attention to the fact that the location of advertising signs sometimes increases the danger of night travel. In the effort to avoid highway accidents, it might be profitable to scrutinize the location of advertising signs and strictly regulate them in the interest of highway safety.

**Kidney Slow-Down May Bring Restless Nights**

When kidney function slows down, many folks complain of nagging backache, headache, dizziness and loss of pep and energy. Don't suffer restless nights with these discomforts if reduced kidney function is getting you down—due to such common causes as stress and strain, over-exertion or exposure to cold. Minor bladder irritations due to cold, dampness or wrong diet may cause getting up nights or frequent passages.

Don't neglect your kidneys if these conditions bother you. Try Doan's Pills—a mild diuretic. Used successfully by millions for over 50 years. While often otherwise caused, it's amazing how many times Doan's give happy relief from these discomforts—help the 15 miles of kidney tubes and flush out waste. Get Doan's Pills today!

**A Dead Issue**

A report from Raleigh last Saturday morning announced the news that North Carolinians will be free from motor vehicle inspection for at least another two years. The House Roads Committee, the report said, had reported unfavorable, two measures calling for the reinstatement of the inspection law.

The issue apparently is dead, and what a shame it is.

In our opinion motorists of North Carolina need an inspection law, not only for the sake of highway safety but as a curb upon vehicle owners who permit a valuable piece of property such as a car or truck to deteriorate to the point it loses much of its value.

It seems the Legislators were flooded with petitions by those opposing inspection laws, to such an extent, the Legislators acted to appease the petitioners rather than vote for a measure proposed for the benefit of all.

**A Community Asset**

February, a month of notable birthdays, sees the celebration of a "birthday" in which all Americans can properly join. Boy Scout Week, February 6 to 12, reminds us that one of America's largest youth organizations has reached another milestone.

The Boy Scouts of America has reached its forty-first anniversary. Since February 8, 1910, more than 17,750,000 American boys and men have been influenced by the Scout Oath and Law. They have benefitted by using their leisure-time energies in outdoor living and activities of cultural and practical values which lead boys to become dependable men.

Today over 2,750,000 boys and men are actively enrolled in over 75,000 different units. Fortunate indeed are communities where Scouting flourishes. American adults of good character give generously of their time to give leadership. Others help by raising funds and are members of Local Boy Scout Councils which in turn provide training for leaders, camp facilities, worthwhile year-round activities, personal advancement and opportunities for Scouts to render community service.

May you have many more happy birthdays, Boy Scouts!

**Equals How Long You Live**

What you eat and the quantity thereof probably measure the length of your life.

The important of diet in the well-being of individuals has been increasingly recognized in recent decades, although one often wonders why, for so many years, no one seems to have undertaken a real study of the fuel content of the human body.

There are wise people who believe that, given a proper diet, the individual could avoid disease. Of course, proper diet, spread over several generations, would be necessary because of physical weaknesses that are transmitted from generation to generation.

Doctors have learned that lack of certain substances in food is responsible for many of our ills. The same discovery may be made about other scourges that inflict suffering and death upon human beings.

**Signs Increase Traffic Peril**

A writer of a letter to a newspaper in a neighboring city calls attention to the fact that advertising signs, in red and green colors, have a tendency to confuse motorists and to make it almost impossible to detect traffic lights that operate for the safety of pedestrians, as well as motorists.

We are inclined to agree with the unidentified correspondent, who suggests that advertising signs should be "any colors except red and green." Certainly, after dark and when streets are wet, there is a mass of red and green lighting that, at times, makes it impossible to detect traffic lights. While on this subject, we also call

**Increases Income By Using Tractor**

Fred Williams, well-known Negro farmer of Route 1, Warsaw, is using all his skill and knowledge to overcome the problem of high living costs. According to Riddick E. Wilkins, Duplin County Negro farm agent for the State College Extension Service, the most recent important change on Williams' farm occurred when he decided to buy a new tractor to replace his old team. The hours he saves with the new machinery will be devoted to construction work, which is one of his skills.

The Duplin farmer is now in a position to run his average-sized farm more efficiently and meet farm costs on a pay-as-you-go basis.

Williams usually makes it a point to attend educational meetings and obtain the latest information on farming practices. Frequently he consults the county agent for help on special
