Good Practices Pay

Use of cover crops, contour cropping, meadow strips, and other improved farming practices has paid off in a big way for Eugene Jeffries of Route 3, Burlington, winner of the 1949 State soil conservation contest for Negro farmers.

According to J. Frank Doggett, soil conservationist for the State College Extension Service, Jeffries was working as a tenant on a 120-acre farm in Alamance County in 1942. Although the land was run-down and in poor condition, he decided to buy the farm and see what he could do to im-

Jeffries financed the purchase through the Farm Security Administration. He was given 40 years in which to repay the money, but he was so successful in his operation of the farm that he completed the payments in just four years.

He terraced all the open land and began using lime, phosphate, and seeds obtained through the AAA. He also used barnyard manure liberally to increase the productivity of his

As a result, Jeffries says his corn yields have jumped from 12 to 60 bushels per acre, wheat yields from five to 20 bushels, and tobacco from 800 to 1705 pounds per acre.

He has seeded eight acres of improved pasture and has cleared up scrub pines, briars, and broomsedge. He now has two acres of old meadow land bogged up to be seeded in Ladino clover and fesue early in Septem-

Jeffries has also dug a basement built a 16 by 30 foot pack barn, erected a five-room house for one of his sons, installed electric lights and a telephone, and his home insulated

Jeffries says he has had the full cooperation of his wife, daughter, and two sons in this improvement pro-

tion, one hundred years from now, Plentiful Foods For Contest Winner high as that of the present.

The economist conditions his prediction upon "wise policies" in relation to our resources. What these wise policies may be, when the generation of 2049 looks backward, no know whether we, of today, are folowing wise or foolish policies.

By Dr. Sophia Brunson

By DR. SOPHIA BRUNSON Fatigue a Cause of Depression Most of us who become thoroughly liscouraged are not in good condition physically. No one is himself when fatigued. His intellectual faculties are not normal.

The people who have been success ful in life are not as a rule those with the most brilliant intellects, but those who do not easily give up to discouragement. They go on and on in spite of apparent failure. When they face a stone wall, they either go

around it or blast a passage through it. Vict ry and success do not often come to the quitter, but to the patient worker, who like the potter turns defeat into victory by not giving way to discouragement.

Good health is the first prerequisite of a successful life. If a person is well, he can drive himself hard up as are turkeys. Mrs. White said turto a certain point, but he should not key growers are marketing a large allow himself to grow so tired each crop early this year and that prices day that his body does not become will undoubtedly be lower than last rested during the night. If he does fall. that, he injures himself by accumulated fatigue. While in this state the health suffers and the morale is so broken that he gives way to the depression and discouragement which the condition engenders.

It is at such times that willpower is weak and many foolish deeds are committed and errors made that would have been deemed impossible at other times.

When one is fatigued and discouraged the feelings are most sensitive. Slights are imagined where none are meant and the quick retort leaps to

varied, judging from the U.S. Department of Agriculture's plentiful foods list for the month, says Mrs. one can tell. Only then can any one Nina White, home demonstration

hens, pears, and onions.

Hens, largely culled from laying flocks, provide excellent sandwich dumplins, salads, and many other chicken dishes.

Many of the pears will be Barletts, which are ideal for between-meal eating. As far as onions, commercial producing areas are marketing a crop heavy enough to place generous supplies on all retail markets in the

Plentiful fresh fruits will be grapes, prunes and apples. The nation's fall apple crop is arger than last year, and such well-known varieties as Grimes Golden, Jonathan, and Wealthy are being harvested.

By the latter half of September, sweet potatoes from last year's crop will be seasonally plentiful, and supplies of cabbage, tomatoes, and Irish potatoes will be on markets in good volume throughout the month.

Cooking fats, once so scarce, are a newcomer to the plentiful foods list,

Broilers and fryers will be plentiful in September to add more protein to early fall menus, as well fish, dairy foods, and peanut butter.

A VACATION TRAVELOGUE

(Continued From Page Two) ings, the home of Good Year Tire and Rubber Place. Also the home of Bee Hive corn syrup and Yardley perfume.

The various signs along the way attracted our attention, "Winslow's Market," "Buy Minks and Fox furs direct from furrers," "Ye Old En-glish Inn", Fred's Fish and Chips," "Mother Parker's Tea," Snatch Snack at Claus'," (Scottish) "Jack's Shack," Jay's Restaurant."

On the third day we bade farewell to Canada, and visited on the U.S. September menus will be tasty and side of the Falls. There on to the very pretty, clean town of Leroy, N.Y. The Jello home.

In following the green lines on our maps, we returned by Watkins Glen, agent for the State College Extension N. Y. and the State Park of 500 acres. a On this route we visited Canadai-Topping the September list are gue, a popular summer resort, situated on one of the most beautiful of the Finger Lakes, famous for Early Indian history. Also Geneva at the foot meat, or may be used for chicken and of Lake Seneca, a noted nursery. Here is one Indian burying ground.

From Geneva we followed the magnificient scenery along Seneca Lake to Watkins Glen, in which region we were told that every where you turn are beautiful Lakes and Parks. Tourists should by all means take in the superb Finger Lake region of Central New York.

The State of N. Y. acquired the Watkins Glen Reservation in 1906 and it has been a state park ever since. The gorge is one of the natural wonders of the U.S. It ranks with

Ningara Falls, Mammouth Cave, and the Natural Bridge, and it is renowned all over the world.

It is a deep winding canyon of Lost glacial formation. Geologists say it was more than 50,000 years in formation. We rode up the 530 feet and walked down the stone walls on stairways and bridges, and viewed Rain-Falls, Cavern Cascade, Pulpit Rock, Pluto Falls, Mimmehaha Falls, and many others.

Two industries produce salt at Watkins Glen. "The International Salt" and "Watkins Glen Salt Companies." Both plants are on Seneca Lake.

Derricks of salt wells rise from the hills along the Lake where it is processed into the finished product of "course" and "table salt." "Please Pass the Salt," an expression in this

Here in the beautiful land of the Finger Lakes are 400 glees. A vistor is thrilled with the superb landscapes and views, the green of the vegetations, the Indian history and the friendly people. The glee is an ultimate place, a gem of nature. We were indeed glad to visit Watkins Glen, for many years a tourist mecca.

As we traveled homeward we made one stop more at the Washington Zoo to benefit the children, one lasting impression with each of us; Everywhere we went the people were courteous and generous. Which helped to make the trip most enjoyable and profitable.

To delay treatment for cancer can arms, and houses surrounded with prompt treatment often mean a cure.

Traveling at the fastest pace since our expansion program began, we're making great strides toward furnishing telephone service for everyone who wants it. New installations are being made-telephone lines are constantly being increased. And we won't stop until everyone who wants telephone service can have it quickly.
