

## Payments To Dairy Producers Based On Sales Records

All dairy farmers of Perquimans County should keep accurate records of sales of whole milk, cream, or butter in order to obtain payments which will be made to farmers by the War Food Administration to offset increases in dairy feed costs since September, 1942, it was announced today by Dr. E. S. White, chairman of the County AAA Committee.

"This payment was announced some time ago by the War Food Administration, and at that time farmers were asked to maintain records of all sales," he said. "These records are essential if farmers are to receive their payments. The rate of payment in all North Carolina counties has been set at 40 cents per 100 pounds for whole milk and 5 cents per pound for butterfat. Since payments are based on poundage, dairymen should make certain that records furnished them by buyers show the hundred-weight, and not merely the quantity of butterfat in the milk."

Payments to producers will be made by draft direct upon submission to

the County AAA Committee of satisfactory evidence of the quantity of milk or butterfat sold. Present rates will be applicable to sales during November and December.

Dr. White said statement normally furnished producers selling whole milk to cooperative associations, milk distributors, or evaporated plants, cheese factories, or other such concerns will constitute satisfactory evidence, provided the statement shows the quantity of whole milk delivered. Likewise, he said, receipts furnished producers by creameries for butterfat will constitute satisfactory evidence. Producers selling milk through retail outlets or selling butter to consumers, local stores, or others should obtain receipts from the buyers as other evidence of sale.

Chairman White said it is expected that first payments will cover October deliveries of dairy products, but the exact time will depend upon availability of necessary forms which will be forwarded to County AAA Committee as soon as they can be printed.
