### Income Tax Refunds Being Made Rapidly Collector States

Believing that every effort is being made to expedite refunds on 1943 income tax returns, C. H. Robertson, Collector of Internal Revenue, said refund checks are being mailed to taxpayers of the North Carolina District at the rate of 3,000 per week.

"To every taxpayer of this district who is entitled to a refund on his 1943 return, I would like to say," collector Robertson stated, "your refund is being processed as rapidly as possible. I cannot tell you exactly when your refund will come through, because it might be today and it might not be for a few months. But I can promise you that you will be paid interest at the rate of six per cent per year for every month your refund is delayed after March 15.

"Throughout the country we have about 18,000,000 refunds to make. In each case, the return must be compared with employers' withholding tax receipts and other documents. In many cases, returns contain errors that must be corrected.

"This involves a tremendous amount of work that must be done with a comparatively small staff, due to wartime manpower shortages. Obviously, the entire 18,000,000 refunds cannot be completed at the same time, and some taxpayers must wait another few months."

### COOPERATIVE EXTENSION WORK

IN AGRICULTURE AND HOME ECONOMICS STATE OF NORTH CAROLINA

Extension Service County Demonstration Work

Hertford, North Carolina. January 17th, 1942.

Ferguson Manufacturing Company, Suffolk, Virginia. Gentlemen:

Perquimans County Peanut Growers purchased over thirty of your Peanut Digging Machines in 1941. Although many similar machines have been tried out in this County during the past twenty-five years, yours is the first one that has proven practical and efficient. Our peanut producers are well pleased with your machine. It proved to us a labor saver and time saver in harvesting the 1941 crop. It also saved a larger per cent of the peanuts than is generally saved by usual harvesting methods and equipment.

Mr. Geo. W. Nowell, Winfall, N. C., Star Route, was in my office today, and stated that he would not take \$500.00 for his machine unless he could get another. He also said that hogs would starve to death in a peanut field where the crop was harvested with one of your machines, which indicates the efficiency of your peanut digging machine.

Our labor supply is being constantly reduced by the "Selective Service Act" and Industrial Defense Projects. The National Defense Program is calling for considerably larger acreage of peanuts in 1942 to supplement the supply of vegetable oils for National Defense. In view of the existing situation in this area, I sincerely hope you will be able to supply our peanut growers' need for peanut digging machines in 1942, otherwise I doubt if our growers will be able to harvest the usual acreage of peanuts with the seriously reduced supply of farm labor.

Very truly yours,

L. W. ANDERSON, County Agent Perquimans County.

## Goodrich Diggers Save Time and Money

SAVES MORE PEANUTS

about it no more.

SHAKES ALL DIRT

Stony Creek, Va., Jan. 24, 1942. Dear Sirs: I used a Goodrich Digger last year and I found it perfectly satisfactory. It will save 50% in labor and it will save more peanuts than any other way I ever tried. I have 3 other diggers that will only plow them up once to the row and I thought they were the real diggers until I purchased the Goodrich Digger. Now I do not think a farm is equipped to handle a crop of peanuts without a Goodrich Digger. As farmers have a very short period to dig their peanuts in and they want to leave them as long as possible to mature without worrying about frost — I say just buy a Goodrich Digger and worry

Yours truly, C. L. BAIN.

SAVED HIM 50% IN LABOR

Wakefield, Va., Jan. 17, 1942. Gentlemen: In regard to the Goodrich Digger, I will say it is the only digger I know that will give a satisfactory job. I have been using them for 10 years and I feel like the farmers in this section would be at a loss to harvest peanuts without them.

The digger saves just about 50% of the labor and that is a big item now due to the few available men left to help with farm work.
