Our Widened Outlook

There was a time, not very long ago, when the people of Perquimans County were not much interested in what happened outside of the United States and, if you go back some years, there was a time when nothing much mattered except what happened within in gun-shot range of their homes.

Times have changed and with them, the outlook of our people. Whether we like it or not, we cannot remain insensible to what happens in the world, because the economic consequences are felt in the sale of our products and the state of our business.

The development of rapid transportation through the means of the automobile and the airplane, has done much to widen our outlook. The dissemination of news, through the newspapers, the radio and television, has heightened our interest in the happenings beyond our local borders. Today, as never before, there are well-informed people in every hamlet and crossroads in the United States.

This does not mean, of course, that, as a people, we have what one might call an intelligent world viewpoint. Our thinking, expressed in national action, often continues to be local. There is a vast number of people who believe that the United States is not yet a part of the big world in which they and so many other peoples live. Yet, there are signs that a new understanding is becoming manifest.

Objects In the Sky

The mystery of the flying saucers has deepened somewhat as a result of an Air Force admission that jet interceptors had been used over Washington in an attempt to gain contact with strange objects appearing on radar screens in and around the national capital. Twice in one week unidentified objects appeared on radar screens near the capital. On the second occasion, the Air Force sent jet interceptors aloft to make contact.

The Air Force announcement, the morning after the interceptors were assigned the task of spotting the mysterious objects, left the mystery as unsolved as ever. The Air Force admitted that "between four and 12 unidentified objects over the Washington vicinity" were picked up on a Civil Aeronautics Administration radar screen. The CAA notified the Air Force and two jet fighter interceptor planes were ordered aloft from a base 90 miles from Washington.

The jet planes appeared on the CAA radarscope at 11:25 P. M., that night and were directed in on a course which would intercept the objects. One of the jet pilots reported sighting four lights in front of him, approximately 10 miles away and slightly above, though they "disappeared" before he could overtake them," the Air Force announced.

The mystery of the strange flying objects deepens because their appearance on the radar screen is proof that something with substance is involved. Some scientists have long believed that the strange lights were only light phenomena, which would some day be explained by scientific discoveries.

However, the appearance of the objects on the radar screen is proof that the objects not only contain light but substance. Thus, what seemed to be only natural phenomena or imagination, several years ago, now seems to have developed into something of a more mysterious nature. The strange objects could still be tricks of nature, although the attitude of the Air Force on this theory has changed substantially in the last two years.

It was not many months ago that the Air Force scoffed at the flying saucer reports and the fact that the Air Force is now sending jet interceptors aloft in an effort to contact them represents a change of attitude which is of real significance.

District County Agents Meet In Washington

County Agents of this district had their regular quarterly meeting at Washington, N. C., on Thursday, Aug. 7, as a part of the program a demonstration on grading feeder calves was conducted by Extension Specialist Sam Buchanan and Mr. Myrick of the N. C. Department of Agriculture, Livestock Division. This demonstration is valuable in renewing the agents' knowledge of grading feeder

calves and giving them practice at same. This should enable agents to assist people in selecting the right kind of calves for feeder calf sales this fall.

Sunday School Lesson

(Continued From Page Seven)
no unity among them and no faith in the power of Jehovah to help them. Had it not been for Saul, Israel would have been wiped from the face of the earth.

Our lesson passage ends with Saul facing the Philistines. It is included in this series to show just what this young King had to contend with in establishing the new Kingdom. Saul's primary services to his people were as a military leader. Seven able campaigns he waged, ending in the establishment of a unified, powerful nation. Another service, hardly less important, was Saul's success in winning recognition for the kingship, getting the authority of the monarchy upon foundations firm enough for David and Solomon to profit therefrom. Certainly without Saul, there would never have been a United Kingdom in Israel, without him, there would have been no great achievements for David.
