### Different Varieties Of Corn Harvested

Corn variety demonstration plots were harvested at the following places last week: William Forehand's farm, Cowpen Neck community; Tom Asbell's farm, Center Hill community, and Marcel Ward's farm, Tynes community. In each of these demonstrations at least sixteen varieties of corn were planted in the same field, under the same conditions. Two exactly alike. Several varieties of local corn were used as well as several varieties of hybrid corn.

Four new varieties of hybrid were used in the test at William Forehand's. These varieties have not, as yet, been approved by the N. C. Crop Improvement Association. If they show up well enough in the sample tests throughout the state, then they will be approved and seed will be made available to farmers as rapidly as possible. Further information on these corn varieties will be released by the County Agent's office as soon as the data can be compiled.
