### SUBSCRIPTION PRICE

By Mail, per year \$2.50  
By Carrier, per year \$3.00

Entered as second class matter January 1, 1905, at the post-office at Shelby, North Carolina, under the Act of Congress, March 3, 1879.

We wish to call your attention to the fact that it is and has been our custom to charge five cents per line for resolutions of respect, cards of thanks and obituary notices, after one death notice has been published. This will be strictly adhered to.

### MEMBER ASSOCIATED PRESS

The Associated Press is exclusively entitled to the use for republication of all news dispatches credited to it or not otherwise credited in this paper and also the local news published herein.

FRIDAY, MAY 29, 1936

We are told that 957 Americans were winners in the Irish sweepstakes. It is not reported how many lost.

"It can be done, I'll promise anything" is the professor's platform.

Roger Babson predicts another war in 1950. Hope we'll live to see how much of a prophet he is.

Representative Zioncheck thinks what this country needs is good vaudeville, so he puts on the show himself.

Hoey's banner withstands the elements. His principles of government will endure because they are sound.

Abe Lincoln said you can't fool the people all the time. Dr. McDonald had 'em fooled two months ago, but North Carolina citizens, true to form, think a second thought.

### MISTRESS OF THE SEA

The Queen Mary, mistress of the sea is docking in New York and what a thrill it would be to see the great mistress of this sea that carries 5,000 people from Southampton, England, to New York in the short space of four days.

English capital and English genius produced the Queen Mary, the like of which has never been built before. The giant passenger liner is over one thousand feet long, has a carrying capacity of 80,773 tons, a speed that is faster than the French liner Normandie, launched last year. And it costs \$25,000,000.

England is still in the throes of the war's aftermath, but she remains a maritime nation. Germany has undergone a revolution since she was worsted in the World War, yet she is now operating the Graf Hindenburg, the first air liner to make scheduled trans-Atlantic trips.

America may boast of her wealth, her broad use of scientific discoveries, but it was left to England to build the largest and most luxurious ocean liner and to Germany to inaugurate the first air liner. We excel in many things, but these foreign countries rank first in speedy and economical trans-ocean travel.

### UNTRAINED WORKERS

Figures compiled by the Works Progress Administration show conclusively the need for trained workers. A study of occupations of the 6,385,740 persons on relief rolls indicate that most of them are there because they are not trained to do any particular kind of work.

Any employer of labor will testify that one of the greatest problems he faces is to secure men and women with training and aptitude for the particular kind of work at hand. Consequently most of the employees receive training through an apprenticeship. There are those who refuse to undergo this sacrificial period.

The recent passage of the George-Ellis act by Congress makes available more money for vocational schools. Under this act, North Carolina is to receive \$451,896 or nearly four times as much as it now receives from the Federal government.

In Cleveland county our vocational training offered in high schools is confined to agriculture, home economics and typing. The time will come when the fundamentals in salesmanship, carpentry, textiles and the like will be included in order to give youth an opportunity to discover the work for which they are best suited and which offers an opportunity for advancement.

Our schools will never be able to offer courses that will fully take the place of an apprenticeship, but they can aid youngsters in discovering themselves and their life's work.

The government's appropriation this week means more than we realize in aiding the youth of today to be equipped to shoulder the responsibilities of tomorrow.

### A SURPRISE IN STORE

From reports of increase in registration of voters throughout North Carolina, it appears that 500,000 will exercise the right of franchise in the June 6th primary. Calculations had been made on a vote of 400,000 until the poll books closed.

A new peak will therefore be reached in voting in North Carolina. This is due to the interest of the citizens generally in the election outcome, the keenest concern being in the governor's race. In fact the race for Governor has so overshadowed the lesser state and county contests, that people are not giving proper attention to selection for these officers. This interest in the Governor's race has been largely created by the newspaper poll and by issues as presented on the one

hand by an outstanding leader and on the other by a new comer who seems to have lulled a great group of our citizens into a hypnotic state by sweet promises of a million; more spending and less taxes.

A surprise is in store. The people have taken second thought. They have looked deeper and studied harder and are now turning from hocum to Hoey, a man who does not profess to do the impossible, who says he wouldn't deceive the people for his right arm or for the Governor's seat. The newspaper poll may have reflected the trend several weeks ago when the hypnotic influence was on, but things are different now. Hoey will surprise the State in his strength. Unquestionably he will have a strong lead over his nearest opponent and it is entirely possible that he may receive the nomination in the first primary.

### CONCEALED TAXES

On Monday of next week the Federal Treasury will float, or undertake to sell, an offering of \$2,050,000,000 issue of government securities, increasing the public debt to approximately thirty two and a half billion dollars. Just now the members of Congress are debating a measure on how to raise taxes to meet our increased obligations.

The never ending tax problem is also under debate in the North Carolina campaign and in every other state in the union for that matter.

There is no denying the fact that the people must pay, whether it be through taxes levied directly or indirectly on the great masses, the principle being based on one's ability to pay. Every individual, every corporation that pays a tax is complaining and squirming under the tax load. Direct taxes make the office holder's life miserable. He is held responsible and the voters train their ballot guns on him who would support a tax that is paid directly into the collector's coffers.

Political expediency calls for indirect levies that are hidden in the merchandise we buy, the food we eat, the shelter we build, the pleasures we enjoy.

Some day this great national debt will have to be met. If it is spread openly upon the backs of the masses they will be inclined to turn from idolizing President Roosevelt to crucifying him.

We might as well make up our minds that the debt of this state, the second largest of any state in the Union, and that the 33 billion debt of this nation must be paid by this and coming generations. The masses can't escape their share. The method of a levying and collecting might only be wrapped in a capsule to kill the bad taste.

## Nobody's Business

By GEE MCGEE

**Mike Clark Has Been Selected To Serve On The Jury**  
dear Mr. editor:—  
yore corry spondent, Mr. Mike Clark, rfd, has been chose to serve on the petty jury at the county seat next week, and he will call around every day to set and talk with you, and he mought be prevailed upon to stay at yore house enduring his services in the court.

If you will kindly use yore influence to get the undersigned to be named by the judge on the bench as foreman of all cases that mought come up for trial ansoforth, he will greatly appreciate the favor, as it will help me in my race for kurriner of our local county this coming summer.

I have had a right smart of experience in court work and understand all civil and criminal laws, also legal statuses on nearly ever subject, such as—nullum in omnia, e pluribus unum, count of monny cristo, and habes corpus. I have served as witness on a large number of important cases, and was the star witness in the Jones vs. Smith dog lawsuit which the defendant shot for sucking his eggs ansoforth. He came clear.

It speaks very high for flat rock to have a juryman set in the court house, very few have ever been chose from our local precinct to represent our town on this honorable body, and a big supper will be tendered the undersigned juryman next saturday night to show their appreciation of his standing as a citizen ansoforth.

He wants to set on the brown vs. green case, as he has everence of his own to prove that green turned his cow into the pastor of brown malleis-forethought, and it did not butt down the rail fence and intrude of her own free will and accord against the peace and dignity of the prosey-cutor, vizly: brown, and that the allegation that he struck the first lick is false and untrue, and he, being a secont cuzzin of the undersigned, knows him to be a truthful genterman.

as soon as I land in the city, I will write or foam you a note so's you can have yore old lady put my name in her pot for dinner, that is — if you see fit to invite me to yore hospitable home, you all must come down to see us some tife this summer and spend a few days with us, our watter millions will be in about august, look for me monday and be sure to see the judge in my behalf.

yoras trulle,  
Mike Clark, rfd,  
Juryman.

**Social Activities In Flat Rock**  
a right smart of vissinging has been going on in flat rock enduring the week just gone by. onner count of the dry spell, it seems that folks are going hither and thither, hoping to run upon some green vegetables, but most of them got only canned goods to eat in our vicinity.

spurge Johnson spent the weekend with his married darter who run off and married our local fruit tree agent in 1930, he would not speak to her or him until he got fired from the relief rolls, and now he thinks very well of the hokins gennerr-ration. He mought come back for the summer with a little encouragement.

a campane has been set on foot by miss Jennie veeve smith of this city to raise funds for a new rug for the pulpit of reboher church, the old rug is wore thru where bro, will wait, the pasture, stands and delivers his sermons. If he would move about to some extent while preaching, a rug would last much longer. she hopes to raise \$4 all told.

the toom-rock for Jim smyth arrived last week, but could not be set up onner count of they had his name spelt wrong, and had his wife's age on it at the time of his death instead of his'n, and it seems that it will have to be engraved off, his wife is not dead and she do not want her age printed on another feller's toom-stone ansoforth.

a man from up north is planning on locating near flat rock for the purpose of raising and selling bull frog legs. he has a frogery in his home county, but it is too cold for the mup there, and he wishes to have 2 places of bizness; one to grow winter frogs and the other to grow summer frogs. he is selling some stock in his enterprise.

all crops are very late, many of them have not started onner count of no rain up to this riting, for a while, it looked like the government would have to take over all of the farms, as the seeds laid in the ground so long without coming forwards, we are all hoping for the best, some praying for rain and government relief has been going on.

Mount Lassen, California, is the only active volcano in the United States.

California pecks more sardines than all other varieties of fish combined.

## Washington Daybook

By PRESTON GROVER  
(Associated Press Staff Writer)

WASHINGTON—Trade followers see in the new tariff against Japanese cotton goods a means of delivering to New England millers a cargo of business they complained they had lost through the reciprocal treaty with France.

The curb of Japan and the agreement with France, however, was not exactly a case of robbing Peter to pay Paul. The Japanese cloth against which the tariff was directed consisted mainly of "shirtings" used in underwear, handkerchiefs and similar articles. New England millers producing such cotton goods expressed jubilation at the tariff.

It was the lace makers who complained about the French treaty. They protested it lowered sharply the tariff on types of lace which American mills had supplied for 25 years.

Wath Southern Reaction.  
Departmental officials who noted that Japan is the largest foreign purchaser of American raw cotton watched closely for any "kick back" that might disturb southern cotton growers.

Critical political minds sought to interpret the new tariff proclamation as an effort to mollify New England millers who have protested the Administration's cotton price boosting. Southern states, they argued, are rather solidly Democratic anyway.

A Gentleman's Agreement.  
The United States also had a "gentleman's agreement" with Japan about cotton shipments to the Philippines, but there the situation may not be so readily dealt with. Technically this country does not control the Philippines any more.

Japan has a supply of cheap labor that has permitted it to eat hungrily even of the semi-protected cotton trade in the far east. Where the United States once had the lion's share of the \$20,000,000 annual Philippine cotton business, Japan now has the edge.

Recently an agreement was reached with Japan through which the United States would be saved a portion of the Philippine trade. But the growing Japanese shipments there would indicate the Filipino is as content to have his cotton jacket edged with "made in Japan" as with "made in America," if the price is in his favor.

## HOW'S your HEALTH

By Dr. Inge Guldman, Academy of Medicine

**Sex And Tumors.**  
Progress in medicine is like the solution of jigsaw puzzle. An instance is the piecing together of the fragmentary knowledge recently gathered on the functions of the female reproductive and sexual system.

Within the last 10 years the female sexual hormone has been discovered. A hormone is the product of one of the glands of internal secretion. This one has been studied from many angles, and certain discoveries link the hormone not to the cause but to the mystery of tumor growth.

Chemists have established that there is a similarity between the chemical structure of the female sexual hormone and the known cancer-producing agents. The latter are derived from certain crude oils and are employed in the study of experimentally produced cancers.

The female sexual hormone is a substance which normally promotes intensive growth of certain body tissues.

To pursue this study, experimenters have administered enormous doses of the female sexual hormone to experimental animals. They have found that in certain animals this gave rise to certain types of tumors. A race of mice was used in which there is a frequent occurrence of spontaneous tumors in the breasts of the female. The experiments revealed that the administration of large doses of the female sexual hormone induced the development of tumors in the breasts of males, but paradoxically inhibited tumor development in the female. Furthermore, it was shown that large doses of the female sexual hormone also effected abnormal changes in the gland known as the pituitary, located at the base of the brain. This gland also exercises a profound effect on body growth.

The Lancet believes these investigations surely will lead to a better understanding of the origin of tumors, and to a clear view of the therapeutic, or healing, possibilities and limitations of the female sexual hormone.

The original charter of Georgia, adopted in 1733, has been redrafted with important changes nine times.

## Upper Cleveland News Of Week-end

(Special to The Star.)

CASAR, R. I., May 27.—A new brick veneer church at Mt. Zion has been completed and the first service was held in it the third Sunday in May.

Cleora Queen the father of 22 children is in the Shelby hospital with kidney trouble.

### Lion Quintuplets Born In Denmark

COPENHAGEN, May 28.—The city of Odense, famed chiefly as the birthplace of Hans Christian Anderson, Denmark's great story-teller, can now lay new claim to fame for another birth. This time it is quintuplet lion cubs, born to a lioness in the municipal zoo.

The mother was unable to nurse all of her offspring at once so a canine wet-nurse was called into service. She took over two of the cubs in addition to her own puppies. The arrangement proved to be satisfactory to all concerned.

To patch a punctured inner tube without tire cement apply the patch to the punctured place and press it with a flat tool against the hot manifold of the car.

### For Bad Feeling Due to Constipation

Get rid of constipation by taking Black-Draught as soon as you notice that bowel activity has slowed up or you begin to feel sluggish. Thousands prefer Black-Draught for the refreshing relief it has brought them. Mrs. Ray Mullins, of Lafa, Ark. writes: "My husband and I both take Theodor's Black-Draught and find it splendid for constipation, biliousness, and the disagreeable, aching, tired feeling that comes from this condition." With reference to Syrup of Black-Draught, which this mother gives her children, she says: "They like the taste and it gave such good results."

### Construction Awards Reach New Peak

NEW YORK, May 29.—Engineering construction awards this week for commercial buildings totaled \$8,375,000, the highest volume since the week ended April 11, 1935. "Engineering News-Record" reported. In a week shortened by the com-

ing Decoration day holiday construction awards of all classes amounted to \$35,466,000 against \$31,047,000 for the like period last year. Private works accounts for 12,092,000, public work \$22,894,000, federal \$4,701,000 and state and municipal \$18,103,000. Olivia de Havilland is an expert swimmer.

## Why Gulf is the Gas for this Weekend

"GOOD GULFERS" will get the longest drives this week-end. For Gulf Gas is specially refined to suit the weather at this time of year. This is important, for unless your gas is changed with the season, it doesn't burn properly... part of it goes out the exhaust unburned, wasted! Get That Good Gulf—it's "Kept in Step with the Calendar," so that all of it goes to work—none of it goes to waste. Try a tankful and see!

Duke Power customers in Suburban Shelby, Patterson Springs, Earl, Beaver Dam, Polkville, Cleveland Springs, Double Shoals, Stoney Point, Belwood, Toluca, Casar, Rural Cleveland County.

### "ELECTRIC REFRIGERATION PAYS FOR ITSELF"

Says Reddy Kilowatt

and look at the special terms ---  
As Low As \$5 CASH  
And 30 Months to Pay the Balance!

Kelvinator owners will tell you that you can actually save enough by the elimination of food spoilage and waste and by the big savings you make on quantity buying to more than pay for a Kelvinator! This is no idle statement... figures prove it!

You can buy a Kelvinator for less than 12c a day. Isn't that a small amount compared to what it really means to have all the conveniences, health protection and economies of electrical refrigeration!
