

TOWN AND FARM IN WARTIME

Ration Reminder

FUEL OIL—Period 1 coupons are good through January 3. Period 2 coupons become good November 30.

SUGAR—Stamp No. 29 in Book Four is good for 5 pounds through January 15th, 1944.

SHOES—Stamp, No. 18 in Book One is good for one pair. Stamp No. 1 on the "airplane" sheet in Book Three good for one pair.

MEATS, FATS—Brown stamps G, H, J, and K good through December 4. Brown stamp L becomes good November 21 and remains good through January 1, 1944.

PROCESSED FOODS—Blue stamps X, Y, and Z good through November 20. Green stamps A, B, and C in Book Four good through December 20.

Simplify Gas Rationing

All "B" and "C" gasoline coupons issued after December 1 will be worth five gallons each compared with the present value of two gallons for coupons of those types in the East and Midwest, and three gallons in the far West. This means "B" and "C" books will contain fewer coupons than in the past, but each coupon will be good for more gallons than before. No increase in the amount of gasoline allowed is involved.

Farmers To Get Batteries

Approximately 20 percent of the fourth quarter production of flashlight batteries will be distributed to farmers, according to WPB. This makes enough batteries for about normal rural consumption available through farm outlets.

Fertilizer Outlook

American farmers will have more nitrogen and slightly less potash in the 1943-44 "fertilizer year," than they had in the previous year, according to the testimony of WPB officials before a Senate sub-committee on agriculture and forestry. Farmers should have four tons of nitrogen for every three they had last year, according to present indications. WPB is endeavoring to make additional quantities of potash available for agriculture in 1944-45.

More Hosiery For Children

Production of infants' and children's hosiery will be stepped up shortly as a result of priority assistance given to manufacturers for procurement of necessary yarn. The WPB action resulted from a falling supply of infants' and children's stockings.

Step Up Truck Production

A four-fold increase in its 1944 civilian truck production program has been announced by the War Production Board. So important is this program that it has been given priority ratings equal to aircraft and high octane gas. Provisions are also made for production of replacement parts

for civilian use. In spite of the four-fold increase, the new goal of 123,492 trucks is still far short of the pre-war production of approximately 700,000.

Urges Farmers To Cut Trees

Harvest of war-needed lumber and other wood products from the 139,000,000 acres of productive woodland on farms can be sharply increased without danger to the future supply, according to the Department of Agriculture. If farmers would consider farm woodlands and farm forests as cropland, and every year carefully cut selected trees that are ripe for harvest, they would be surprised at their returns and "they would certainly aid the war effort," H. H. Bennett, chief of the Soil Conservation Service, said.

Temporary Food Rationing

Service men on leave can get temporary food rations without the forms usually furnished by the armed services, according to OPA. In an emergency, application may be made on forms available at local ration boards.

Scrap Drive To Continue

The "Victory Scrap Bank" Drive, scheduled to end November 15, has been continued indefinitely. H. M. Fault, director of the Salvage Division of WPB said: "As long as the war lasts, there will be a continuing need for iron and steel scrap to keep the mills well supplied. The collection of iron and steel scrap from all sources must be a continuing operation."

Start Consumer Survey

Census enumerators expect to visit 7,000 households in a nation-wide survey, to determine the availability of 115 types of goods. As a result of these studies, the Office of Civilian Requirements will have information from consumers to aid it in carrying out its function of maintaining an adequate supply of necessary civilian goods within wartime limits of manpower, materials, and manufacturing facilities.

How To Address Merchant Seamen

Because letters from home are as big a factor in maintaining morale of merchant ship crews as they are with soldiers, bluejackets, and marines, the War Shipping Administration has relaxed regulations to speed movement of mail. A seaman in a foreign port may advise his family and friends how to address mail to him by including the name of his ship in the letters enclosed in envelopes, but not on outside envelopes. To address a seaman, this form should be used: first line, seaman's name; second, name of his ship; third, "Care of Postmaster"; and fourth, New York, New Orleans, or San Francisco, according to the coast from which the addressee sails. Return address should appear in upper left corner, and name of steamship line in lower left corner.

Italians Harvest N. C. Peanut Crop

Italian prisoners of war used this fall on Eastern North Carolina farms were important in saving the peanut crop.

"They did their work well, and the military authorities supervising them were very cooperative with our farmers," commented Dean I. O. Schaub, director of the Agricultural Extension Service at State College. "There was absolutely no trouble from either the workers or the local people."

The prisoners were stationed at three camps, at Tarboro, Windsor and Scotland Neck. Reports from the farm agents in the counties where the Italians worked show that other crops were saved also because the local help was released to work those fields.

Prisoners at the Tarboro camp worked in Edgecombe, Nash and Pitt counties. Approximately 432 worked every day for 18 days for 141 different farmers. They covered 2,523 acres and stacked 100,930 piles of peanuts.

At the Windsor camp, 423 prisoners worked 21 days in Bertie, Martin, Hertford and Chowan counties. They were employed by 253 farmers on 3,148 acres and completed 125,917 stacks.

One hundred and sixteen Halifax, Northampton and Martin county farmers used the 451 prisoners at the Scotland Neck camp for 18 days. This group covered 3,026 acres of peanuts and 121,071 stacks.

With the use of this labor, which the farmers called the best imported labor they could have had, the peanut crop was harvested. Although the Italians knew nothing about stacking peanuts when they arrived, the county agents report that they soon caught on under the supervision of the farmers for whom they worked.

Save Lespedeza And Soybean Seed

Lespedeza and soybeans provide more than one-half the hay grown in North Carolina, and since the seed for both of these crops is short, growers should harvest soybeans and lespedeza this year even on lands where such practice is non-profitable because of low yields, suggests Dr. E. R. Collins, State College Extension agronomist.

"How are we going to feed our dairy cows, our beef cattle, and our work stock, if we can't get enough seed to plant the necessary hay crops," Collins says.

Some counties are making relatively good yields of soybeans, but the variety grown there may not be suited to the section where low yields were made this year and the seed supply is relatively short.

"If all the lespedeza seed produced in North Carolina could be kept here, the supply would be adequate. However, the lespedeza crops from Tennessee, Arkansas and other states are short and they have been seeking seed in North Carolina," Collins reports.

Summarizing the local situation, he says: "Soybean and lespedeza seed crops are short in North Carolina this year due to weather beyond our control. Growers should save all lespedeza and soybean seed possible, even under conditions ordinarily considered non-profitable. That bushel of soybeans or that pound of lespedeza seed, multiplied by all the patriotic farmers in North Carolina, is just as important on the home front as the last bullet or hand grenade is to the soldiers on the firing line."
