YOU'LL SAVE MORE GRAIN IN ANY COMBINEABLE CROP

with a JOHN DEERE No. 12-A Combine

In any combineable crop . . . in any field condition, you'll bin more grain from every acre when you use a thrifty, grain-saving John Deere No. 12-A Combine.

The remarkable capacity and grain-saving performance of the No. 12-A is due to its straight-through, full-width construction. Down or standing . . . light or heavy crops flow evenly from the cutter bar through the full-width threshing, separating, and extra-large cleaning units.

Light in weight and maneuverable, the sturdy No. 12-A works successfully in wet fields where heavier machines would bog down. It's an easy-operating combine, with simple adjustments for your particular crop or conditions. See us for complete information about the field-proved, time-tested John Deere No. 12-A Combine.
