The Big Oil Interests vs The People of North Carolina

NORTH CAROLINA will not be deceived by the Big Oil Interests and their imported propaganda expert. If Big Oil is so concerned about the people of our State and our pocketbooks, why did they raise the price of gasoline within the last four months? The truth is obvious. They are fighting the Road Bonds because the only increase in taxes to pay for the Bonds will be the 1c per gallon increased gasoline tax. Evidently, if there is any increasing to be done, Big Oil wants it all.

Big Oil attempts to scare-confuse-and-defeat by saying how much money the State will have without the Road Bonds. But they don't tell you that the war-accumulated surplus is about used up. They don't tell you that WITHOUT THE ROAD BONDS, THE HIGHWAY COMMISSION WILL NOT HAVE AS MUCH MONEY TO BUILD ROADS IN THE NEXT THREE YEARS AS IT WILL HAVE SPENT IN THE PAST THREE.

The Road Bonds are absolutely needed if North Carolina is to carry out its PROGRAM OF PROGRESS.

We stand now on the threshold. Every time North Carolina has acted courageously to invest in its own people and future the result has been magnificent. SO SHALL IT BE again on June 4th when the decision of "The Big Oil Interests vs. The People of North Carolina" is rendered at the polls.

ROAD FACTS

What Is The Better Roads Program?
The plan calls for the paving of 12,000 miles of secondary roads and placing 35,000 miles of roads in all-weather conditions.

Who Will Benefit From This Program?
Directly or indirectly, every man, woman, and child will benefit. For example, only one-third of the miles traveled by school buses are now paved. Products to market problems will be eased for thousands. Nor will the city folks who benefited most from the Road Program of the 1920's be helping only their rural fellow citizens. If the financial pressure for secondary road improvements is relieved, the Highway Commission will have more money to spend for primary roads. Good roads are good for everyone.

Who Will Pay For The Program?
Highway users. The Road Bonds will not increase land taxes, income taxes, sales taxes, etc. Repayments on the bonds will be made from highway funds, not the General Fund. We repeat for emphasis. The only increase in taxation will be the 1c per gallon increased gasoline tax.

Can The Program Be Completed In Four Years?
The bonds will be issued only as they are needed and only as the money can be used wisely and economically. It is not anticipated that the program can be completed in four years but the authorization for a full program is necessary for sound planning.

Why Not Authorize The Bonds Gradually?
Although, as just stated, the money need not be borrowed all at one time, sound planning necessitates its being authorized all at one time. If the Highway Commission knows the money is available, road plans can be projected on a broad scale. Proper planning will enable builders to operate on long stretches at a time. This will speed up construction and save money. The expensive cost of moving heavy equipment from one small job to another can be minimized. Long haul of material from its point of origin can be reduced.

Who Will Say Where, When, and How The Money Is To Be Spent?
The law specifies how much is to be spent in each county. There can be no question therefore of equitable distribution. The Council of State will approve the sale of the bonds as the money is needed. The State Highway Commission will make the contracts.
