

**Give Rates Of Soil Conserving Payments**

The average rate of the soil-conserving payment in Chowan County under the 1936 farm program has been fixed at \$9.30 per acre, according to Dean I. O. Schaub, of State College.

This rate applies to general soil-depleting crops other than cotton, tobacco, and peanuts, the dean said, and will vary with individual farms.

The general rate for each county has been determined according to the average productivity of general soil-depleting crops in that county.

The rate for an individual farm will be above or below the county rate in the same proportion that the productivity of general soil-depleting crops on the farm is above or below the county average.

The general productivity of each farm will be based upon the average past yields of soil-depleting crops other than cotton, tobacco,

**U. N. C. COMMENCEMENT SPEAKERS**

DR. JOHN W. STUDEBAKER

DR. H. E. LUCCOCK

Dr. John W. Studebaker, United States Commissioner of Education (left), and Dr. Halford Edward Luccock, of the Yale University School of Divinity, who are to be the principal Commencement speakers at the 141st graduation exercises of the University of North Carolina at Chapel Hill June 7-8-9.

Dr. Studebaker will deliver the Commencement address at the exercises Tuesday evening, June 9, when diplomas will be presented by Governor John C. B. Ehringhaus.

Dr. Luccock will preach the baccalaureate sermon Sunday morning, June 7, in Memorial Hall.

**HERTFORD VISITORS**

Dr. G. G. Dixon, accompanied by Mrs. Dixon and their two little sons, Grady, Jr., and Elliott, of Ayden, were here Sunday, visiting Mrs. Dixon's parents, Mr. and Mrs. R. D. Elliott.

and peanuts.  
For tobacco and cotton the rate of payment has been fixed at five cents a pound on the average tobacco and cotton yields of the farm. The rate for peanuts is 1 1-4 cents a pound.

The soil-conserving payment will be made for shifting land from soil-depleting into soil-conserving crops this year.

A farmer who takes high productive land out of cash crops and puts it into soil-conserving crops is making a bigger sacrifice than the farmer whose land is low in productivity.

For this reason, the dean explained, the rates of payment have been based on the productivity of the land.

The average rates per acre for general soil-depleting crops in nearby counties are as follows:

Bertie	\$8.00
Chowan	9.30
Gates	8.20
Hertford	7.60
Hyde	8.60
Martin	8.60
Pasquotank	9.10
Perquimans	8.60
Tyrrell	8.80
Washington	8.90

**WEEK-END AT HOME**  
T. S. White, Jr., who holds a position in Richmond, Va., spent the week-end in Hertford with his parents, Mr. and Mrs. T. S. White.

**AT HOME FOR SUMMER**  
Miss Mary Elliott, who has been teaching at Franklinton, has returned to Hertford to spend the summer vacation with her parents, Mr. and Mrs. J. P. Elliott.

**George T. Powell**

"I buy about 40 tons of ARCADIAN, THE AMERICAN NITRATE OF SODA each year and the extra nitrogen is just the same as getting one extra ton free"

That's something worth talking about!

Whenever Southern farmers get together you find they are talking about the value of the extra Nitrogen in "ARCADIAN".

And this extra value is well proved, too, for the Department of Agriculture and Immigration of the State of Virginia, after official tests, reported that ARCADIAN, THE AMERICAN NITRATE OF SODA contains extra Nitrogen over the guaranteed 16% with an extra cash value running as high as 88¢ per ton.

Tell your fertilizer dealer to sell you only

**ARCADIAN, THE AMERICAN NITRATE OF SODA**

FIRST:—Because it is proved to be extra rich in Nitrogen.

SECOND:—Because it is produced in the South and its use helps to keep Southern workers employed.

"Unless Uncle Sam is on the sack Turn right around and take it back."
