CEDAR GROVE AREA NEWS Association Churches To Meet

BY BARBARA T. HEWETT
Cedar Grove Missionary Baptist Church will host the other 14 churches of Ocean View Association at its mid-year session Saturday, Feb. 10, starting at 9:30 a.m.

HEWETT

The church's kitchen committee is busy making plans to serve a delicious hot lunch to attendees. Also, there will be ministry in the word and song, as well as a review of the association's plans for implementing its goals and objectives that were set at the annual session in October.

One of the association's greatest successes in this decade is formation of a 100-voice male choir. The group brought an offering of more than \$8,000 on its first appearance as a donation toward construction of an association office on its 15-acre tract in the Grissetown-Thomasboro area.

A second item of note was that during this decade the association has had two of the youngest ministers in its history, the Rev. Charles Jacobs and the Rev. Ronnie McCrae Jr., as pastor of St. James in Bolivia, Little Macedonia in Supply and Friendship in Southport.

Weekly Scripture

The Scripture for the week comes from Psalms 107, "He sent his word and healed them and delivered them from their destruction. Oh that man would praise the Lord for his goodness and his wonderful works to the children of men. And let them sacrifice the sacrifice of thanksgiving, and declare his works with rejoicing."

INSIGHT INTO EYESIGHT

DR. CHRIS MOSHOURES
OPTOMETRIST

SOMETHING IN THE EYE

For contact wearers, here are a couple of tips on what to do when you get something (that doesn't belong there) in your eye.

With the hard lenses, it is quite possible for a piece of soot or dirt to fall into the eye and become trapped between the lens and the cornea. A good way to get it out is to hold the upper lid firmly against the bone under the eyebrow and blink violently. If the foreign particle still remains, you will have to take the lens out and rinse it off.

With the soft lenses, once they're in place, it is nearly impos-

sible for anything to get between the cornea and the lens. However, it can happen while putting them on. Don't ignore any unusual sensation hoping it will go away. Take the lens out and rinse it as often as necessary until it feels right. A tiny hair or fragment of thread may defy several rinsings before it finally comes off.
