Mr. and Mrs. Alphonso Chappell of Belvidere, and Miss Rebecca Webb motored to Norfolk, Va., Monday to take Mrs. Nearie and children.

Born to Mr. and Mrs. Dewey Yeates on June 4th, a daughter, Mollie Lura. Both mother and baby are doing nicely.

Durwood Leigh Barber, Jr., entertained a few of his young friends on Saturday afternoon from 3:00 to 5:00 o'clock, the occasion being his sixth birthday. Games were played and story telling enjoyed by all. Durwood received many useful gifts. The following guests were served home-made candies by the honoree's mother: Jean Hurdle, Patsy Hurdle, Edna Earle Hurdle, Blanche and Leona Lane, Flora Louise and Marjorie Ward, Irene Owens, Kathleen Mansfield, Cleo Trueblood, Dorothy Faye White, Joan Trueblood, Bettie Lou and Carolyn Trueblood, Anne Proctor, Marie Stanton, Mary Ruth Stallings, Garland Stanton, Jr., Jack Parker, Roy Ward, Irvin White, Jr., Horace Baker, Jr., Joel Hollowell, Jr., Lindsey Earl and Joseph Barber, Mrs. D. R. Trueblood, Mrs. Joel Hollowell, Mrs. Haywood Proctor, Mrs. C. L. Godwin, Mrs. Mollie Barber, Mrs. D. L. Barber, Misses Alice Simpson, Annie and Eliza White and Frankie Barber.

Artie Mae Hollowell, Hertford, Route 3, was very graciously entertained Saturday, June 1st, by her mother, Mrs. E. B. Hollowell, the occasion being the honoree's 10th birthday. After games were played and enjoyed by all, a beautiful birthday cake with 10 candles was cut and served with ice cream. The guest of honor received many pretty gifts. Those present included: Olla Bogue, Margaret and Evelyn Whedbee, D. J. White, Mary Burgess Layden, Reba Madre, Onella Pierce, Thomas Franklin, Willie J. and Clifton Hollowell, Kader Franklin, Sallie Hollowell, Cecil and Elizabeth Elliott, Maxine Harrell, Blanche and Maude Cartwright, Novella Harrell, Carolyn and Livingstone White, Sidney Copeland, Earline Jernigan, Lois Faye Benton, Marjory Whedbee, Doria Miller, Joel Hollowell, Jr., Anne and Artie Hollowell; Jean and Bobby Bagley, of South Norfolk, Va.; Mrs. W. H. Pierce, Mrs. E. R. Whedbee, Mrs. W. F. Hollowell, Mrs. Willie Pierce, Mrs. Kate White, Mrs. Jack Benton, Mrs. Eddie Harrell, Mrs. J. F. Hollowell, Mrs. Earl Jernigan, Mrs. Livingstone White, Mrs. Roger Copeland, Mrs. J. C. Bagley, Mrs. J. E. Copeland, Mrs. J. M. Hollowell.

Miss Anne Miller, of Elizabeth City, is spending sometime with her sister, Mrs. W. G. Hollowell.

Mr. and Mrs. L. M. Simpson, of Berkley, Va., visited Miss Dona White Sunday.

Miss Audrey Umphlett, of Virginia Beach, Va., visited friends and relatives here Sunday.

Mrs. W. F. Mergan has returned home from Plymouth, where she visited her sister, Mrs. John Brown, who has been very sick.

Misses Gertrude McGovern and Quilla Bennett, and Mr. Morse Wriggins, of Wilmington, Del., were the guests of Miss Dona White for the past week-end.

## LADIES' COUNCIL MEETS WITH MRS. A. L. LILLIE

The Ladies' Council of Bethlehem Christian Church met with Mrs. A. L. Lillie on Friday afternoon, with Mrs. R. A. Perry, president, presiding.

After the devotional exercises and a short business session there was a very entertaining program, under the direction of Mrs. E. Y. Berry, after which delightful refreshments were served.

Those present were Mesdames Sallie Cullipier, Sue Russell, W. M. Harrell, A. L. Lillie, C. M. Umphlett, Nellie Stallings, Carlton Cannon, E. Y. Berry, T. T. Harrell, Garland Stanton and R. A. Perry, and two visitors, Miss Virgie Umphlett and Miss Eva Harrell.

## Huge Unpaid Force Assists FHA Program

Washington, D. C.—For every paid worker in the nation-wide Better Housing Program of the Federal Housing Administration there are 90 volunteer workers helping the movement to revive the durable-goods industries and the construction industry as a whole, according to the Administration.

Figures released here by the Administration show that there are only 2,769 paid employees, while there are 250,000 volunteers backing the program.

From the outset of the Better Housing Program, labor, business, and industry have enthusiastically cooperated in the furtherance of the work. In local communities a greater portion of organization work was carried on by civic-spirited citizens under the guidance of representatives of the Housing Administration. At national headquarters the greater majority of major industries have maintained at their own expense representatives who work hand in hand with the various divisions of the housing organization.

During the Spring of 1935 more than 1,000 trained men from various industries participated in a series of educational meetings held in key cities throughout the country to acquaint retailers and independent dealers, as well as the general public, with the far-reaching benefits to be derived from modernization and repair projects. At the same time, industries pledged personal modernization and repair projects. At the same time, industries pledged personal modernization projects and campaigns within their own concerns to educate their employed personnel in the purpose of the Better Housing Program.

Rural communities have also shown much cooperation in the program, and hundreds of unpaid workers have carried on the tasks in local better housing committees in 48 states. The actual work of organizing house-to-house canvasses, obtaining definite pledges for repairs, and putting property owners in contact with materials dealers, contractors, and architects, has largely been the work of the volunteer staff in every locality.

Local better housing committees receive no funds for their operations from the Federal Housing Administration. Each community finances its own program, many with the assistance of the local Emergency Relief Administration, in providing canvassers and clerical helpers. In many sections canvassers receive compensation from retail trade.

Committees vary in size from a hundred or more to less than half a dozen, depending upon the population of the community in which it is functioning. Canvassing organizations range from paid forces of trained men and women to carpenters and brick layers on relief or volunteer salesmen representing building-supply dealers.

## Advisors To Help Better Homes Drive

Washington, D. C.—One of the unique forces in the better housing program, which is proving an effective stimulus to modernization of all types of real property and to construction of new homes, is the Advisory Council of the Federal Housing Administration.

This group of 27 men was selected to represent practically all shades of specialized opinion, so that when a question is placed before the Advisory Council the report on that question will closely approximate the opinion of the general public. They serve solely as advisors to the Administrator. Many serve without pay.

The purpose of the organization of this group was to make readily available to the Administrator the experience and judgment of the outstanding men in the whole field of housing and allied activities, whose services it would not be possible to obtain as permanent members of the staff.

In its membership are financial men, representing insurance companies, commercial and savings banks, trust companies, and building and loan associations; real estate men, builders, housing experts, city planners, economists, material men, engineers, architects, and fire-prevention experts, and representatives of labor, skilled in housing.

## Fencing Repairs Timely In Spring

The advent of warm weather provides an excellent time to build new fences and to repair old ones. Even the truck garden should be fenced to keep out chickens.

Deteriorated fence posts should be replaced with new ones, preservative treated, or of very durable wood, concrete, metal or other suitable material. Sagging wires should be tightened, and broken wires, fence boards, and woven fences of various kinds which will no longer furnish adequate protection should be replaced with new durable material.

Spring is also an excellent time to paint fences before grass or other plant growth becomes sufficiently high to interfere with this kind of work. A fresh coat of white paint on the posts not only serves as a guide to assist the automobilist who drives at night, but which

## Timely Questions On Farm Answered

Question: How can I control bud worms in my tobacco?

Answer: The best known control for this damage is the poisoned corn meal bait. This is made by thoroughly mixing 50 pounds of corn meal with one pound of arsenate of lead. A small pinch of this mixture should be dropped in the center of the bud early in the morning when the tobacco bud is open. Begin applications as early as possible after the plants are set and repeat every week or ten days until the plants are topped. One peck or twelve pounds of the mixture will cover an acre of tobacco plants.

Question: Where can I get information on canning, preserving and pickling?

Answer: Two new publications have recently been issued by the Extension Service at State College and are now available upon request to all citizens of the State. Circular No. 114 give information as to canning fruits and vegetables while Circular No. 113 carries detailed instructions for making all kinds of jellies, jams, preserves, and pickles. These circulars were prepared by the home demonstration department and may be had from your local home demonstration agent or upon application to the Agricultural Editor at State College.

Question: Is it a good policy to cross breed poultry?

Answer: Cross breeding is becoming very popular with large poultry producers. This crossing of breeds apparently steps up the vigor of the progeny and therefore gives a higher percentage of livability, especially if purebred parents have been used. This is especially desirable in broiler production work. In relation to egg production, a first generation cross should be advantageous but should not be carried further.

Question: When should I begin dusting to control the cotton boll weevil?

Answer: Dusting should begin as soon as 10 percent of the squares are punctured. The weather has been ideal for the weevil this year and for that reason a count of punctures should be made as soon as the squares are formed. Count 100 squares and where as many as ten are found punctured the first application should be made. Use from four to six pounds of calcium arsenate to the acre and repeat the application five days after the first dusting. Counts for infestation should be made each week and applications made as may be necessary to keep damage below 10 percent.

Question: What is the best time to apply nitrogen to corn and cotton as a side dressing?

Answer: Applications should be made to corn when it is about knee high and to cotton immediately after chopping. Much of the fertilizing value is lost when late applications are made. With cotton, late applications may delay maturity while with corn they will increase the plant growth but will not increase the corn yield. Apply the side dressing as early as possible so as to get full value of the fertilizing material.

Question: What should be done to control chicken pox in my laying flock?

Answer: Where this disease is present, all birds having the trouble should be immediately isolated, the house and utensils thoroughly cleaned, and a good germicide kept in the drinking water as long as new cases appear. The entire flock should be given one dose of Epsom Salts at the rate of one-half pound to three gallons of water. Vaccinate the well

fences surrounding verdant fields, farm woodlands, and orchards make beautiful and attractive landscape settings.

Loans for repairing and installing fences are available through private financial institutions cooperating with the Federal Housing Administration, which is insuring such loans under the National Housing Act.

## Taylor Theatre

Charles Ruggles  
Zasu Pitts  
Chas. Laughton  
"Ruggles of Red Gap"

The comedy sensation of this year's releases.

Thursday and Friday, June 20-21—  
BING CROSGY in  
"Mississippi"

birds with pigeon pox virus as this material will not produce as severe a disturbance as chicken pox virus in the laying flock. Where a large percent of the flock has the disease or it has been present in the flock for sometime it is unnecessary to isolate the birds. All other precautions should be taken.

Question: How can I get information on canning, preserving and pickling?

Answer: Two new publications have recently been issued by the Extension Service at State College and are now available upon request to all citizens of the State. Circular No. 114 give information as to canning fruits and vegetables while Circular No. 113 carries detailed instructions for making all kinds of jellies, jams, preserves, and pickles.
