

To Conduct Clinic Friday, February 6

The Northeastern Cancer Clinic will be held Friday, February 6, in Elizabeth City, at the Health Center with registration from 12:45 to 2:00. A free chest X-ray will be given anyone who wishes it along with the examination of the five areas of the body where cancer is most easily found and cured. There are no limitations as to sex, race, physical or economic status; however, there are age requirements. Women should be 35 or more; men should be 40 or over unless referred by your doctor, or unless you have one of the "Seven Danger Signals" or "Symptoms". No appointment is necessary, but a priority may be secured by writing the Cancer Center for one.

E. B. Hollowell attended the sing-spiration at Central School last Thursday P. M.

A professional gambler is a man who risks his money on a sure thing.

Improve Kitchen Storage—Costs little and saves time. Carefully plan space for packaged, canned and bottled foods, measuring cups, spoons, etc., in the wall unit. Base cabinets provide storage for bulk quantities of sugar and flour, mixing utensils such as bowls, flour sifter, rolling pin, cutlery, baking pans and casseroles. Divided space is needed. Our management specialists say determine whether an item should be stored in a wall cabinet or base cabinet. Organize articles in the cabinets so that those stored in back, though frequently used, can be reached easily when needed. Use accessories such as step-up shelves, cup racks, drawer dividers and bulk storage bins to assure neat and easy-to-find storage.

Legislative Summary

(Continued From Page One)

a single set of facts and figures in simple and clear terms. At the reported urging of Governor Umstead for an early consideration of school building needs, both House and Senate education committee chairman appointed subcommittees to study jointly the need for school building construction and all bills dealing with the problem. Although House committee members questioned the appropriations provisions of Rep. Collier's \$50,000,000 bill, the first to reach the subcommittee, there was growing realization that a bond issue for more than \$50 million might be necessary to meet current needs. Bills were introduced in the House during the week to: (1) provide for loans to medical and nursing students specializing in psychiatry in medical schools within the state, repayable in cash or through service in state mental hospitals; (2) appropriate \$35,000 annually for employment of 6 area music supervisors to train and organize leaders to promote music in schools, churches, and communities; and (3) admit students other than Indians to Pembroke College.

Highway Safety

Legislators' attention is still directed to highway safety. One bill would bring automatic license suspensions varying from 60 to 120 days for drivers convicted of exceeding speed limits by more than 15 m.p.h., and 90 days to six months for such offenders also convicted of reckless driving. If a driver arrested for drunken driving requests scientific analysis of his blood, a second bill provides that he is: (1) presumed not drunk if analysis shows .05 per cent or less by weight of alcohol in his blood, and (2) presumed drunk if alcohol is .15 per cent or more by weight. These presumptions would be determinative of the driver's guilt if not outweighed by contradictory evidence.

Local Government

The most significant development concerning local government is still a gleam in some legislators' eyes. The suggestion is that county commissioners be given authority to fix the salaries and fees of all county officials and employees. This could reduce by several hundred the number of local bills enacted by the General Assembly each session, but such legislation would be permissive, not mandatory. One concrete proposal introduced this week would permit municipalities incorporated since the last federal census to make estimates of their population for use by state agencies in allocating state funds to local governmental units.

Miscellaneous

Resolutions adopted by the 1941 and 1949 General Assemblies, endorsing a world federal government and calling on Congress to call a convention to propose amendments to U. S. Constitution authorizing negotiation with other nations relating to a world government, would be repealed by SR 66 introduced on Friday. A similar bill sponsored by the 'Daughters of the American Revolution' in 1961 did not receive committee approval. Fox hunters who hunt for the sport of the pons will be interested in HB 104 which seeks to exempt such hunters chase and without guns or other wear from purchasing licenses.

"AMERICAN AIRLINES" ACCEPTS MISS MARY LOUISE MANSFIELD

Mary Louise Mansfield, daughter of Mr. and Mrs. T. E. Mansfield of Hertford, will leave for Chicago, Ill., February 15, to begin her training as Stewardess. Miss Mansfield, who tips the scales at 114 pounds, met qualifications after interviews by New York officials from "American Airlines" and passed physical examinations at their medical department in New York.

County Farmers Urged Order Fertilizer Now

Farmers of Perquimans County are urged to order now and accept delivery soon begins, says County Agent Yagel. This will reduce the possibility of temporary shortages because of clogging of distribution lines at the peak season of fertilizer use. Fertilizer has not been moving rapidly enough in some areas to assure smooth distribution later on, according to information received from of-

types of fertilizer such as higher analysis phosphate materials, and ammonium nitrate may fall short of all demands. Farmers taking early delivery of fertilizer should make certain the materials received are in good condition so that they will withstand storage in a reasonably dry and protected place.

Another Great Feature of the JOHN DEERE "50" and "60" Tractors...

new Effortless Steering

You'll notice the difference the first time you drive one.

Yes sir, a few minutes spent in the field behind the wheel of a John Deere "50" or "60" will have you saying, "This is what I call real easy steering."

And no wonder, for these great new tractors employ a new worm and full gear. Both are highly finished to reduce muscle-wasting friction to almost nothing. The gear ratio has been increased, and there is a ball thrust bearing at the base of the pedestal to further ease steering. The worm and full gear form the only joint in the entire steering mechanism. Both are fully enclosed and automatically lubricated. The full gear is reversible for double life.

OTHER OUTSTANDING FEATURES

Duplex Carburetion • "Live" Power Shaft • "Live" Front-Pressure Power-Trol • Quick-Change Wheel Tread • Ultra-Modern Engineering • Greater Convenience • Unexcelled View • Unequaled Two-Cylinder Strength and Simplicity.
