**Dr. Whedbee Here**  
Dr. J. P. Whedbee, of Suffolk, Va., is visiting his sisters, Mrs. Herbert Newby, Mrs. Evert Newby and Miss Pattie Whedbee, in Hertford.

## Three-Year Rotation Brings Good Results

A three-year rotation of corn, wheat, and lespedeza is superior in many ways to a two-year rotation of wheat, crimson clover, and corn, according to E. C. Blair, extension agronomist at State College.

In the first place, the land is in a row crop for only about six months out of every three years. The rest of the time it is in wheat or lespedeza, which are broadcast crops that discourage erosion, or the land is plowed up rough and left over winter for the lespedeza to decay. During this time there is likely to be little washing, Blair explained.

Then, too, the same amount of labor can cultivate more land under the three-year rotation. It is usually necessary to plow only once in three years at the time lespedeza is turned under for corn. Discing and harrowing will generally put the corn-stalk field in shape for wheat.

Blair pointed out that there is no rush of work in this rotation, as the lespedeza may be turned under at any suitable time during the winter. Preparing the land for wheat is a relatively rapid process, and the lespedeza is sown on the wheat in February or March when there is little else to do.

On the other hand, it is often a serious problem to get crimson clover turned under and corn planted in a two-year rotation. Also breaking wheat stubble land during hot weather in order to sow crimson clover sometimes presents difficulties, Blair added.

**Daring Piece of Engineering**  
The great International Bridge at Niagara Falls was a daring piece of engineering. The span was 821 feet, and the height of the towers 80 feet. It was the first suspension bridge designed to carry railroad traffic. And it was only because locomotives were being built so much heavier that it had to be replaced by a steel arch in 1898.

## HOGGING DOWN CORN

By GUY A. CARDWELL  
Agricultural and Industrial Agent  
Atlantic Coast Line Railroad Co.

Cash-crop farmers in Tidewater Virginia and Coastal Plain and Tidewater sections of the Carolinas have made remarkable progress during recent years in breeding and feeding hogs for shipment to packing-house markets. Frequent mention has been made of the "Shay Method", in North Carolina, and the "Sharkey-Hawkins Method", South Carolina, under which hogs are quickly made ready for market.

The splendid results accruing from the use of feeding methods advocated by Swine Divisions of Agricultural Colleges in Virginia and the Carolinas have been largely responsible for the fact that hogs have become a money-crop on numerous farms throughout this section.

In view of the interest that has been developed in hogs and corn, it is felt that certain information developed at Auburn, Alabama, from work extending over a 15 year period showing the hogging off of corn was substantially more profitable than harvesting and marketing corn, in all but three years of the fifteen years, should be a matter of general interest to farmers.

Lack of space prevents use in this article of the table of figures making comparisons between hogging off of corn versus harvesting corn in Alabama. An average of the figures for the 15 years shows a profit of \$4.06 per acre, or 28 cents per bushel, in favor of hogging off corn compared with harvesting and marketing corn. An average price of \$1.32 per bushel for corn in the field would have been realized during the 15 year period if the corn crop had been marketed through hogs.

Greenville, spent the week-end with her parents, Mr. and Mrs. H. D. Hurdle.

Mr. and Mrs. W. E. Smith and family of Roduco, spent Sunday with Mrs. J. V. White.

Mr. and Mrs. Raymond Davenport, of Elizabeth City, visited Mr. and Mrs. C. L. Godwin Sunday afternoon.

## JOHN, YOUR HAIR IS A FRIGHT/HERE. USE MY FOM-OL!

Wives, mothers, sisters—they're often forced to point the way to hair health to their men folk! For women know that a healthy head produces handsome hair! And that's why women everywhere are pointing to Fom-ol, the remarkable foaming oil shampoo which first nourishes the scalp, then takes the dull, parched hair and brings it back to glowing health. Fom-ol is so economical; a little goes a long way. Ask your druggist for the regular 50c size. Or, write for a generous trial bottle, enclosing 10c to cover packing and postage.

**Will Rogers' Humorous Story**  
By WILL ROGERS  
A TEACHER was trying to give the kids some idea about how population spreads out and makes people go out and discover new land to live on. "Why," she says, "it's remarkable how population increases in a few years. Now you take a single one of the people that landed at Jamestown. He might have thousands of descendants by this time."  
"Well then," says one of the kids, "I reckon a married one might have even millions, mightn't he?"

## Hot Weather is Here—Beware of Biliousness!

Have you ever noticed that in very hot weather your organs of digestion and elimination seem to become torpid or lazy? You feel nervous, gassy, constipated, heartburn, and a feeling of restlessness and irritability. Perhaps you may have a sick headache, dizziness, and a general feeling of uneasiness. These symptoms may be caused by constipation biliousness and your bowels are sluggish or insufficient.

These are some of the more common symptoms or warnings of biliousness or so-called "torpid liver," so prevalent in hot climates. Don't neglect them. Take Calumet, the improved colonial compound, which gives you the effects of natural and safe cathartics. You will be surprised with the relief it gives you. It is a safe, pleasant, and sure remedy for constipation, biliousness, and all the ailments that attend it. At drug stores.

YOU CAN'T BEAT PROOF OF GREATER ICE ABILITY  
**ONLY FRIGIDAIRE METER-MISER HAS THESE 2 ICE MARVELS!**

1 the **METER-MISER**  
Cuts cost of Making MORE Ice—Faster!  
Keeps food safer, fresher, longer—makes more pounds of ice, faster—at amazing saving! Even in hottest weather. Simplest refrigerating mechanism ever built! Only 3 moving parts, including the motor.

2 the **ALL-METAL QUICKCUBE TRAY**  
with the **INSTANT CUBE-RELEASE**  
Ice freezes faster in metal trays. And every tray, in every Frigidaire, is a new fast-freezing ALL-METAL QUICKCUBE TRAY. Instantly releases ice-cubes. Yields 20% more ice by ending waste, and nuisance of melting them loose.

Our Amazing **FRIGIDAIRE ICE-ABILITY DEMONSTRATION** now going on . . . don't miss it!  
Come in! See these amazing displays! How Frigidaire with the Meter-Miser freezes more pounds of ice faster, while keeping food safer, fresher, longer . . . even in hottest weather. See the Gigantic Ice-Cube . . . frozen right inside a Frigidaire. See the ALL-METAL QUICKCUBE TRAY! Meet the Meter-Miser!

Only Frigidaire with the Meter-Miser gives you these important advantages:  
Meter-Miser . . . New All-Metal Quickcube Tray—with the Instant Cube-Release . . . Food-Safety Indicator on Outside of Door . . . Automatic Tray-Release . . . 8-Way Adjustable Interior . . . P-114—The Safe Refrigerant . . . Built and Backed by General Motors.
