Farm Safety Week Slated July 25-31

In proclaiming the period July 25-31 as National Farm Safety Week, President Truman points out that "needless hazards on the farms of our nation continue to cause thousands of accidents each year which could be prevented by a positive safety program."

Goal for the 1948 observance, which is sponsored by the National Safety Council and the U. S. Department of Agriculture in cooperation with a number of other organizations, is the elimination of at least 30 million farm hazards. Each farm family is being asked to accept responsibility for eliminating at least one hazard for every member of the family.

The long-range purposes of National Farm Safety Week are to make

every American farm and every American farm resident as safe as possible, to cut the annual toll of needless deaths and injuries to a minimum, and to make farm life safer, happier and more prosperous.

Estimates by the National Safety Council show a 52 per cent increase in motor vehicle deaths to farm residents from 1944 to 1947. In other types of accidents, about 4,300 workers were killed and approximately 300,000 workers were injured in 1947. If the 1947 non-work toll was similar to that of 1946, the National Safety Council believes the final figures will show 14,000 non-work deaths and 1,400,000 non-work injuries to farm residents.

Cotton Production Tops 452,000 Bales

Production of cotton in North Carolina during the 1947 season totaled 452,000 bales of 500 pounds gross weight, or 12,000 bales more than was produced from the 1946 crop, according to Frank Parker, chief statistician of the Federal-State Crop Reporting Service. Ginnings, as enumerated by the Census Bureau, totaled 457,980 running bales.

The acreage harvested during the 1947 season was placed at 647,000 as compared with 570,000 the previous season and a 10-year (1936-45) average of 828,000 acres.

Lint cotton yielded an average of 335 pounds per acre compared with 370 pounds from the 1946 crop and the 10-year average of 348 pounds.

Cotton and cottonseed produced from the 1947 crop was valued at \$87,220,000, compared with \$84,442,000 for that of the 1946 crop. Prices received by farmers for lint cotton sold to May 1 averaged 32.3 cents per pound compared with 32.65 cents for the 1946 season.

The 1947 cotton crop for the United States was 11,851,000 bales of 500 pounds gross weight. This was slightly over three million bales more than the small 1946 crop but 539,000 bales less than the 1936-45 average. The combined value of the national cotton and cottonseed crop was computed at \$2,291,202,000, the second highest on record.

Student Council At Chowan High Elects New Officers

The student body of Chowan High School met May 14 with Sarah Jordan presiding and elected new officers for the coming year.

The president stressed the importance of the Student Council and the duties of the officers. She also stressed that next year it is expected to have a more successful Student Council that will continue to grow and be of great service to the school.

New officers elected were: President, James Dail; vice president, Billy Gray Leary; secretary, Doris Jean Nixon; treasurer, Leon Bunch; sergeant-at-arms, Kelly Byrum.

The out-going officers are: President, Sarah Jordan; vice president, James Dail; secretary, June Blanchard; treasurer, Lessie Mae Davidson and sergeant-at-arms, Ernest Boyce.

New Method

"What are you doing, darling?" asked the man.
 "Balancing my check book," replied the industrial wife.
 "How do you do that, when you don't even number your checks?" asked the dubious husband.
 "Well," replied the cheerful mate, "I try to remember the different checks I wrote while shopping, then I add forty dollars and call it present balance."

SOIL CONSERVATION NOTES

Frank Skinner has a good growth of Kentucky-31 Fescue grass that he plans to combine for seed. These seed should be ready between June 10 and 20. This is a type of grass which is being tried in this area as it appears to be well adapted for pasture on wet lands. Like rye grass, it remains green all winter and dies down in early summer, but unlike rye grass, it starts growth again during late summer and early fall and does not have to be re-seeded.

Soil Conservation Service technicians working with the Albemarle District have been surveying a ditch for Abe Godfrey of New Hope. Mr. Godfrey plans to cut this ditch to grade by hand to drain a low area in his field.

Luther Turner in New Hope community is receiving benefits from his white clover pasture that he seeded last fall. He seeded two and one-half acres pasture in October and has had four cows on it since the first of April. Luther said, "The only trouble was that I waited several years too long before seeding his pasture." There is quite a difference in the amount of grazing furnished by a properly seeded and fertilized pasture than just a field with a fence around it.

From the lowest depths there is a path to the loftiest height. —Carlyle.

Sunday School Lesson

(Continued from Page Seven)
 ished, declaring, "Lo, I see four men loose, walking in the midst of the fire, and they have no hurt and the form of the fourth is like the Son of God." Going to the mouth of the furnace,

he called, "Ye servants of the most high God, come forth." They obeyed and to the surprise of everyone, they were unhurt.

Nebuchadnezzar was so impressed by the incident that he acknowledged that the Jews worshipped the true God and changed his decree, stating that all who spoke against the God of Shadrach, Meshach and Abednego should be destroyed, along with their property, "because there is no other God that can deliver after this sort."

The experience of Daniel in the lion's den is so familiar it needs no repetition here. Darius, the king, was tricked into issuing a decree against anyone's asking help of any god or man, for a period of thirty days, except the king. Any who disobeyed the king's decree should be cast into a den of lions. Even though Daniel knew of the law, he continued to pray as he had always prayed to God—with his windows opened and with his eyes turned toward Jerusalem.

Reported by his enemies, Darius who thought so much of Daniel he had placed him in one of the highest official positions in his kingdom, realized he had been trapped. He tried hard to have him excused but the officers held him to his decree. As he condemned Daniel to the den, he spoke these words of encouragement, "Thy God whom thou serveest continually, he will deliver thee." And God did deliver him, with the result that Darius issued a decree that God should be worshipped, for he was the living God and could save from danger.

Irving C. Tipton, in The Upper Room, declares: "The most significant thing about Daniel's experience in the lion's den was not that he escaped injury, but that no harm came to his spirit. The most significant thing about Shadrach, Meshach and Abednego and the fiery furnace was not that they came out unscathed, but that their spirit withstood the fires of

persecution... Though we pass through great calamities, if we keep our faith, God will bring us into a wealthy place. It is after tumult and fires of life that we hear the 'still small voice'."

IT TAKES Four Leaves!

It's your good luck—the day you discover the superiority of our dry cleaning methods.

We're not pleased until YOU are—and our skilled operators give every garment the individual attention that fine work demands.
