 (4) Failure to grant the credit to the British would force socialization into that country at emergency speed and might force the British to adopt the method of totalitarianists as a matter of necessity.
 In addition, he concluded that the loan would enable the Bretton Woods institutions to perform their intended functions and pointed out that experienced leaders of labor, agriculture and business, representing a combination "almost never encountered in the legislative process" were in favor of the measure.

HOUSE PASSES BILLS TO EXEMPT BUSINESSES

Not so long ago the government attempted to bring the fire insurance companies under antitrust laws through a court test. So what? The House promptly passed a bill exempting the companies from the operation of the law.
 Then Gov. Arnall, of Georgia, filed

an anti-trust suit against the railroads and what happened? The House immediately got a bill to exempt the railroads.

The Federal government also tried to collect royalties from oil companies, extracting petroleum from tidelands. You guess right! The House passed a bill to exempt the companies.

In the three cases cited the House took action designed to head off the Supreme Court from making a decision that might affect the business interests involved.

Recently, the House moved to affect the O. P. A. It requires no prophet to say that its action strongly followed the lines suggested by various business organizations, which are strictly concerned with profits for their members and not much worried about what might happen to the ordinary.

NEWS ITEMS EXPLAIN WHY RUSSIA SEEMS DIFFICULT

The difficult task of trying to get along with Soviet Russia is illustrated by items taken from one day's news:

(1) At Paris, where the four power peace conference got underway, the Russians differed with the United States and France as to making a settlement with Austria or one concerning the Ruhr.

(2) In New York the Soviet opposed the idea, favored by a majority, that an investigation of the Franco regime is advisable before any further action is taken on the Polish thesis that Spain constitutes a threat to international peace.

(3) Washington discloses that the reply from Moscow, answering U. S. complaints about the removal of industrial equipment from Manchuria, is regarded as unsatisfactory.

(4) A private news dispatch from Budapest relates that American businessmen find it difficult to obtain passes required for travel from the Russian commander of the Allied Control Council.

Finally, from Frankfurt, Germany, comes the information that the great U. S. Army of 3,000,000 veteran troops has been reduced to less than 400,000 soldiers, most of them untested in battle experience.

ICELAND DECLINES TO GRANT U. S. RIGHT TO HOLD BASES

The United States is not meeting with much success in its effort to persuade Iceland to permit permanent occupation of military facilities in that country and the Prime Minister of Iceland has declined to enter into discussion on the subject.

It will be remembered that American forces entered Iceland in 1941 to head off a threat that the Germans might attempt to seize that country and that we promised, at that time, that our forces would be withdrawn "immediately on the conclusion of the war." Peak strength in the island reached about 45,000 men, but most of them have been withdrawn and not many more than 1,000 Americans are in Iceland, operating air communication with occupation forces in Europe.

The United States, in approaching Iceland, promised to exercise all rights granted with full regard for the sovereignty and independence of Iceland. The reaction from the government of Iceland was that it had no intention of granting permanent military bases to the United States but it was believed that negotiations might make progress.

The negotiations seem to be stalled by hints from Moscow of counter-proposals that involved Soviet bases on Spitsbergen and places in the Baltic. As a result, according to reports, Iceland and Scandinavia became disturbed, fearing that the big powers might grab bases for future use.

Kidneys Must Work Well—

For You To Feel Well
 24 hours every day, 7 days every week, never stopping, the kidneys filter waste matter from the blood. If more people were aware of how the kidneys must constantly remove surplus fluid, excess acids and other waste matter that cannot stay in the blood without injury to health, there would be better understanding of why the whole system is upset when kidneys fail to function properly.
 Burning, scanty or too frequent urination sometimes warns that something is wrong. You may suffer nagging backache, headaches, dizziness, rheumatic pains, getting up at night, swelling.
 Why not try Doan's Pills? You will be using a medicine recommended the country over. Doan's stimulate the function of the kidneys and help them to flush out poisonous waste from the blood. They contain nothing harmful. Get Doan's today. Use with confidence. At all drug stores.
