### April Record Month For Cars On Highways

With motor vehicle registration only 10,568 short of a million, the Motor Vehicle Department reports that more vehicles used the highways of the State during April than during any month in history.

Registration figures mounted to 989,432 as compared with 882,759 on the same date last year, an increase of 106,673.

Although seasonal use of highway does not reach a peak until August, figures from James S. Burch, engineer of statistics and planning of the State Highway Commission, revealed that on an average day in April, 68,102 vehicles passed the State's 20 full-time electric counting machines, as compared with 7,623 last August and 59,075 last April. The figures represented a 15 per cent increase over April of last year.
