## **Style For Brides Display Variety** As June Is Near

By ADELAIDE KERR NEW YORK ,- June brides will march to flower-decked altara in a variety of wedding ranging from dramatic to Weddings in cathedrals. churches and gardens are all provided for by the gowns which have been created for hundreds of Amer. ican brides.

For some of their most striking creations, designers go back to the 'saintly sixties" and Godey's "Lady Book." Orandmother's house dress with its close-fitting seamed bodice and gorged skirt buttoning straight down the front inspired one bridal gown of shimmering pearl white satin designed by Leonora Ormsby Another of white chiffon has the high Quaker collar and muttonleg sleeves of the "gay nineties" and a third of ivory taffeta is finished with a demure pilgrim collar and lilies and leaves.

Dramatic bridal gowns also an bear in spring's wedding pageant There are white nets whose skirts and trains are splashed with calla lilie sand leaves.

Trains generally are shorter than last year and most are embodied in the skirt itself, which is designed with narrow gores so that it spreads out like a great petal.

For the bride whose wedding will be in the house or garden, and who wishes to wear her gown for occasions afterward, there are crisp taffeta or lace costumes that combine full-skirted evening gown with a little fitted jacket having a long train attached to the back.

STEEL MAKERS say-"Ford buys the best steel." Other suppliers of materials and parts will tell you-"Nobody checks up as closely on quality and price as Ford."

This means a great deal to you as a motorist. It is our way of safeguarding the interests of every purchaser and it leads to this-"The mechanical depreciation on a Ford is less than most cars, especially after the first year."

This is one sign of the extra value in the Ford V-8. Accuracy in manufacturing is another. (The Ford is made to unusually close precision limits.) And there is a long list of fine-car features that are exclusive with Ford in the popular field.

Have you a V-8 engine in your car? You pay \$1645 for it in any other car but Ford. Does your car have Center-Poise Riding? Ford gives you this modern feature-"a front-seat ride for back-seat passengers."

Does your car have fool-proof Super-Safety Mechanical Brakes? The Ford V-8 gives you this proved design, with 186 square inches of braking surface.

Does your car have a genuine steel body structure? Does it have Safety Glass all around? Ford is the only low-price car that gives you this extra protection without extra cost.

You get these fine-car features in the Ford V-8 because of Ford manufacturing methods and low-profit policy.

\$25 A MONTH, after usual down-payment, buys any model of the new Ford V-8 car-from any Ford dealer-anywhere in the United States. Ask about the new UCC 1/2% per month Finance Plans.
