Anti-Alcoholism Is Being Taught School Children

RALEIGH, Oct. 23.—"Alcoholism and Narcotism," a two-page mimeograph bulletin is being sent out this week to all superintendents for distribution to principals of all schools in the state, State Supt. Clyde A. Erwin announces. "The purpose of this bulletin is to call to the attention of all school officials the law with reference to the instruction of alcoholism and narcotism required to be given in the public schools, and to point out what treatment the subject must be given in order not only to comply with the law but also to give really some adequate attention to this important part of our course in health instruction," Mr. Erwin said. "As this bulletin points out, some attention is given to the subject in both the state-adopted basal texts and in the supplementary texts recommended for use in the public schools of the state. It was felt by the last general assembly, however, that this was not adequate, and so authority was given the Textbook Commission and the State Board of Education to adopt textbooks covering this subject, or a next text on 'Health' which would give more adequate treatment on the subject of alcoholism and narcotism. This bulletin is an attempt to meet the requirements of the law until the Textbook Commission can find the proper material which may be adopted for this purpose," Mr. Erwin said.
