

**UNSYNKABLE SHIPS
MADE OF NEW STEEL**

**Briton Invents Bombproof and
Stainless Metal.**

London.—Unsinkable ocean liners, warships and freighters are made possible by an amazing new steel invented in England.

Battleships built of it would be impregnable, and tanks and armored cars could defy the biggest explosive shells. It is bombproof and stainless, according to an expert report.

This new steel cannot be cut by the hardest chisels. The most powerful oxy-acetylene blowpipes have failed to cut the smallest hole in it.

Tests that reduced the latest battleship armor-plate, designed to resist high explosive shells, to semimolten scrap in 17 seconds left the new steel unimpaired after 40 minutes.

The invention is that of John Tann, a London metallurgist. The substance is known as tannsteel. Originally intended for use in the manufacture of burglar-proof safes, a slab of the steel, six and one-half inches thick, was sent for testing to an oxygen concern.

For seven days workmen attacked the slab with every device known to the scientific burglar, and with many of which he knows nothing.

It resisted an "oxygen lance" 25 feet long—one of the most powerful blow-pipes ever made.

Mechanical tools were only battered or broken, and in the end the experts confessed themselves defeated.

**Ohio Co-Eds Cut Costs
by Co-Operative Plan**

Columbus, Ohio.—The cost of an education has been reduced to a minimum for a select group of coeds at Ohio State university.

They are residents of Alumnae Co-operative house, purchased with money raised among women graduates and operated along the lines of the increasingly popular Tower club for men students within the gray walls of the stadium.

Thirty-three young women, selected for scholarship, leadership and personal recommendations, are occupying the large double house and operating it on a co-operative basis under the supervision of a housemother, Mrs. Margaret Gullford.

On the basis of computations already made it is figured that food will cost about \$3.25 a week, other expenses 25 cents a week and rent \$5 a quarter.

Total expenses for each girl are expected to be about \$125 for the school year, which is about the amount the average student spends in one quarter.

**Pushcart Venders Sneer
at Idea of Life on Farm**

New York.—There are few country bred pushcart peddlers in New York's open air market, according to an analysis of nearly 3,000 questionnaires obtained by department of public market investigators.

A report indicating the preferences of peddlers in 23 of the larger markets showed that of the 2,950 questioned only 197 had ever lived in the country and that only 314 welcomed a possibility of living in a rural or semi-rural environment.

Questioned, "Would you like to live in the country?" 84 per cent of the vendors answered with an emphatic "No!" A few equivocally responded with "I'd like to if somebody'd give me a farm," or "Yes, if I had enough money so I wouldn't have to work." Answering a question with a question was a characteristic response of many practical minded peddlers who asked, "What good is it?"

**Hermit Refuses to Cash
In on Mountain of Ore**

Octave, Ariz.—Living in a cave he calls home. "Louie the Hermit," dean of Arizona hermits, ekes out a living while he leaves literal mountains of wealth but little touched about his door.

Prospectors say that his mining claims near here are rich, but he sells only enough ore to assure him of a living.

Veteran of the early prospecting days of California, and one-time friend of John Marshall, who discovered gold at Sutter's Mill and started the rush of '49, the aged German immigrant is content to remain at his camp and rarely ventures even to this little town two miles away.

He says that the world is "too excited and too busy" for him.

Boys Learn Darning

Lacona, Iowa.—Training for bachelorhood has been started in Lacona high school. Boys are being given a course in darning their own socks. Due to Lacona mothers, a course in embroidery work for boys also has been started.

**Midget Cow Proves
to Be Good Milker**

Trenton, Ohio.—Although it has never won any prize, a cow owned by S. R. Shafer, here, holds a greater claim to fame than any ribbon winner.

With its weight only 228 pounds and its height only 37 1/2 inches, this cow, which will be four years old in February, can lay claim to the title of the smallest cow in the world.

The midget cow is a jersey, eligible to register, gives her weight in milk every 16 1/2 days and weighed only 18 pounds at birth.

LAUGHS FROM THE DAY'S NEWS!

**Owner Oldest Chevrolet
Gets Free 1936 Model**

Hiram H. Dohner, 70, of Quentin, Lebanon County, Pa., was found to be the owner of the oldest Chevrolet in daily use in the United States in a contest conducted by Chevrolet Motor Company recently. Mr. Dohner will be presented with the one millionth car built in 1935, a 1936 model.

Mr. Dohner owns and drives Chevrolet no. 470 (a 1913 Royal Mail roadster, which he purchased from a Chevrolet dealer in Lebanon, Pa. He has already received official notification from Chevrolet officials, and will shortly drive his present 22-year old

car to Detroit, where he will inspect Chevrolet factories and take delivery of his new 1936 model.

Mr. Dohner is a carpenter in Quentin, a hamlet in the valley of the Susquehanna, with a population of nearly 500 people. He has been a carpenter all his life but like the versatile and ingenious people who live in small towns, he can do many things. He can take care of an automobile in a way that would prove surprising to the modern motor car owner. The fact that his present car has served him and served him well for 22 years, piling up a total of more than a quarter million miles, proves the value of motor car care.

For Digestion's Sake - smoke Camels

JUNGLE BOUND! "I always smoke Camels for digestion's sake," says Frank Buck, famous wild animal collector. "I recommend Camels for flavor," he continues. "They are rich and mellow. And they are a delightful help to digestion."

CAMELS Costlier Tobaccos!

Be comfortable!

... in the only car in the lower price range with the
FAMOUS KNEE-ACTION RIDE*

- NEW PERFECTED HYDRAULIC BRAKES** (Double-Acting, Self-Articulating) the safest and smoothest ever developed
- SOLID STEEL one-piece TURRET TOP** a crown of beauty, a fortress of safety
