Hints for Homemakers By Jane Rogers

THE redecorating season is almost here. All of us are either thinking about new spring and summer furnishings for our homes and apartments, or we have already begun buying and sewing. Let's start off correctly this year by putting up fresh, sparkling new window shades.

No matter how gay and summery your new curtains are, they can't hide dingy, crumpled, badly hanging shades. And we all know our windows tell our neighbors a great deal about us.

Clever women who take a great deal of pride in their homes are harmonizing their window shades with their curtains and draperies. A white shade looks best with white curtains. Why not use a rich, golden cream shade with your soft green, pale yellow or cream curtains? A grand idea, and you can carry it through for every room in the house. The result is so smart and new, we'll wager you'll get many a compliment from your neighbors on your good taste!

A word to the wise and thrifty—don't buy just any shade—get the better kind. They're made of excellent quality window shade cloth that is specially processed with an oil paint. These shades give you long wear, they have an amazing amount of body, and they're not "weighted" with starching and other foreign matter that washes out with the first rainstorm. And if all this isn't enough, they're hung on sturdy rollers!

Homes Should Be Wired Only By Competent Men

Adequate, safe, and convenient wiring of the farm home is considered one of the most important aspects of the rural electrification program.

To be sure that the wiring is done properly, said Miss Pauline Gordon, extension specialist in home management at State College, employ only contractors known to be reliable and competent.

The contractor is responsible for doing the job so that the wiring will be adequate and safe, but the home owner should determine where all switches, lights, convenient outlets, and branch circuits are to be located.

Miss Gordon suggested that home owners draw floor plans of their

houses and locate switches, outlets, and lights where they will be most convenient. Then go over this plan with the contractor.

If the cost of wiring according to this plan is too high, the contractor will assist the home owner in making adjustments.

Above all else, she warned, do not try to economize by using wire too small to carry the load that will be imposed upon it.

In planning the wiring circuits, lights, outlets, take into consideration the uses to which electricity will be put in each room. If a radio, for example, is to be operated in the living room, provide a convenient outlet in the wall close to the place where the radio will be located.

Do not plan only for the fixtures and appliances that will be used at first. Make adequate provision for

various devices that may be obtained in the future, Miss Gordon urged.

Plenty of convenience outlets should be placed in the walls of the dining room, living room, and kitchen. A double convenience outlet placed in each wall of the bedrooms will be a big help.

THIS WEEK'S RECIPE

QUICK SUGAR COOKIES

This recipe is being re-published at the request of a number of our readers who failed to save it when published a few months ago.

2 eggs
1-3 cup melted shortening
1-2 teaspoon salt
1-2 teaspoon nutmeg

1 tablespoon milk
1 1-2 cups flour
1 cup sugar
1 teaspoon baking powder
Beat eggs until light and thick.

Add melted shortening and beat well. Then add sugar gradually, beating well. Sift dry ingredients together and add to first mixture with milk, mixing well.

Drop from teaspoon on oiled baking sheet about 2 inches apart to allow for spreading. If desired press raisins or nuts lightly into each cookie, or sprinkle with sugar or sugar and cinnamon. Bake in hot oven and remove from cookie sheet while hot.

Handkerchiefs will wash easier if they are soaked in salt water for half an hour before washing.
