

Farmers Asked To Sell Scrap As Defense Aid

An urgent appeal to farmers of Perquimans County to market their scrap iron as a part of a national scrap iron collection campaign was made this week by L. W. Anderson, secretary of the Perquimans County USDA Defense Board. Iron and steel collected will be used in the National Defense Program.

Mr. Anderson said that Secretary of Agriculture Wickard has called on American farmers to cooperate in the national campaign now under way to help provide necessary iron and steel supplies for the Defense Program. Information received by the Defense Board emphasizes that America needs all the scrap iron and steel it is possible to get, he declared. Steel, he said, not only is needed for production of munitions, but also for making farm machinery.

In a letter to the North Carolina USDA Defense Board, Secretary Wickard said: "The Office of Production Management has been putting on a drive to increase the flow of scrap metal from the cities. They have requested the aid of the Department of Agriculture in increasing the flow of scrap from farms. I am therefore requesting that every Defense Board put on a drive to get farmers to market their scrap iron and steel. The financial returns cannot be expected to be very large, but the results will be important to farmers and to our whole defense effort."

Farmers are being asked to market their scrap iron at current prices, which are those that have been set by OPM. Mr. Anderson emphasized that the Government does not want farmers to scrap useful machinery. Where machinery is being kept for parts be taken off the machines and stored, and the remainder of the metal sold for scrap.

State Farmers Urged To Order Chicks Now

The Government's call for an 11 percent increase in egg production in 1942 is a direct hint to North Carolina farmers to place their orders for baby chicks early, says C. F. Parrish, extension poultryman of N. C. State College.

At the beginning of the 1942 season, Parrish predicts that hatcheries will have their hands full in filling orders. In order to be sure of delivery at the time they want the chicks, farmers should anticipate their needs and place their orders now.

When buying chicks, the State College poultryman said farmers should make every effort to obtain stock that is "bred to lay." This is important in any year but will be even more vital in 1942 in view of Uncle Sam's request for more eggs.

Under production goals set up for the nation, North Carolina is expected to produce 65,120,000 dozen eggs next year as a part of the nationwide food-for-freedom program. This is an 11 percent increase over the estimated production for 1941.

While called on to help supply a part of the eggs needed by the British, North Carolina would do well to produce more eggs for her own people, Parrish said.

He explained that even if the State meets the minimum goal of 65,120,000 dozen eggs, this would mean only 219 eggs for each North Carolinian without shipping out a single egg. Nutritionists advocate that a person consume at least one egg per day.

In some cases, Parrish said, farmers are finding it profitable to exchange old hens for chicks and feed.
