

# SENATOR LENNON REPORTS

Washington—Last week the Senate paid its official tribute to the late Senator Clyde Hoey in a special memorial session.

**Tribute**  
It is touching to realize that Senator Hoey had attained the highest plateau of respect and admiration from his Senate colleagues. It will not go into the details of the memorial service, but it should be noted here that all of the country held him in the very highest esteem.

**Editorials**  
The editorial eulogies from North Carolina newspapers were eloquent in their tributes to Senator Hoey. They described the great respect with which he was held by all of North Carolina. While it was impossible to get all of the editorials, I was able to get a very representative group of them for insertion in the Congressional Record as a tribute to Senator Hoey.

**Committee**  
Upon returning to the Senate last week after attending the convention in Raleigh, I began my new duties as a member of the Senate Interior and Insular Affairs Committee. I am looking forward to service on this committee.

**Commission**  
A new assignment was given me on the Commission in Intergovernmental Relations. This is a bi-partisan commission for the purpose of studying ways whereby the Federal and state governments can eliminate waste and inefficiency through proper coordination of governmental activity.

**Tax Legislation**  
Senator George, of Georgia, and I have had an opportunity to discuss the tax situation. I am glad to report that he is even more determined than ever to bring income tax reductions for millions of Americans, especially those in the lower income brackets. I agree with him wholeheartedly and am looking forward to reporting that belief into action.

**Tobacco For South Korea**  
Three million dollars worth of flue-cured tobacco soon may be on the way to South Korea. It was a pleasure to be among those pushing the plan for sale of the leaf through the Foreign Operations Administration. South Korea made a bid for this tobacco early this year. The request was later withdrawn. But I have been assured Korea will be given the opportunity to renew the bid and the outlook is very bright that the sale will be consummated.

**Young Visitors**  
We're right busy here in Washington but never take time to take time out and greet the hundreds of North Carolina school students who visit the Capitol weekly. Meeting and talking with them refreshes one's faith in the future of America. And I believe many of their parents would be surprised by the interest they show, by asking questions, in the national government. There is no doubt that these visits are truly a part of their education for good citizenship.

**Waterways Meeting**  
There was an unusually large number of North Carolina leaders visiting in Washington last week. Included was a large delegation to the annual convention of the National Rivers and Harbors Congress. All the projects they proposed for improvement of channels and inlets were passed by the Projects' Committee and we'll be hearing more about them in the Congress later.

## Cotton Crop For 1953 Totals 449,000 Bales

Ginnings for the 1953 season indicate a North Carolina cotton crop of 449,000 bales of 500 pounds gross weight. The 1953 crop was 21 per cent below the 569,000 bales grown by Tar Heel farmers in 1952 and 14 per cent less than the 10-year 1941-51 average production of 522,000 bales.

Based on the average price of 33.0 cents per pound for the season to May 1 the value of the 1953 crop totals \$74,116,000 down 27 per cent from the 1952 crop valuation of \$101,471,000. The season average price for the 1952

crop was 35.38 cents per pound. Cottonseed production from the 1953 crop totaled 185,000 tons compared with 239,000 tons in 1952. It is indicated that farmers in this State received an average price of \$51.30 per ton with total production of cottonseed valued at \$9,490,000. The 1952 cottonseed crop was valued at \$17,17,000.

The combined value of lint and cottonseed from the 1953 crop, at \$83,606,000 total valuation of the 1952 crop.

The two principal causes for reduced yields in 1953 were dry weather and weevil damage, according to North Carolina cotton reporters. These two factors alone accounted for a reduction from a full yield of 29 per cent, boll weevil 15 per cent, and deficient moisture 14 per cent.

## Letter To Editor

Hertford, N. C.  
June 2, 1964.

The Perquimans Weekly

Dear Sir:  
I am ashamed of Perquimans County and every one who lives here should be just as ashamed as I am.

This past Tuesday, June 1st, the Red Cross Bloodmobile made its semi-annual visit. Out of this county with a population of 9,602 a grand total of 23 pints of blood was collected and practically 100 per cent of that was given by the same donors that give every time.

Sure, I know you are busy, I am too, but if you or some of your family were in urgent need of a blood transfusion I doubt very much that business would interfere with your trying to get blood at any price.

Even when we were at war in Korea and our boys were dying on the battlefields every day for lack of blood plasma this county at best could only get 50 to 75 pints per visit. What's the matter with us? It does not cost a cent to give one pint, and if you want to put it on a selfish basis, the life you save may be your own or one of your loved ones.

The quota for this county is 150 pints twice a year, if there are not enough red blooded people in this county to meet that little quota then we had better give the county back to the Indians and commit mass hari-kari, according to past records it wouldn't bloody up anything.

A CITIZEN.

## Do You Remember?

BY J. P. PERRY

We are a long way from home in North Carolina and our time is running out for California, but we have one special trip to take today, December 26, 1953, a wonderful scenic visit to the top of Palomar Mountain, 5,202 feet. We leave Caronado at 9:25, 75 miles to the Palomar Mountain Observatory, located in the Cleveland National Forest district, about 30 miles north of Escondido and within Paloma Mountain State Park. The observatory of the California Institute of Technology is on the sum-

... of the mountain. It consists of three domes in graduated sizes, the largest of which houses the 200-inch Hale telescope, the largest in the world. On our way up we pass through several good sized towns, see quite a few eucalyptus trees, lemon groves, orange and avocado pear orchards, Webb Bros. advertising irrigation equipment—more orchards, farms, homes and churches. On the mountain sides see sheep and horses grazing. We arrive at the observatory at 11:25 (when we had to stop the car) and walk the remainder of the way. First we come to the museum which houses pictures of the telescopes and then on the walls of a very large room are pictures of heavens, stars and planets, made from the telescope and said to be from 100 to 200 million light years from this earth. On the observatory! Our first glimpse of it looked about the size of a grapefruit and now inside as big as a hotel. Inside we are 5,998 feet up. The telescope is enclosed in a tremendous glass room and is beyond description—wonderful! We leave at 12:15 P. M. for a delightful drive back to Caranado. e stop for lunch on the way and drink water gushing from out the side of the mountain. In this area are forests of redwood, Palomo Gardens, a beautiful spot 3,000 feet. We reach Gene's home in Caronado at 3:30 thrilled over the facts of this day's visit to Mt. Paloma, the observatory and seeing the world's largest telescope. I have souvenirs of this day's trip. Thank you!

## WAKE FOREST GRADUATE

Mrs. Marjorie Perry Flick was graduated cum laude from Wake Forest College in exercises held there on May 31. Mrs. Flick received a B.A. degree with a major in English and minors in Education, Religious Education and Social Studies. She and Mr. Flick have accepted teaching positions in the Halifax County High School, South Boston, Va., for the coming year.

## ACC GRADUATE

Kelly J. Byrum of Woodland Circle, will be awarded the A.B. Degree in graduation exercises at Atlantic Christian College, Sunday, June 6. Byrum will be graduated with a major in science.

**DELMARVELONS BROILED CHICKEN**  
(Winey recipe, National Chicken Council, Baltimore, Md.)

8 to 10 young, plump, tender broilers or fryers, cleaned and boned  
1 lemon  
1 cup melted butter  
1 teaspoon salt  
1 teaspoon sugar  
1 teaspoon paprika  
1/2 teaspoon black pepper

Have chicken split in half for broiling. Rub entire surface of chicken with salt and lemon, especially between, to obtain tender, juicy meat. Coat with melted butter. Sprinkle with mixture of salt, sugar, paprika and pepper. Place in broiler pan, skin side down. Place broiler 1 to 2 inches from source of heat. Broil about 10 minutes. Turn and broil with butter two or three times during broiling to brown and cook evenly. Total cooking time varies from 25 to 30 minutes. The chicken is done when the meat in the thickest part of the drumstick is tender and there is no pink color visible. Serve with pan dripping poured over top.
