Frigidaire Unharmed After Plunge from Blimp into Bay

Look out there! It's a flying Frigidaire falling from a Goodyear dirigible into salty Biscayne bay at Miami, Fla. Subjected to one of the most severe tests ever given an electric refrigerator, this stock model unit built by Frigidaire Division of General Motors was dropped 100 feet from a blimp into Florida waters. Towed around by a speedboat to guarantee complete submersion, it was hauled out, found sealed as tightly as when it left the factory and was put into immediate operation freezing ice-cubes. Aeronauts who witnessed the spectacular test were amazed that the refrigerator survived the terrific impact of the drop and came out without a single leak in its permanently sealed mechanism or a break in its cabinet, because, after all, they reasoned; household refrigerators are not supposed to be manhandled that way.
