Reed and Mrs. Cecil Winslow. After the business meeting and program, the hostesses served refreshments to the following present: Mesdames A. T. Lane, D. F. Reed, Crafton Mathews, B. F. Ainsley, J. E. Morris, J. O. Felton, Joe Towe, W. H. Pitt, J. C. Hutchinson, Cecil Winslow, Moody Mathews, McClelland Wade, and Alfred Chaplin, Mrs. Mary Sumner and Miss Thelma Elliott.

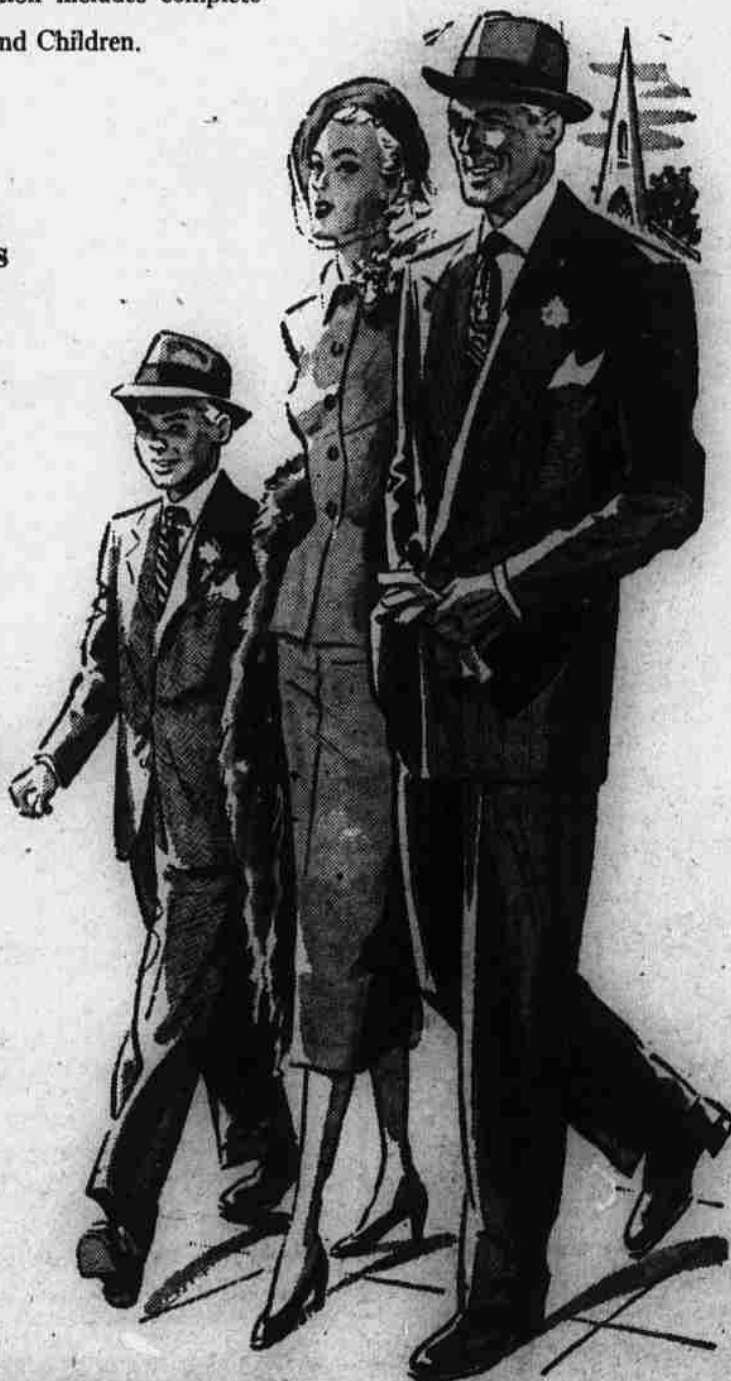

Questions and Answers on Multiple Crop Insurance Program

- FARMER:** Why can't I insure just one of my crops?
COM: The cost of insuring just one crop as compared to the cost of Multiple Insurance is too high in Perquimans County. As an example, on the average farm the cost on peanuts is more than twice the cost as a single crop as compared when insured as a multiple crop. On corn it is three times as high; on cotton it is ten times as high; and on soybeans it is five times as high.
- FARMER:** What will my premium cost?
COM: This cannot be figured now because it is based on the number of acres you grow of each crop insured. This will be figured after you have planted your crops and made a report to the County PMA Committee. Your premium will be approximately 3 per cent of your coverage, a little more or less depending on the crops you plant. On a farm growing 18 acres of corn, 18 of soybeans, 4 of cotton, and 7 acres of peanuts the premium would be \$30.03 on \$1,333.50 coverage, or 2.2 per cent, which would be about the lowest in the county. On a farm growing 20 acres of corn, 20 acres of soybeans, and 8 acres of peanuts with no cotton, the premium would be \$42.55 with coverage of \$1,271.00.
- FARMER:** Why pay a premium when I have never had a loss?
COM: The fact that a house has never burned down is no reason that it will not burn down tomorrow. The fact that you never had an automobile wreck is no reason that you will not have one tomorrow. The fact that a storm has never hit your farm is no reason that one will not hit your farm in the middle of the growing season this year. Insurance is based on what may happen in the future and not what has happened in the past.
- FARMER:** Does the Multiple Crop Insurance Program encourage poor farming methods so that a lazy farmer would collect a loss?
COM: No. The insured must carry on good farming practices as are carried on in the neighborhood. He must plant good seed, cultivate properly (weather permitting), use insecticides where necessary and is expected to prevent a loss where reasonably possible. Some farmers who failed to do these things in 1949 and 1950 have been declared ineligible to be insured in 1951 and have been cancelled out for 1951. In adjustment of some claims some farmers have been penalized for not carrying out good farming practices.
