To make lace look new, squeeze in hot, soapy water, then in cold water, and then in milk to stiffen it. Press on the wrong side with a fairly hot iron.

**MYSTERIOUS SMITH COFFIN ESCAPE**

At State Theatre Monday and Tuesday. To escape from this coffin while bound securely in a straight jacket is only one of the feats of magic performed by the Mysterious Smith.

Gone are the days when tugging, chopping, twisting gymnastics are necessary to obtain ice cubes from an automatic refrigerator. Shown above is the sensationally new and efficient instant cube release featured exclusively in the 1937 Frigidaire. Developed in the research laboratories of the Frigidaire division of General Motors, the new type ice

tray makes available instantly and with no effort on the part of the user from two to a dozen or more cubes, doing away with the necessity for holding trays under the water faucet and losing up to twenty percent of the ice content in meltage. One grasps the tray firmly with one hand, lifts the lever with a finger of the other and there are the cubes ready for use without fuss or muss.
