

Factory chimneys belching smoke... long lines of men tramping to work... trains of freight cars crawling across the continent. That's the picture the word "Industry" conjures up. Probably it seems to you, an individual woman making a strawberry shortcake for supper out in your shining kitchen or watering the nasturtium seeds you just got through planting in your flower garden, that "Industry" has nothing to do with you.

And yet, the very shininess of your kitchen and the hose you use for watering your flowers, depend on it. If it were not for this thing called "Industry" you'd probably be using an old-fashioned black cook stove or even a fireplace as your great grandmother did! You wouldn't have much leisure for your garden, even if you had one. "Industry" produces the white enameled stove you use, the hose and the water system that enables you to water your flowers and the labor-saving devices that give you the time for doing it. It is also responsible for the money your husband earns with which to buy these things.

"Oh, but . . ." you say, "Jim is a dentist," or "Jim is a teacher" or "Jim is a storekeeper. He has nothing to do with 'Industry.' Why, he's never worked in a factory in his life and we don't own so much as a share of stock!"

Just the same, "Industry" makes all the difference in the world to Jim and to you, no matter where you live. If you live in a town where there's a mill or factory that difference is perfectly apparent. This plant means jobs for ten, twenty, a hundred, perhaps a thousand people. Good jobs, too, because factories are paying high wages these days.

And what do these jobs mean to you and Jim who aren't holding any of them? First of all, they mean people with money to buy things in the stores of your town. If Jim is a storekeeper or clerk, then his business is possible or much better because of this spending. And if he is a dentist? It means that more people can afford to have their teeth taken care of—and at fair

prices. Not only the people connected with the factory, but the people in the store who have money because factory people have bought things from them! And if Jim is a teacher he has a better job because the town collects more money in taxes and so, has it to spend on teachers and schools, as well as on parks and pavements and public libraries.

So you see, you are part of this big industrial system that sounds so imposing and makes this country what it is. Not only because you buy and use the things "Industry" produces, such as hats and shoes and cook stoves and breakfast food, but because "Industry" enables your husband to earn the money with which you buy these things.

That's why it is vitally important to you that "Industry" keeps on going, as actively as possible, and—in the free-enterprise, American Way!

**Broughton Dail Gets 4-H Course Scholarship**

For outstanding performance in 4-H Club work in this county, Broughton T. Dail, son of Mr. and Mrs. Milton Dail, of near Hertford, has been awarded a scholarship to attend the 4-H Short Course in Raleigh this summer.

Broughton's scholarship was given by the Chilean Nitrate Educational Bureau. About 1,000 North Carolina boys and girls attend the 4-H Short Course each summer.

**NEW HOPE NEWS**

Mrs. Berta Hobbs is spending this week with her son and daughter-in-law, Mr. and Mrs. Joseph Hobbs, at South Mills.

Mrs. R. D. Banks, Mrs. S. D. Banks, Miss Vida Banks and Mrs. Wallace Wood, of Woodville, motored to Norfolk, Va., Monday.

Rountree, Mrs. Nell Spruill, Mrs. Josiah Proctor and Mrs. Sidney Layden attended the District meeting of Home Demonstration Clubs at Manteo Tuesday. John Chappell and Dick Lassiter, of Windsor, were guests of J. B. Basnight Sunday.

**With Exception Of Good Cotton Stand Crops Looking Well**

**Anderson and Maness Faced With Task of Selecting Beauty For Potato Festival**

The weather to date has been unfavorable toward getting a good stand of cotton, various farmers are complaining, but corn and beans and other crops are looking good, according to L. W. Anderson, county farm agent.

May Pea pickings began in some fields Tuesday and were almost in full swing Wednesday despite the non-toe-cheerful aspects of a blustery, cool, sunless day.

Mr. Anderson, though saying he has nothing with which to back up the assertion, is under the impression that there is a very slight increase, almost too slight to mention, in Irish Potato acreage in Perquimans County this year.

In connection with the mention of Irish Potatoes, Mr. Anderson and Miss Frances Maness, demonstration agent, who is very busy at the moment with her flower show and tea, are faced with the task of selecting a Perquimans County Beauty Queen to ride on the float in Elizabeth City on June sixth, in the Potato Festival. Mr. Anderson says they will probably appoint a committee to select the queen. The queens from all counties participating in the festival will ride on one float.

So far as can be determined, this is the only part Perquimans County will have in the spud festival. The identity of this county's beauty queen will be made known in this paper next week.

The vigorous hailstorm of two weeks ago, it is understood, did an amount of damage in certain sections but was not serious to any great degree.

**Good Beef Produced On Southern Grass**

It doesn't require Iowa corn to produce palatable and nutritious beef, says Earl H. Hostetler, professor of animal husbandry at N. C. State College. "Our Southern grass will do just as good a job, if we use good sires in breeding our cattle," he declares.

"Recent research has shown that good beef can be produced from Southern pastures, roughages and cottonseed meal," the animal husbandman says. "With the long growing season and greater stress on improved pastures, the finishing of beef cattle will prove a profitable practice in the Southern States. Added to profit from the sale of beef is the value of plant food restored to the pasture land without labor in handling manure."

Prof. Hostetler says that experiments by the North Carolina, and other experiment stations, have shown in certain cases that larger returns are possible from beef cattle that are fed cottonseed cake, or a mixture of cottonseed meal and grain, in addition to pasture. Also, by this method, the quality of beef is improved and more rapid gains are made, higher prices are secured, and less grain is used than for cattle that are fed to the same degree of finish in a dry lot.

"Cotton belt feeders have proved that cottonseed meal is not only an economical and efficient source of protein, but, in addition, has a productive or fattening value that is important in feeding on grass," the State College man declared.

When farm grains are available, many feeders use a mixture of one part of cottonseed meal and 4 to 6 parts of ground grain for cattle on grass. Pasture condition and the relative cost of grain determines the proportion of meal and grain fed, as well as the amount of mixture fed to cattle.

**Auto Quiz No. 1 ANSWERS**

1. c. twenty to thirty feet. The Uniform Vehicle Code specifies 30 feet. Various states specify varying distances between 18 and 30 feet. Your answer is correct if you checked c. Now check one thing more—your brakes!

2. C. pull over to the curb on your right and stop. In many cities the ordinance requires this practice. Whether or not there is such a provision in the local ordinance, good judgment dictates this wise move.

3. True. When following another car a driver should allow himself sufficient space to stop safely in an emergency. The minimum distance at 35 miles an hour is about 25 feet; at 45 miles an hour, 33 feet.

**EXTENSION NOTES**

By FRANCES MANESS  
Home Demonstration Agent

During the past week all demonstration club members have been unusually busy with various duties. We feel that our Spring Federation meeting with our flower show and tea are big items in our year's program.

We also feel that they were very successful—our announced speaker, Miss Ruth Current, was unable to attend. Mr. John W. Goodman, assistant director of Extension Service, was our guest speaker.

I wish to express my appreciation for the splendid cooperation I received in getting ready for the flower show and tea. Without it we could not have been successful.

One of the most interesting meetings was the Leaders' School Friday morning conducted by Miss Mammie Whisnant, assistant specialist in home management and house furnishings. She discussed table linens and demonstrated the various types of table-settings—using many different kinds of linen. At this meeting we were very fortunate to have Miss Pauline Smith, district agent, with us.

Saturday afternoon, Miss Myron Clineard, from Ball Brothers Company, gave a demonstration on the canning of non-acid vegetables. This was one of the most interesting demonstrations I have ever seen.

The following clubs were represented at the District meeting held in Manteo: Burgess, Chapanoke, Ballahack, Home and Garden, Helen Gaither, Beech Spring, Belvidere, and Snow Hill-White Hat.

One of the most interesting meetings I have attended was the 4-H Room Improvement School conducted by Miss Mammie N. Whisnant, assistant specialist in Home Management and House Furnishings. This school was held in Elizabeth City Saturday, June 1st. Perquimans County was represented by ten 4-H girls, one 4-H leader and the home agent.

Since we have room improvement as our project this year, I feel like every club member received some valuable information.

The schedule for next week is as follows:  
Monday, June 10—Ballahack Club

meets with Mrs. B. P. Monds.  
Tuesday, June 11—Beech Spring Club meets with Mrs. C. W. Reed.  
Wednesday, June 12—All-day Leaders' School on Refinishing Furniture.

Friday, June 14—Bethel Club meets with Miss Gertrude Chappell.

**Open Boy Scout Meeting**

The public in general is invited to attend a Scout meeting on the evening of Friday (today) at 7:45 at the courthouse, according to an announcement by W. H. Pitt, Scout master.

The Hertford troop will give a program, Mr. Pitt said. E. L. (Sam) Sawyer is assistant Scout master.

**RYLAND NEWS**

The Missionary Circle met with Mrs. Randolph Ward Saturday afternoon, the Sunbeams meeting at the same time with Lelia Faye Ward. Both meetings were well attended, and interesting programs well carried out were enjoyed. At the conclusion of the meeting, ice cream and cake were served by the hostess, Mrs. Roy Parks is visiting friends in Pennsylvania.

Mrs. G. A. Boyce, Mrs. T. L. Ward, Miss Evelyn Jordan, Miss Gertrude Jackson, Mrs. H. H. Lane, Mrs. R. S. Ward and Miss Elizabeth Eason attended the District meeting of Home Demonstration clubs at Manteo on Tuesday.

Mr. and Mrs. Tommie Boyce and children visited Mr. and Mrs. W. W. Henigar Sunday afternoon.

Mr. and Mrs. N. E. Jordan and sons visited their son, Graydon, in Norfolk, Va., Sunday.

Baseball umpires usually satisfy everybody except the players and spectators.

**Gatesville Census Shows Population Decrease In 10 Years**

Gatesville, the neighbor town in Gates County 25 miles from Hertford, has suffered a loss in population of 23 citizens, according to a preliminary count released recently by Denton W. Lupton, district supervisor of the census.

In 1930 on April 1st, Gatesville had 320 souls. Today it has 297.

Hertford, by the way, gained 42 citizens during the same length of time, according to the preliminary count.

**How to put the old snap back in your car with a new kind of gasoline . . .**

With the New 1940  
**Solvenized**  
**PURE-PEP GASOLINE**

When you spend a dollar for any of the modern new gasolines, you get just about the same quantity wherever you buy.

But when you buy the new 1940 Solvenized Pure-Pep Gasoline you get something extra that doesn't show up in the quantity or in the price either.

It's Pure Oil's bonus—the exclusive chemical combination that helps reduce excess carbon formation as you drive. It's something you don't get in other gasolines. It's something you don't pay extra to get in Solvenized Pure-Pep.

More than just an anti-knock fuel—although improved refining processes also give this pepped-up gasoline higher anti-knock value at all speeds.

More than just a quick-starting fuel—although it has that, too.

It's the all-round, brand-new 1940 gasoline with the extra chemical bonus—STILL AT THE PRICE OF REGULAR.

To cleanse your motor of accumulated excess carbon, QUICKLY—ask about our Solvenized Tune-Up Treatment. Takes only 30 minutes . . . costs only \$1 . . . money back if not satisfied.
