

Diphtheria Clinic Every Saturday A. M.

Officials of the District Health Department today issued an appeal to parents to take steps to prevent diphtheria among children of the State. The Health Department pointed out that diphtheria occurs in most instances during the fall and winter months, and many cases are caused by carriers of Diphtheria Bacillus, who are children attending schools.

Parents are urged by Health Officials to have babies immunized against the disease and advise them to consult their family doctors for that purpose. The Department announced that parents unable to pay doctors for the service can have babies immunized at the local Health Department on Saturday mornings.

CHAPANOKE NEWS

Mr. and Mrs. Percy Cartwright of Nixonton spent Sunday with Mr. and Mrs. Wallace Bright.

Misses Barbara Fay Long and Annie Belle Russell of Elizabeth City were the guests of Barbara Jean Russell last week.

Mr. and Mrs. Will Burgess of Old Trap were Sunday guests of Mr. and Mrs. H. E. Onley.

Rev. and Mrs. G. N. Sinletary and family of Elizabeth City and Rev. Dulin of Hertford were dinner guests of Mr. and Mrs. Henry Elliott, Monday evening.

Mr. and Mrs. Paul Vaughan and baby of Portsmouth spent Sunday with Miss Lena Symons.

Mrs. Louise Wilson left Thursday for Chowan where she is a member of the faculty.

Mr. and Mrs. Edward Spires and Mr. and Mrs. Oisley of Edenton were the guests of Mr. and Mrs. Leroy Nixon, Sunday afternoon.

R. Holmes, C. E. Johnson, W. J. Kanoy, T. L. Jessup, M. R. Campbell, Miss Mary Sumner and Miss Helen Morgan. The high score prize went to Mrs. Johnson.

ROOK CLUB MEETS

Miss Mildred Reed was hostess to her rook club Friday evening at her home. Those playing were Mesdames J. E. Morris, Carlton Cannon, C. T. Skinner, R. M. Fowler, Charles Whedbee, Harry Hollowell, Archie Lane, G. R. Tucker, Julian White, Miss Mary Sumner, Miss Thelma Elliott and Miss Ruby White. A high score prize which was awarded at each table went to Miss White, Mrs. Skinner and Mrs. Fowler. A sweet course was served.

CIRCLE MEETING

The Rosa Powell Circle met Tuesday night, Sept. 6 at the home of Mrs. Allen Bovanzier.

The meeting opened with the singing of "Faith of Our Fathers". Mrs. Bovanzier gave devotional followed by prayer by Inez Hampton. A very interesting program, "I Returned From Communism" was given with Inez Hampton, Hazel Dail and Mrs. Milton Dail, Jr. taking part.

New and old business was discussed. Mrs. Dawson dismissed with prayer.

The Hostess served delicious refreshments.

POULTRY TIPS

Do you have the Laying House ready for pullets? The house and equipment should be thoroughly cleaned and disinfected several days before the pullets are to be housed. A good disinfectant can be made of 1 oz. of lye to each gallon of water.

Some poultrymen have found it to be a good practice to move the pullets from the range to the Laying House at night time in order to disturb them as little as possible. In some cases the pullets have access to the yard around the Laying House when first brought from the range. The laying House should be well ventilated. Avoid crowding the pullets by allowing 3 1/2 to 4 square feet of floor space per bird.

Crunched corn cobs are gaining in popularity as a floor litter, but coarse shavings, peanut hulls, saw dust, etc., and the commercial litters are also used. Gradually build the floor litter up to 8 to 10 inches in depth, or preferably deeper. Then stir about once a week to prevent packing or matting together. Don't forget to keep plenty of clean material in the nests to help prevent cracked or broken eggs, and to aid in producing cleaner eggs for market.

Select the more matured pullets to be housed together, and leave the less mature ones on the range, or house separately. AVOID HOUSING THE PULLETS WITH OLD HENS. In handling the pullets, check for lice; if present use one of the recommended treatments, a house powder, or roost paint. Be sure to follow up with a second treatment in about 10 days, to kill the nits that have hatched out.

Provide Grazing Crops For Fall and Winter

Make plans now to use the ground around the poultry house for Fall and Winter grazing crops. Green feed means a saving in the feed bill, and also promotes health in the birds. Small grains, clovers, and Italian Rye Grass will make good Fall and Winter green feed crops. For date and rate of seeding, see your County Agent.

Prepared

Wife—How dare you deny that you had been drinking last night? Here you are in bed with your shoes and pants on.

Hubby—But you see, my dear, lately I have become addicted to walking in my sleep and I thought it best to go to bed prepared.

Peanut Field Day To Be Held Friday

Dr. J. H. Hilton, director of the North Carolina Agricultural Experiment Station, and L. Y. Ballentine, State commissioner of agriculture, will be among the speakers at the peanut field day to be held at the Upper Coastal Plain Experiment Station near Rocky Mount on Friday, September 16, beginning at 1 p. m.

Ballentine and Hilton will open the program with introductory remarks. Other speakers and their subjects will be: Dr. R. W. Cummings, research program on peanuts in North Carolina; Dr. J. H. Jensen, peanut diseases; E. T. York, Jr., fertilization and cultural practices; W. C. Gregory, status of work in the peanut breeding program; G. W. Giles and N. C. Teter, production, harvesting, and drying of peanuts.

At the conclusion of these discussions, those present will be directed to the field and divided into three groups. H. E. Cooper will be in charge of the group observing diseases and their control. York and H. R. Garriss will lead the section studying rotation and fertilization, and Gregory will be in charge of those visiting breeding plots.

All farmers interested in peanut production are invited to attend the program.

Announcement!

We take pleasure in announcing the opening of our Meat Market at Winfall, N. C.

We will be prepared to serve customers in this area with FRESH MEATS daily.

Phone 4408 For Prompt Delivery

We will make deliveries in the Town of Hertford once each day.

Bill's Meat Market

Farmers Are Urged To Defoliate Cotton

Recent heavy rains and continued attacks of boll weevils are further reasons why farmers should begin preparing to defoliate their cotton, says J. A. Shanklin, Extension cotton specialist at State College.

In most areas, Shanklin said, cotton is mature enough now where it would be safe to apply the defoliant. A good

check to determine the time of application would be to wait until bolls expected to mature are at least 20 days out. One application of 20 to 30 pounds of cyanamid dust per acre should be sufficient to do the job.

Shanklin recommends that the dust be applied early in the morning before the dew has dried off the cotton plants so the defoliant will stick to the leaves. Another good time to apply the dust is after a light rain while the plants are still wet. Any dusting equipment that is suitable for using insect control will work satisfactorily in applying the defoliant.

Farmers in some of the western states have obtained good results with some of the liquid defoliants, the specialist said; however, there has not been enough experimental work conducted with such sprays in this state to justify their use.

Hopeless

Customer — Satisfied? Certainly I'm satisfied. I've nothing but praise for you.

Tailor—Then I suppose it's not much good my sending the bill in again, sir?

TEN beautiful TINTS
charming backgrounds for furniture and draperies

Say! See how that paint changes the appearance of this gloomy old room!

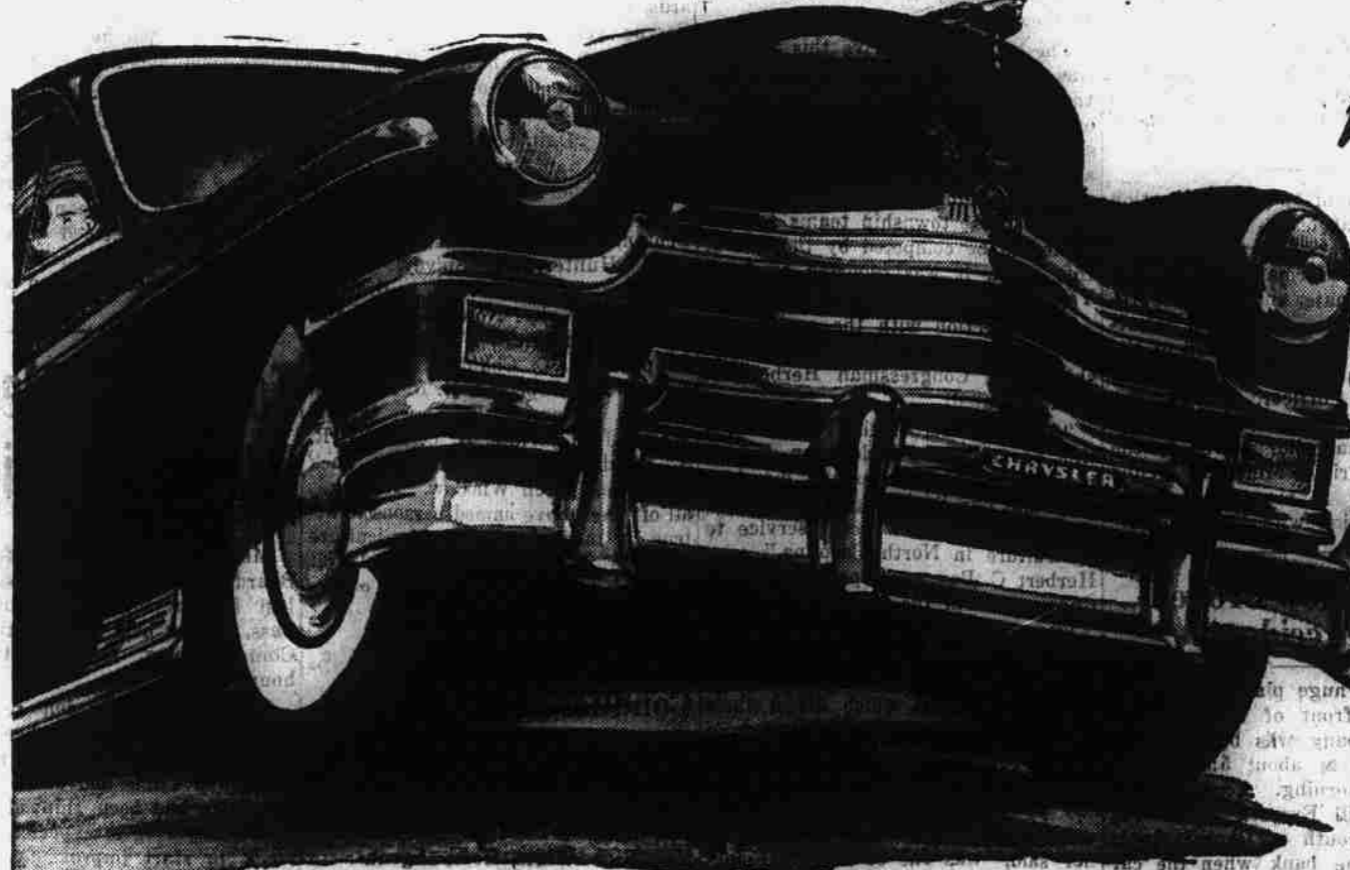

How perfectly beautiful! - and just think, how economical! - So easy to keep clean with soap and water
