### Continue Farm Pork Sales

Farmers may continue the sale of pork from home-slaughtered hogs without a license or permit and may deliver any quantity of pork to persons not living on the farm, until March 17, the War Food Administration has ruled. However, farmers are required to collect ration stamps for pork so delivered.

### Trucks Move 98% of Farm Crop

Largely as a result of the cooperation of farmers and truck operators with the transportation conservation plan, about 1,600,000 motor trucks, mostly farmer-owned, moved 98 per cent of last year's huge farm crop at some stage of the journey from farm to market, the Office of Defense Transportation says. Other farm transportation programs now operating include the movement of livestock, cotton, fresh fruits and vegetables, citrus fruits and poultry.

### No Metal Ice Box In Near Future

Production of pre-war models of all-metal domestic ice refrigerators will not be resumed in the near future, the War Production Board said, mainly because reversion would involve a long change-over period. The hardboard and wood war model is now being produced at almost four times the pre-war rate.

### Food For U. S. Civilians

Civilians in the United States will have more frozen vegetables during the next five months as a result of an expected all-time record high production, WFA has announced. Usually available in frozen form are snap beans, corn kernels, peas, spinach, asparagus, broccoli, brussels sprouts, cauliflower, and corn on the cob. U. S. civilians will have slightly less rice in 1944 than during recent years and less canned milk than during 1943, although the amount of

canned milk available will be in approximate proportion to civilian purchases under rationing, which began in June, 1943.

**Agricultural Conservation Program**—The 1944 program for U. S. agricultural conservation practices, designed to guide six million farm families in getting maximum production from their land, has been announced by WFA. Among the most important practices are those dealing with application of lime and phosphate, which give the soil greater "fire-power," immediately boosting production at low cost. If present acreage of cultivated land is managed well, said N. E. Dood, chief of the Agricultural Adjustment Agency which manages the conservation program, U. S. farmers will not have to plow up grasslands as they did in the last war. "The dust storms and erosion that followed that first plow-up became a national catastrophe," he declared.

### Less Paper For Packages

Fewer package wrappings will be available for retail shoppers this year, according to WPB. Shortage of wood pulp for paper-making will not permit a normal supply. There will be enough bags for assorted groceries, WPB said, if housewives save these bags and take them back to stores for their own re-use. WPB also advised that the shopping bag with handles must be used many times to substitute for individual package wrappings.

### German U-Boats Lose Their Punch

The amount of merchant ship tonnage sunk by German U-boats during January was among the lowest monthly figures for the whole war, according to a joint Anglo-American statement issued last week by the Office of War Information.

### Round-Up

Because of an increased demand for electric fence controllers, a substantially greater amount of these devices will be produced in the year ending June 30, 1944, than in any previous year, WPB said. . . . Manufacture of packing trunks, with iron and steel frames, is permitted for civilian use, WPB announced. . . . This year civilians in the United States will get about 53 out of every 100 pounds of evaporated milk, 158 million pounds of dried skim milk, and 19 million pounds of dried whole milk, WFA announced. These quantities are less than the amounts received by civilians last year. . . . Broom production is seriously curtailed because of acute shortage of broom-corn and handles, WPB reports, and broom handle production may even continue to decline. . . . OPA has reduced the ceiling price of fresh-sliced codfish to four and one-half cents per pound in winter and three cents per pound in summer. . . . Total U. S. war casualties as reported by OWI February 9 were 150,478, including 34,179 dead, 51,292 wounded, 34,746 missing, 30,261 prisoners of war. . . . A shortage of large size tires may delay putting into use some of the newly complete farm tractors, according to the Tractor Industry Advisory Committee of WPB. . . . Hosiery dealers cannot force a customer who wants to buy fine gauge women's rayon hosiery to also buy coarser or heavier gauge women's hosiery, OPA says.

## Sentinels of Health

### Don't Neglect Them!

Nature designed the kidneys to do a marvelous job. Their task is to keep the flowing blood stream free of an excess of toxic impurities. The act of living—life itself—is constantly producing waste matter the kidneys must remove from the blood if good health is to endure. When the kidneys fail to function as Nature intended, there is retention of waste that may cause body-wide distress. One may suffer nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—feel tired, nervous, all worn out. Frequent, scanty or burning passages are sometimes further evidence of kidney or bladder disturbance. The recognized and proper treatment is a diuretic medicine to help the kidneys get rid of excess poisonous body waste. Use Doan's Pills. They have had more than forty years of public approval. Are endorsed the country over. Insist on Doan's. Sold at all drug stores.
