmers is the fact that two feeding demonstrations with 126 pigs have been started in Halifax county.

Haile Selassie's Fine Wild Lions Felled By Machine Gun Bullets

Rockies Storm Maroons Three In Snow Blanket

(By Associated Press)
DENVER, Colo., Sept. 30.—Swiftly falling snow—the season's first extensive squall in the northern Rockies—marooned three persons atop Pike's Peak and trapped livestock unprotected on summer ranges. Snow fell until mid-morning in many parts of Colorado and Wyoming. It slowed up the search for a missing airplane near Sheridan, Wyo., where two men and a woman were found burned to death in their wrecked ship.

Caught atop towering Pike's Peak when the sudden storm drifted across the winding mountain highway, a woman and two men employed at Summit House, asked Colorado Springs to send a trail-breaking truck to them. A palace sentry thought one of the lions was a dog and struck it with a stick. With one blow of his paw, the lion killed the man, striking him in the stomach. Soldiers began a hunt with torchlights and the animals were killed finally when Colonel Mekouris, commander of the imperial guard, opened fire with a machine gun. One of the lions was found on top of the dead sentry. During the uproar, one soldier shot another mistaking him in the darkness for a lion.

Twenty-five Duplin county farmers have cooperated to purchase over 400 bushels of rye, clover, vetch and Austrian winter pea seed for fall planting.

ADDIS ABABA, Sept. 30.—Machine gun fire brought down five pet lions of Emperor, Haile Selassie, "Conquering Lion of Judah" Wednesday after they escaped their cages and killed a sentry and injured five others, two seriously. The wild beasts made a rush for freedom in the early hours of the morning. Apparently the lion keeper let the cage door remain open. When they escaped, the beasts killed and ate several of the emperor's pedigreed Australian sheep and also s'ew two horses. Their roars and screams of pain from the animals aroused the entire neighborhood of the palace.
