

# Affirms Need For Higher Standards In Construction

As the population of American increases, the rate of accidents and fire loss experience will become proportionately responsive. In addition, there will be important shifts and expansion in building construction and consumer demands.

These things should be anticipated. Lewis A. Vincent, general manager of the National Board of Fire Underwriters, told members of the National Fire Protection Association attending its 86th annual meeting in New York recently.

To meet them, he called for higher fire protection standards in new building construction and warned against new fire hazards.

In particular he scored a strong trend toward the erection of buildings of tremendously large areas. He cited recent developments in super-markets and pointed out the need for

proper safeguards. Because of increasing fire hazards and the trend toward lessened fire protection in new building construction, Mr. Vincent said a corresponding development in improved means of fire detection and extinguishment is necessary.

Above all he urged round-the-clock preventive and protective programs now both for America's growing reserves of raw materials and finished products and also for those critical industrial facilities upon which rests the success of the nation's peace-and-war program.

At another session of the meeting, James K. Evans, NBFU's building code engineer, reported that some 500 American cities have adopted either in whole or in part the recommended National Building Code of the National Board of Fire Underwriters.

## State Fair Livestock Show Is 'Big League'

A livestock show, offering \$27,145 in premiums and labeled "big league" by Dr. D. W. Colvard, head of the Department of Animal Industry at N. C. State College, is scheduled as a part of the 86th annual State Fair to be held in Raleigh October 14-18. Competition "open to the world," but with special classes for North Carolina exhibitors, is planned in all four breeds of dairy cattle and in the Hereford and Aberdeen-Angus breeds of beef cattle.

Dr. Colvard is chairman of the Fair's new livestock advisory board which comprises breeder-representatives of all types of livestock, plus educational leaders. These are: Forrest Fansher of Biltmore, represent-

ing the N. C. Purebred Dairy Cattle Association; Sidney Thornton of Elizabethtown, representing beef cattle breeders; W. B. Austin of Jefferson, dual-purpose breeders; R. E. Byrd of Bunnlevel, swine breeders; and W. W. Hill of Raleigh, sheep breeders.

Educational leaders on the board include: Dr. H. J. Rollins, state veterinarian; Dr. A. A. Husman, veterinarian of the U. S. Department of Agriculture; Dr. William Moore, retired state veterinarian; and Dr. C. D. Grinnell, Prof. Earl H. Hostetler and John A. Arey, all of the State College Department of Animal Industry.

"Prospective livestock exhibitors should immediately obtain a copy of the free 1952 State Fair catalog," Dr. Colvard said. This is available upon request to: Manager, State Fair, Box 1388, Raleigh. "There are many changes since last year, all approved by the Livestock Advisory Board," Dr. Colvard pointed out, "and entries

must be made on official printed forms which are attached in the back of the Fair catalog."

General livestock superintendent is J. H. Privette of Raleigh. Department superintendents, all State College leaders, are: Dr. R. K. Wainwright, head of the dairy husbandry section, dairy cattle and dual-purpose cattle; S. J. Buchanan, extension animal husbandryman, beef cattle; Jack Kelley, in charge of extension animal husbandry, swine; and A. V. Allen, extension husbandryman, sheep. A pony show lists Boyce E. Frye of Concord as superintendent.

Indigo Bunting

### INDIGO BUNTING

When an Indigo Bunting alights in a fruit tree and nibbles at a few blossoms, it's easy to forgive him, because he is so helpful in destroying insects. A fragrant bud tempts him now and then, but ordinarily he'd rather be eating cankerworms, beetles, grasshoppers, and other pests.

That is why people in the eastern half of the United States are glad to see Indigo Buntings arrive each spring. The small birds are welcome visitors all the way from North Dakota to Maine and south to Texas and Florida. Throughout this area, says the National Wildlife Federation, Indigo Buntings make their summer homes in bushy fields, along hedges, and among small trees.

It is hard to see the female in

these surroundings, because she is plain brown all over. And the male seems to be playing the trick of changing colors. In the right light, he is a rich, deep blue, but in a shadow he may appear to be anything from dull gray to coal black.

There is seldom any doubt about who he is, though, because he is almost constantly singing a lively, cheerful song. It is pleasant on a hot summer day to hear him saying, "Sweet-sweet, chew-chew, swit-swit, sweet-sweet, sway-away, away-away."

The Indigo Bunting does his singing from a high perch, but he and his mate place their nest in a low bush or sapling, about four feet from the ground. For building materials they use twigs, coarse grass, leaves, hair, and feathers.

After their new home is finished, the female lays three or four small eggs. They are pale blue or greenish white, and they hatch in twelve days. After the first brood is big enough to get out of the nest, the parents raise a second family later in the season.

By the time that the second brood is fully on its own, fall is near, and the Indigo Buntings leave for their winter homes. While it is cold in the

United States, they are enjoying warm weather in Mexico, Central America, and Cuba.

It won't be long now before new television stations begin sprouting up all over the countryside, thus reducing the size of our country once again.

There's  
**NO** value  
like Chevrolet  
value!

...the lowest-priced line in its field!

Measure value by what you get for what you pay... and it's easy to see why more people buy Chevrolets than any other car.

For you get more with Chevrolet... fine quality features found in no other low-priced car. And yet you pay less... for Chevrolet is the lowest-priced line in the low-price field.

Today more and more people are looking for greater value in everything they buy. Come in and let us show you all the reasons why—in automobiles—there's no value like Chevrolet value.

(Continuation of standard equipment and trim illustrated is dependent on availability of material.)
