

### Valentine Dance At Walker's On Tuesday

A Valentine Dance will be given on Tuesday night of next week at Morgan Walker's Hall, for the benefit of the Athletic Association of the Perquimans High School.

#### SUNDAY SCHOOL CLASS MEETS

The Judson Memorial Class of the Hertford Baptist Sunday School met Tuesday evening with Mrs. William Boyce.

The meeting opened with the singing of "Near the Cross." Mrs. William Boyce had charge of the program, the theme being "Ideals of Living." Mrs. Josiah Elliott read a poem, "Merry Telephone Bells," and Mrs. Charles Johnson led in prayer.

The hostess, assisted by Miss Mattie Lou Lane, served a delicious sweet course.

Members attending included Mrs. Charles Johnson, teacher; Mesdames Josiah Elliott, Tommy Miller, Sidney Layden, James Copeland, William Boyce; Misses Ellen Chappell, Gussie Wood, Mattie Lou Lane, Bessie Woods, Marion Raper, Pattie Rogerson, Essie Walker and Frances Boyce.

The March meeting will be held on Tuesday night after the first Sunday with the new member, Miss Frances Boyce, at her home at 7:30 o'clock.

#### TINY PISTOL CAUSES BIG TROUBLE

New York.—Grasping a tiny watch-charm pistol between her thumb and index finger, Isabel Kauf, clerk in a novelty shop, showed it to a customer, saying: "Look, isn't it cute? Just like a real gun." She pulled the trigger. There was a delicate bang and Miss Kauf was scratched on the finger. The shop's fourteen guns—each about an inch long—were confiscated and the shop owner, Louis Tannen, was arrested on a charge of violating the State's anti-firearms law.

#### 27TH CHILD BORN

Conway, S. C.—While he was in a hospital recovering from injuries suffered in an automobile accident, the stork visited the home of E. J. Roberts for the twenty-seventh time. Twenty-five of the children are living.

#### PLENTY OF LINEN

Belfast, N. Ireland.—According to a statistics, Ireland made 154,000,000 square yards of linen in 1931, or enough to put a strip a yard wide three times around the world and still have some left. The output was valued at \$61,250,000.

Mrs. Louise Kadow, of Vancouver, Wash., owns a cat which eats raw squash, dill pickles, tomatoes and sauerkraut in addition to regular cat fare.

#### EROS VISITED EARTH

Cambridge, Mass.—The asteroid Eros came within 20,000,000 miles of the earth on or about January 20, according to Harvard Observatory officials. This is the closest swing to the earth it has made since 1898 when it approached to within 14,000,000 miles.

A postal card mailed by a soldier in a French infantry regiment in 1915 has just recently been delivered to M. Foques at Martignes, France.

## The SNAPSHOT GUILD

Pictures in the Looking-Glass

"Two-in-one" pictures can be snapped with the aid of a mirror. Note that the light comes from the left onto faces of the children. In mirror pictures the light must be in front of the camera, but it must also be shaded so as not to shine on the lens.

SNAPPING back and front views of a subject in one picture is a novel idea, but it is one of the simplest tricks in photography. All one needs is a mirror.

The subject sits or stands either in front of the mirror or barely to one side, looking into the glass. The person taking the picture stands back at a point where the camera finder shows both the back of the subject and the reflection in the mirror—and snaps the picture.

It is necessary, of course, to have sufficient light, either daylight or artificial. The light should come from one side, and fall upon the subject instead of on the mirror. Strong light such as from an electric bulb should not be allowed to strike the camera lens, as it will spoil the picture.

The artificial light to use for snapshots is that from amateur floodlight bulbs, but ordinary electric bulbs will serve for time exposures. With an ordinary 100-watt bulb and a box camera, loaded with supersensitive film and opened to its largest lens opening, an exposure of five seconds will usually serve when the bulb is three feet from the subject. Snapshots call for two of the large-sized amateur flood bulbs in reflectors three to four feet from the subject. Most amateurs prefer the snapshot method because it does not require

the subject to remain still so long. When a time exposure is made the camera must be rested on a table or other firm stand.

The subject in a mirror picture should not stand too far from the mirror, because that will make the reflection too far away and too small. Also, it may bring the subject so close to the camera that he is out of focus. With a fixed-focus camera which is not meant for use closer than six feet, the subject's back should be six feet from the lens when the picture is made.

When using a focusing camera, remember that the reflection lies beyond the surface of the mirror. For instance, if the subject is three feet in front of the mirror, the reflection is three feet on the other side of the mirror. Hence, with the camera six feet from the mirror, the worker would focus at nine feet. Or, to get everything sharp, he could focus for six feet and use a very small lens opening which gives more "depth of focus."

If one has access to a dressing-table with a triple mirror, he can make four pictures in one—a back view of the subject, a full-face view, and two profiles. These two profiles are obtained by adjusting the side wings of the mirror to the proper reflecting angle.
