

STATE CAPITAL KEYHOLES

HEAD MEN — Chairmanships of important legislative committees are beginning to attract attention in the Capital City. These posts are particularly significant because of the fact that most legislative work is done in committees and action on the floor is more or less of a cut-and-dried affair. The attitude of a committee chairman has a vital relation to the chances of a bill becoming law. You can't tell who will be who in the House until the speaker is elected but in the Senate it is a different story since Lieutenant Governor A. H. (Sandy) Graham will have the appointments again this year. You might not be far wrong in a guess that Senator U. L. Spence of Moore County, and Senator Harriss Newman, of New Hanover, will head the powerful finance and appropriations committees, respectively, in the upper house. Both have played important parts on these same committees in the lower house and their views are not radically divergent from those of Mr. Graham and the administration.

TEETH—Don't get it into your head that North Carolina dentists are going to quit their efforts to get ethics inscribed on the statute books just because the Supreme Court reversed them on their prosecution of Dr. J. E. Owens, Asheville dentist and close friend of Senator Robert Reynolds. The tooth-drawers are already at work on plans for a bill to be presented to the next Legislature which will make the carelessly inclined of their tribe walk the straight and narrow way or surrender their license. Incidentally they aim to keep the molars of the public in better repair at a saving of money by kicking the unethical out the well-known window.

HAS HELP—If kinship has anything to do with it, Senator Paul Grady will be president pro tem of the next Senate, in the opinion of those who profess to know their politics and genealogy around the ancient and honorable State Capitol. One such gentleman points out that Senator Grady and Robert Grady Johnson, representative from Pender and also candidate for speaker of the House are cousins. This same man makes the seemingly extravagant statement that almost all the Gradys,

Outlaws and Maxwells in this State are kinsmen. If that is half true it gives Mr. Grady a good start over his opponent, Senator Carl L. Bailey, of Washington County. But don't be misled. Mr. Bailey has his following in the Senate where he played an important part in school, tax and game legislation two years ago.

LOOKS SURE—It's no longer any secret that powerful pressure is to be brought upon the General Assembly to divert highway funds into other channels. Newspapers are advocating such action, in some instances. Motorists are now said to be paying half the total State revenues, albeit, many county roads make difficult traveling for farmers. If gasoline and license money is turned into other channels the roads will not improve and automobile taxes will not decrease.

HOLD EVERYTHING—Don't get excited by recently revived publication of the prediction that Tam C. Bowie, representative from Ashe County, will run for the Democratic gubernatorial nomination in 1936. Of course, Mr. Bowie may run but his close personal friends say that he will not oppose Congressman R. L. Doughton if that worthy decides to see the honor and around Raleigh it is a generally accepted fact that the Congressman, also a close personal friend of Mr. Bowie's, is planning to do that little thing. What Mr. Bowie does will depend largely upon what Mr. Doughton decides to do, in the opinion of mutual friends of both these political big-wigs.

WANT THE MONEY—Times being what they are everybody and his brother working for the State of North Carolina is going to ask for increased appropriations from the next General Assembly. And by the same token they stand a much better chance of getting at least part of what they want than they did two years ago. The members of the General Assembly and the State Treasury are all in much better condition and with the cost of living bounding upward the chances are that a somewhat fatter pay check will greet all the State hired help during the coming biennium although the increase may not be enough to buy a house and lot or even a Rolls-Royce.

Three thousand baby chicks have been started for broilers in Catawba County with an equal number to be started in the next two or more succeeding weeks, reports the county agent.

Inorganic Nitrogen Returns Best Yields

Years of experiment with nitrogen fertilizers have shown that better cotton yields can be obtained when most of the nitrogen is derived from inorganic sources, says C. B. Williams, head of the State College agronomy department.

On Cecil clay loam in North Carolina, he says, when a 6-8-4 fertilizer was applied at the rate of 800 pounds to the acre, the best yield was secured with 90 per cent of the nitrogen being derived from sodium nitrate and 10 per cent from cottonseed meal.

Following this closely was the yield obtained by deriving the nitrogen from a mixture of 80 per cent sodium nitrate and 20 per cent cottonseed meal, he says.

When Leunslpeter and cottonseed meal were used, the best results were obtained with a 90-10 ratio of Leunslpeter and cottonseed meal. A 65-35 ratio for ammonium sulphate-cottonseed meal gave the highest yield with this mixture.

These and many other details of results obtained in numerous experiments in North Carolina and other

cotton states have been set forth in a bulletin, "Experiments with Nitrogen Fertilizers on Cotton Soils," recently published by the United States Department of Agriculture as technical bulletin No. 452.

C. B. Williams and Dr. H. B. Mann, the latter an agronomist working with Williams, contributed to the bulletin considerable data obtained from their experiments.

As long as his supply lasts, Williams will mail copies of the bulletin free of charge to North Carolina farmers who apply for it. Other copies may be obtained for five cents apiece from the superintendent of documents in Washington.
