A Salute To Greece

Let's give a hand to the Greek government and the brave people of the small Balkan state!

tum the ancient inhabitants of the cultured land made their choice and decided to fight for their liberty.

It may be too much to expect great victories for the Greeks, even with all the assistance that the British can render, but, just the same, they have faced the initial test with courage that deserves ad-

A Witness Should **Have Protection**

A very regretable incident occurred in Recorder's Court on Tuesday and it leads The Weekly to the belief that a witness called, either by the State or by the defense, to testify in a case at court should be given in a large measure on Moscow, And some protection as to the rules gov- it is here that the Axis threats turn erning cross examination by lawyers.

aicular case was nothing less than insulting to one of the young ladies sians as payment for a benevolent of Hertford called to testify in behalf of the State.

While it is The Weekly's understanding that on cross examination it is the lawyer's duty to try to dis- it may cause Moscow to pause. credit the witness and the testimony it certainly should not be allowed that the lawyer could smear the character of a witness during that questioning.

It may be well and good for a lawyer to try to place the facts be fore the court pertaining to the case . . . but that does not necessarily mean that he has to pry into private loves of disinterested witnesses in trying to gain an acquittal for a two bit client.

Under Consideration

The County Commissioners on last Monday answered the Grand Jury's report concerning the Negro school in Winfall being a disgrace to the County by passing a resolution stat-ing that the Board has had the condition of this chool under consideration, and that something would be done about it as soon as the County was financially able to do so.

Well, parts of that resolution were news because for the past year the Editor of The Weekly has attended every open meeting the Board of Commissioners has held and he has never heard that school under discussion until last Monday.

The Weekly, like practically every citizen of Perquimens County, is not familiar with the County's condition that is a deep, dark secret, for the Commissioners never see fit to publish a statement regarding the County's financial status, and letting us know just what shape the County is in . . .

But regardless of that, The Weekly whole-heartedly endorses the report of the Grand Jury and it sincerely hopes that the resolution, passed last Monday, will be dug up out of the minutes of the County Commissioners and something will be dene to kine those boys and girls a decent pace in which to carry on their education.

Resolutions may be fine things to fill certain needs, but they make mighty poor school houses.

Battle of the Balkans

These reports call attention to the possibility of an Italian "mission"along the lines of the Nazi thrust into Rumania-for Bulgaria and Greece. The strategic value of Greece to the Axis would be great indeed, providing bases for sea and air ventures against the British fleet in the Eastern Mediterranean. But so pro-British is Greece that an Italian "mission," no matter how "friendly", might have to shoot its way into the country.

The pro-British Turks watch closely. But what they do must depend to promises. It is reported from Is-The incident involved in this par- tanbul that Berlin is offering control of the Dardanelles to the Rusattitude. It is a striking offer, considering the latent rivalry between Germany and Russia over this strip of water. But for that very reason

The Soviets may ask how secure their control would be in a Europe dominated from the Baltic to the Black Sea by a Nazi Germany to which no other Power but Russia remained as a counterweight .-Christian Science Monitor.
