

Exports To Latin America Up 50% Over '39 Figures

Exports from the United States to Latin America in the first quarter of 1941 amounted to \$183,000,000, or about 50 percent over the corresponding figure in 1939, before the war, according to figures just compiled by the Chilean Nitrate Educational Bureau.

"This expansion in the Latin American market for United States products helps to offset the virtual closing of the market of Continental Europe," the Bureau states. "Europe, excluding the United Kingdom, took about 25 percent of our exports in the first quarter of 1939 and less than 5 percent for the same period in 1941. Exports to Latin America, on the other hand represented 18.6 percent of this country's total exports for the quarter.

Exports to Chile alone amounted to \$10,667,000, for the quarter. A substantial part of the dollar exchange which Chile has to have for these purposes is obtained from the sale of natural Chilean nitrate of soda in this country. Sales of Chilean nitrate here in 1941 have been running ahead of the figures last year."

MORE ABOUT Demonstration

During the brief business session, the Federation voted to hold its spring tour on June 3, making a trip to Norfolk Gardens.

The Flower Show was held in the Community House and featured a tea at 4:15, served in a miniature garden, on the grounds. Picturesque arrangements included an old-fashioned well, with tea served from "an Old Oaken Bucket."

Judging of entries took place earlier in the day, and was handled by Miss Pauline Smith, district home demonstration agent, who was unable to remain for the entire program.

The Hertford Woman's Club captured the majority of the awards in the show. Blue ribbons were awarded to the following:

Specimen, Hertford Woman's Club; Table Arrangement, Hertford Woman's Club and Home and Garden Club; Leaf arrangement, Belvidere Club; Miniature arrangement, Hertford Woman's Club; Collection, Hertford Woman's Club; Flowering Shrubs, Hertford Woman's Club; Potted Plants, Chapanoke Club.

Perquimans 4-H Club members received the following blue ribbon awards:

Specimen, Jane Griffin; Miniature, Mary Inez Chappell; Collections, Alma Davenport.

Exhibits were left at the Community House until 6 o'clock to give those who had no opportunity to visit the show earlier a chance to see them.

BALLAHACK CLUB MEETS

Ballahack Home Demonstration Club met Monday afternoon, May 12, with Mrs. Percy Rogerson. The meeting was opened by singing "America, the Beautiful", after which the Collect was repeated. An interesting program was presented by Mrs. Clinton Perry on "Foods and Nutrition." Mrs. Freeland Elliott, Mrs. A. J. Parrish and Mrs. Bristow Perry gave interesting readings on Foods. Miss Maness gave a demonstration on hanging pictures.

An enjoyable game was led by Mrs. Carlton Chappell and all took part.

During the social hour the hostess served fruit and candy.

Members present included Mesdames Percy Rogerson, Josephine Ward, Murray Elliott, Jim Perry, Bristow Perry, B. P. Monks, M. R. Dail, Nixon Hollowell, Carlton Chappell, A. J. Parrish, Alton Stallings, Archie Lane, Pallen Lane, Freeland Elliott, H. S. Lane, Clinton Perry, J. M. Sutton, H. V. Baker and Miss Frances Maness. Three visitors included Mrs. Archie Stallings, Mrs. John Rogerson and Miss Ruth Hollowell.

Supervisor School Held This Week At Agriculture Building

A school for County Compliance Supervisors was held at the Agricultural Building on Thursday and Friday under the direction of J. C. Broome, district officer, and Willis Jessup, County Supervisor, according to L. W. Anderson, Perquimans County Farm Agent.

The school discussed the problems arising with the checking of the compliance of the Farm Program for this year.

Mr. Anderson also announced on Wednesday that all contracts and rights of way for the rural electric line running from the E. L. Chappell Service Station to the B. C. Winslow farm near Goodwin's Mill had been obtained and that it is hoped the work on this line will be completed within a short time. The line will serve 13 farm residences in that

"THE LADY EVE"

IT'S LOVE—Henry Fonda stoops and—Barbara Stanwyck conquers. The amorous scene is from their new co-starring comedy, "The Lady Eve," written and directed for Paramount by Preston Sturges, showing Monday and Tuesday at State Theatre, Hertford. Matinee 3 P. M.

A new electric project of running a line from the Edenton Highway to Bethel has been started and several contracts for this line have already been obtained.

The County Agent also reported that the Peanut Experimental work, under the direction of a specialist from N. C. State College, conducted for the past several years on the Joshua T. White farm will again be done this year. Through this experiment it is hoped to find a control measure for Southern Root Rot. The work consists of checking variety, soil treatment, and the like.

Royal Master Owners RELAX... Never Worry About Tire Trouble

THEY FEAR NO SKIDS. When brakes are applied—the seven continuous ribs break up into tilted, sharp-edged tread blocks—bite through the film of water, dust and oil to control skids, stop you quicker, straighter, safer.

THEY GET TEMPERED RUBBER. now improved with a secret compound to give it greater resistance to heat, even more mileage—dick tempered Rubber tread can be regenerated to give nearly double the non-skid wear.

THEY FEAR NO BLOWOUTS. Outside ribs on a curve may carry double the normal load, a terrific strain on the cord body. Safety Bonding saturates cords in latex to resist blowouts from strain, speed, heat.

THEY GET SMOOTHER RIDES. The seven ribs give "railroad-track" stability—a smoother, flowing ride without bump, white or rumbly. Electors in the grooves (right) eliminates stones that often cut the tread.

Quality in Tires—The Key to Safety

"WHERE SERVICE IS A PLEASURE"
HERTFORD, N. C.

The figures include all the above-ground portions of the plant, and in the case of potatoes, sweet potatoes, sugar beets, and peanuts, include also the harvested part of the roots. It is apparent at once that crops differ considerably in the nutrients they contain. Also noticeable is that the nitrogen and potash are higher than the phosphoric acid. Thus a

over several times these amounts of plant foods. Thus greater amounts of commercial fertilizer are being used to more fully return to the soil the plant foods removed by crops. With careful soil management and the use of fertilizer adapted to the soil and crop grown, the fertility of the soil can be maintained and even increased.
