Mrs. J. B. Baanight attended a Citizenship Training School at E. C. C. Wednesday.

For a BETTER COTTON CROP

PROPER SEED TREATMENT MAY MAKE THIS DIFFERENCE

The photo above shows ten good cotton seedlings, well on the way to the kind of growth which can produce a good crop of cotton. This is the result you may expect when properly treated cottonseed is planted... seed that has been treated with a recommended seed disinfectant.

Below, the effects of seed decay, sore-shin, and both pre-emergence and post-emergence damping-off are illustrated. This seed was not treated and this is one reason why it is often necessary to replant.

Treated seed can be planted 3 to 5 days earlier—can get off to a good start even in cool weather. Once a good stand is established and growing well your chance for a better cotton crop increases.

a John Deere Day message

January, 1952

Dear Friends:

John Deere Day will soon be here again; in fact Wednesday, February 13, is the day. This is the day we look forward to having all our farmer friends here to be our guests and spend the day with us. There just isn't time to call on each of you personally. We have endeavored to mail invitations to each of you, but if you did not receive one, or have not been invited by any of our personnel, please consider this your personal invitation to attend. The picture show will start at 10 A. M., at the State Theatre.

The feature picture, "Galahad Jones," starring Marjorie Lord, Richard Crane, Elizabeth Patterson, and Jonathan Hale, is a top notch production—one which we are sure you will enjoy. We will also have several interesting and educational features on modern equipment and farming practices. Prizes will be given the lucky persons.

Don't forget the time, Wednesday, February 13. Come early! Bring the whole family and spend the day with us.

Sincerely,
J. C. BLANCHARD & CO., INC.
