DO NOT QUIT: And let us not be weary in well-doing; for in due season we shall reap if we faint not.—Galatians 6:9.

The Ford Fortune

It appears that Edsel Ford, president of the Ford Motor Company, bequeathed the major part of his estate to the Ford Foundation, which will use most of an estimated \$200,000,000 for "scientific, educational and charitable purposes."

Mr. Ford's will illustrates the commendable generosity of many rich Americans, who after amassing huge fortunes, give them to the public after their death.

How About Drafting Miners?

The solution to the problem of the miners, if the strike is renewed, is easy. Congress should promptly pass a law, empowering the President to draft miners for the public service, using the Selective Service machinery, and enrolling all necessary miners in the service of the Government.

Thereafter, the miners would be treated as soldiers, receive \$50 a month and carry out military orders. If they disobeyed the orders of superior officers, they would be subject to the same penalty as soldiers in battle zones.

This suggestion may sound drastic, but, in essence, there is no reason why striking miners should be allowed to imperil the security of the country. By going on a strike against their government, they create a situation of peril which the government must meet in order to exist.

Food Production Is The Need

In all the talk about food, domestic and foreign, it will be well to think less of controlling and apportioning what is available, and consider to greater extent how to produce more. That is the end question, production. Happily, Herbert Hoover, in his latest approach to the problem, swings more to that line.

He is correct in his view that American cities will have even less food supply in the coming months, and next winter, than they have had in recent days. He is right in declaring that even so Americans will not starve. The reduced diets in American cities are still on a lush and luxurious plane by present international standards.

When he says that if the war in Europe should come to an end within the next 12 months "we should have no consequential food supplies with which to meet three or four hundred millions of starving people" he accurately assesses one of the potential tragedies of these times.

All this underlines the necessity for extraordinary, even colossal food production in the United States. Mr. Hoover barely suggests the need when he asks for the planting of from 40 to 50 million additional acres next year. What are other needs? We suggest a few: a price structure that will give incentive for the right sorts of crops, better organization and financing of smaller farmers, more reliable guarantees of harvest hands, provision of adequate machinery and fertilizer, improved use of dairy products, and, above all, definite, intelligent planning for the immediate needs of freed peoples, needs that include—so they may help themselves—barnyard animals and farming implements as well as sustaining rations.—Christian Science Monitor.

The long history of mankind suggests that there is little occasion for one puny little fellow, no matter how great his zeal, to become hot and bothered with the foibles of men and women, unless they are his own.

That Nagging Backache

May Warn of Disordered Kidney Action
 Modern life with its hurry and worry, irregular habits, improper eating and drinking—its risk of exposure and infection—throws heavy strain on the work of the kidneys. They are apt to become over-taxed and fail to filter excess acid and other impurities from the life-giving blood.
 You may suffer nagging backache, headache, dizziness, getting up nights, leg pains, swelling—feel constantly tired, nervous, all worn out. Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.
 Try Doan's Pills. Doan's help the kidneys to pass off harmful excess body waste. They have had more than half a century of public approval. Are recommended by grateful users everywhere. Ask your neighbor!
